\*preliminary technical data

SoundTube continually develops new product innovations and improvements. Updates to existing products without prior notice are an example of SoundTube's drive for constant improvement. For updated technical information download a technical data sheet from www.soundtube.com. SoundTube® Entertainment manufactures a complete line of open-ceiling, in-ceiling, high-power, outdoor and sound-focusing speakers. All SoundTube products come with a 5-year limited warranty. All SoundTube products are designed and engineered in the USA. © 2008 SoundTube Entertainment, Inc. All rights reserved.

High-Power Speakers

Powerful performance with visual appeal

# Advancing the Science of Sound

SoundTube's focus on advancing design and engineering has created products and a brand that stand for true customer benefit and quantifiable value. SoundTube has taken a unique approach to the acoustical challenges associated mid-to long-throw music and messaging. By delivering treble dispersion over a wider area, SoundTube is ideal for gymnasiums, theme parks, arenas, public spaces and promenades.

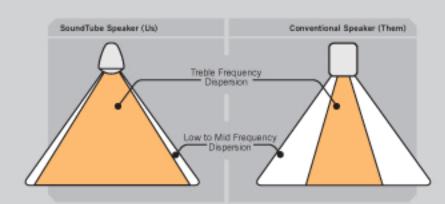

## Pushing the Boundaries of Acoustics

SoundTube has pushed the limits of acoustics and physics to develop several new audio technologies for the HPI High-Power line including BroadBeamHP<sup>9</sup>.

Three years in development, BroadBeamHP® is a revolutionary treble dispersion technology that allows each speaker to cover more area with full-frequency sound. In concert with SoundTube's other proprietary technologies, BroadBeamHP® delivers superior performance and lowers overall system costs.

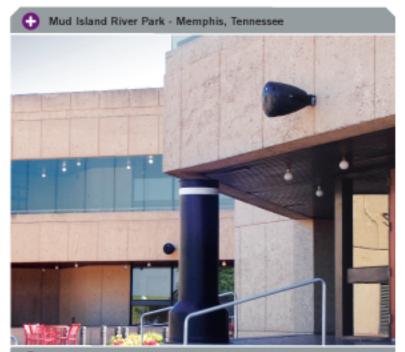

# Delivering More Intelligible Sound

SoundTube high-power speakers deliver better, more intelligible sound through BroadBeamHP® dispersion technology which distributes the higher frequencies of sound over a wider, more effective pattern than conventional high-power speakers. This allows for wider spacing of speakers and fewer speakers per install, without sacrificing intelligibility.

## **Anatomy of Sound**

🤰 Five Flags Hockey Rink - Dubuque, Iowa

Links Bus Terminal - Orlando, Florida

# Delivering Technology and Value

Every feature of SoundTube HPI speakers maximizes performance and benefits the customer – from the patented, ultra-rigid enclosure design that eliminates standing sound waves to the advanced circuitry that provides true musical reproduction and crystal-clear intelligibility, indoors or out.

#### System compatibility

By using the same electro-acoustic subassembly, these new speakers are designed to sonically match SoundTube's CMi and SMi speakers for applications requiring combinations of hanging and mounted speakers.

## Full-frequency dispersion

The hallmark of SoundTube HPi speakers is full-frequency sound dispersion, made even more robust with BroadBeamHP® SoundTube's revolutionary high-frequency dispersion technology.

#### C Extreme duty motor-board

SoundTube's new cast-aluminum motorboards integrate the woofer frame, heat-sink and baffle features for extreme stiffness, cooling and serviceability.

# C Hanging hardware included

Installation hardware, including hanging cables and speaker clamps is included with each HPi speaker.

#### ZeroReflection\* enclosure

HPI enclosures are optimized to eliminate standing sound waves and deliver intelligible sound in large open spaces while integrating with all types of architecture.

### C Fast-action wiring

Each new HPi speaker is shipped with fast-action wiring and a 6-position tap switch that allows for 25, 70.7 or 100 Volt and 8 Ohm applications. For serious outout HPi series transformers range from 33 to 150 Watts, depending on the model.

## Surface-mounting option

In addition to hanging in open ceiling environments, HPi speakers can be surface mounted with SoundTube's optional bracket.
