JTV-89F

James Tyler-designed Solidbody Guitar with Variax Modeling

Floyd Rose® licensed double-locking tremolo system by Graph Tech

29 incredibly detailed Variax instruments

Create custom instruments with Workbench software

Record pristine acoustic guitar tracks with ease

Switch between 11 alternate down tunings and Virtual Capo

With 29 incredibly detailed Variax® instruments—plus the ability to virtually tune down a whole octave without impacting playability or intonation—JTV-89F shatters the limitations of traditional guitars. The high-gain humbucking pickups and lightning-fast fretboard make JTV-89F the perfect instrument for players of heavier, high-gain styles. Switch between instruments and drop tunings on the fly—and experience rock-solid tuning stability through massive pitch changes with the Floyd Rose® licensed* double-locking tremolo system by Graph Tech. You can even go beyond what's possible in the physical realm and create custom instruments with Variax Workbench™ software.

Floyd Rose is a registered trademark of Floyd Rose Industries.
