

Capture stunning 1920 x 1080 Full HD video² and 3.0 megapixel images with the ultra-compact HDR-CX110, which features an "Exmor R" CMOS sensor for superior low-light performance and a Carl Zeiss® Vario Tessar 25x optical zoom lens to help bring you closer to the action.

- 1920x1080 high definition video recording:
1920 x1080 high definition resolution lets you record your memories in exceptional Sony® Full High Definition quality².
- 3 megapixel still image capture:
3 megapixel still image capture lets you take high resolution digital photos.
- 1/4" back-illuminated "Exmor R" CMOS sensor
A 1/4" "Exmor R" CMOS image sensor delivers bright, vivid, spectacularly detailed video footage, as well as 3 megapixel still images. In addition, "Exmor R" technology captures images with high resolution and high sensitivity, while the advanced Sony® BIONZ™ image processor improves camera response time and screens out noise to help ensure that the signal from each pixel is as pure as possible.
- Back-illuminated "Exmor R" CMOS sensor
Experience stunning low-light sensitivity with improved image clarity and drastically reduced grain with the back-illuminated "Exmor R" sensor. Designed for compact cameras and camcorders, the "Exmor R" sensor relocates the photo diodes above the support circuitry, maximizing the light gathering area per pixel so you can shoot with better results in lower lighting conditions. Approx. 2x increase in sensitivity compared to Sony's existing front-illuminated CMOS sensors at F2.0.
- 2x faster Quick AF
With the new and improved autofocus (AF) system, Quick AF, the focusing speed is twice as fast compared to previous models. Whether in bright daylight or in dimly lit environment, Quick AF ensures fast, accurate, and consistent focus lock, enabling users to shoot in a wide range of scenes without missing any important moment. Especially when shooting night scenes where conventional AF might struggle to focus, thanks to the much improved AF algorithm in Quick AF, users can now capture crisp images, fast.
- 1080/60p playback via HDMI™ and compatible HDTV⁴
1080/60p playback via HDMI™ and compatible HDTV⁴ providing stunning clarity and incredibly detailed playback of your memories.
- Professional-quality Carl Zeiss® Vario Tessar Lens:
Carl Zeiss® Vario Tessar lenses use highly advanced optics to deliver vivid image brilliance, true-to-life color saturation, and perfect renditions of subtle tones.
- Face Detection Technology with Face Priority
With Face Priority, your camcorder optimizes focus, color, exposure, and Smile Shutter™ technology for the face you prioritize. Just touch the preferred face on the LCD display and the camcorder will assign it priority, even if it leaves and returns to the frame.
- Smile Shutter™ technology for still and dual capture:
Smile Shutter® technology lets the camcorder automatically take still photos when your subject smiles, even while shooting high definition video. You can also set the sensitivity and choose child, adult, or auto priority.
- Direct Copy to external HDD w/o PC¹³
Store your memories in a whole new way with the ability to copy videos from your camcorder directly to an external hard disk drive¹³ (sold separately), all without a computer. Your camcorder can also access videos stored on the external hard drive for playback on your HDTV, allowing you to utilize the camcorder's handy playback features.
