

POP SHIELD

Plosive Protection Filter

RØDE[®]
MICROPHONES

Features

The RØDE Pop Shield is an acoustically transparent plosive protection filter, designed to minimise plosive sounds (hard 'P', 'B', 'T' and 'K' sounds) that produce a sudden jet of air potentially overloading the capsule and producing a 'popping' sound.

It features 360° rotation on both the mount and screen, in addition to the 30cm (12") flexible mounting arm. The mounting clamp attaches to stands of diameter up to 25mm (1").

Specifications

Weight	250g
Flexible arm length	30cm (12")
Screen height	150mm (5.9")
Screen width (widest)	215mm (8.5")
Max. mounting diam.	25mm (1")
