& 360° Lens

1920x1080 HD Video Recording

Lets you capture once-in-a-lifetime high definition videos using the MP4 (H.264) format. This popular format compresses audio and video files for fast transfer to your PC or Mac. It's also highly compatible with the Web, making it easy to upload your images to popular photo or video-sharing Web sites such as Photobucket® or YouTube™ (compatible PC with Internet connectivity required).

5 Megapixel Still Photos

Take sharp 5MP still images thanks to **bloggie's** integrated 1/2.5" CMOS sensor.

Horizontal Playback

Lets you record video while holding the camcorder in its natural, upright position. Then when you want to play back your movies, simply rotate the camera into a horizontal position to take full advantage of its generous 2.4" (230k pixels) LCD display³.

Built-in USB Arm

Lets you connect your camera directly to a compatible PC/Mac to upload videos and/or charge your battery without having to hunt for cables²⁴.

Rotating Lens

Features a unique lens that swivels up to 270 degrees. When rotated, the LCD instantly powers on the camera so you can start recording video or taking still shots immediately.

Lightweight, Pocketable Design

Approximately 0.75" thick and 2.25" wide, the ultra-compact **bloggie™** weighs just 4.5oz, slipping easily into your bag or pocket.

SteadyShot® image stabilization

Helps reduce blur caused by camera shake.

4x Digital Zoom
