

Description

The SSE is a new enclosure series featuring high power ratings with custom components, a sleek look and a unique, snap-in metal grille. The SSE 10 is a two-way system featuring the highly acclaimed Peavey 14XT titanium compression driver with the diverse Sound Guard IV tweeter protection network and a maximum-performance 10" woofer for a smooth response. The SSE 10 is rated at 400 Watts program and 800 Watts peak. This lightweight speaker system is ideal for smaller venues where space is at a premium. Connections are made using a four-pin Neutrik® Speakon® or paralleled two-position terminal block for additional cabinets. The SSE 10 incorporates flying points on the top of the unit and mounting points on the bottom for utilizing the Peavey VersaMount 70 mounting bracket. The SSE series is available in black, white and natural finishes.

Features:

- Two-way sound reinforcement enclosure
- Designed for permanent install
- Available in three finishes: black, white or natural
- Premium 10" woofer
- Peavey 14XT™ titanium compression driver
- Sound Guard™ IV tweeter protection network
- Seven flying points (six 3/8" for suspension and one 1/4" for angle adjustment)
- Mounting point for VersaMount™ 70 bracket
- 13 mm Birch plywood construction
- 400 Watts program/800 Watts peak power handling
- 80 Hz to 17 kHz
- 95 dB at 1W/1m
- 8 Ohms

Frequency response, 1 meter on-axis, swept-sine in anechoic environment:
80 Hz to 17 kHz (±3 dB)

Usable low frequency limit (-10 dB point):
60 Hz

Power handling:
Full range:
400 W program
800 W peak

Sound pressure level, 1 Watt, 1 meter in anechoic environment:
Full range:
95 dB SPL 2.83 V input)

Maximum sound pressure level (1 meter):
Full range:
118 dB SPL continuous
124 dB SPL peak

SANCTUARY SERIES™

Radiation angle measured at 6 dB point of polar response:

500 Hz to 1.6 kHz:

Horiz. $125^\circ \pm 25^\circ$

Vert. $130^\circ \pm 15^\circ$

1.6 kHz to 5 kHz:

Horiz. $105^\circ \pm 20^\circ$

Vert. $75^\circ \pm 30^\circ$

5 kHz to 16 kHz:

Horiz. $95^\circ \pm 25^\circ$

Vert. $65^\circ \pm 10^\circ$

Directivity factor, Q (Mean):

7.19 ± 6.07

Directivity index, Di (Mean):

$8.09 \text{ dB} \pm 2.01 \text{ dB}$

Transducer complement:

Low frequency section:

Premium-grade 10" woofer

High frequency section:

Peavey 14XT™ titanium diaphragm

compression driver

on a $90^\circ \times 60^\circ$ constant directivity horn

Box tuning frequency:

Low frequency section:

78 Hz

Harmonic distortion:

1 kHz: 0.07%

Third harmonic:

100 Hz: 0.58%

1 kHz: 1.02%

10% rated power

Second harmonic:

100 Hz: 2.28%

1 kHz: 0.40%

Third harmonic:

100 Hz: 0.97%

1 kHz: 2.02%

Electro-acoustic crossover frequency (internal passive):

2.1 kHz

Impedance (Z):

Full range:

Nominal: 8 Ω

Minimum: 6 Ω

Input Connection:

1 four-pin Neutrik® Speakon® in parallel with 1 two-position terminal strip

Enclosure materials and finish:

Trapezoidal, dado-joined, 12 mm 9-ply Birch finished with a textured acrylic polyurethane, with a full-length metal grille covered with acoustical-grade grille

cloth. Available in black, white or natural finishes.

Mounting provisions:

(6) $3/8"$ -16 threaded mounting suspension points (three each top and one each side and back). Use only forged shoulder machinery eye bolt, Mil Spec MIL51937-3.

(1) $1/4"$ -20 threaded mounting point on back bottom for angle adjustments.

(4) $1/4"$ -20 threaded mounting points on bottom to accommodate use of VersaMount™ 70 adjustable mounting bracket.

(4) $1/4"$ -20 threaded mounting points.
DO NOT suspend this unit upside down using the VersaMount system.

Dimensions (H x W x D):

Front:

$19.63" \times 15.09" \times 12.12"$

498 mm x 383 mm x 308 mm

Rear:

$19.63" \times 11.09" \times 12.12"$

498 mm x 383 mm x 308 mm

Net Weight:

29 lbs. (13.2 kg)

Frequency response

This measurement is useful in determining how accurately a given unit reproduces an input signal. The frequency response of the SSE 10 is measured at a distance of 1-meter using a 1 Watt (into the nominal impedance) swept-sine input signal. As shown in figure 1, the selected drivers in the SSE 10 combine to give a smooth frequency response from 80 Hz to 17 kHz.

Directivity

Beamwidth is derived from the -6 dB points from the polar plots (see figure 3), which are measured in a whole space anechoic environment. Q and Directivity Index are plotted for the on-axis measurement position. These specifications provide a reference to the coverage characteristics of the unit and provide insight into proper placement and installation in the chosen environment. The blending of the components of the SSE 10 exhibit a desirable beamwidth and directivity (figures 3 and 4) suitable for sound reinforcement applications.

Power handling

There are many different approaches to power handling ratings. Peavey rates this loudspeaker system's power handling using a full-range form of the AES Standard 2-1984. Using audio band 20 Hz to 20 kHz pink noise with peaks of four times the RMS level, this strenuous test

signal assures the user that every portion of this system can withstand today's high technology music. This rating is contingent upon having a minimum of 3 dB of amplifier headroom available.

Harmonic distortion

Second and third harmonic distortions vs. frequency are plotted in figures 5 and 6 for two power levels. Ten percent (10%) of rated input power and either one percent (1%) of rated input power or 1 Watt, whichever is greater. Distortion is read from the graph as the difference between the fundamental signal (frequency response) and the desired harmonic. As an example, a distortion curve that is down 40 dB from the fundamental is equivalent to 1% distortion.

Mounting

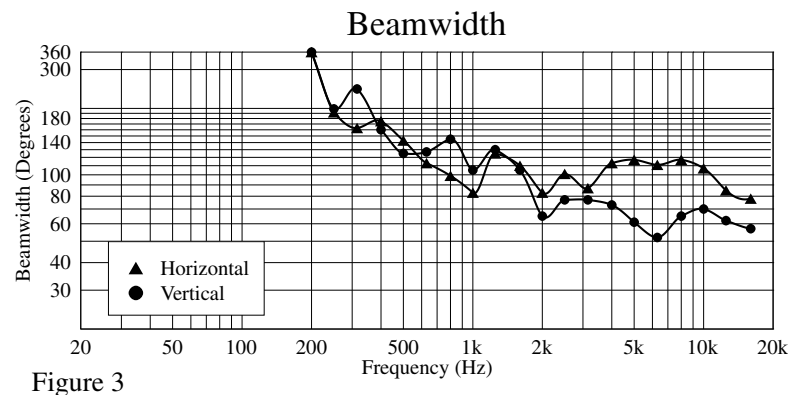

Caution: Before attempting to suspend or mount this speaker, consult a certified structural engineer. The speaker may fall due to improper installation, resulting in serious injury and property damage. DO NOT suspend or mount any other product or device from this enclosure. The maximum enclosure angle is 45° . Use only Grade 5 hardware or better. All associated rigging is the responsibility of others.

Architectural and Engineering Specifications

The loudspeaker system shall have an operating bandwidth of 80 Hz to 17 kHz. The nominal output level shall be 95 dB when measured at a distance of a meter with an input of 1 Watt. The nominal impedance shall be 8 Ohms. The maximum program power handling shall be 400 Watts with a peak power input of at least 800 Watts and a minimum amplifier headroom of 3 dB. The nominal radiation geometry shall be 90° in the horizontal plane and 60° in the vertical plane. The outside dimensions shall be 19.63" high by 15.09" wide by 12.12" deep. The weight shall be 29 lbs. The loudspeaker system shall be a model SSE 10.

3 + 2 YEAR LIMITED WARRANTY

NOTE: For details, refer to the warranty statement. Copies of this statement may be obtained by contacting Peavey Electronics Corporation, P.O. Box 2898, Meridian, Mississippi 39301-2898.
