

ChannelStrip3

The Ultimate Signal Processing Bundle

World Class Digital Signal Processing

ChannelStrip is the recognized leader in console style channel strip audio processing for digital audio workstations. As the first plug-in to offer the combination of exceptional audio quality, incredible DSP efficiency and a comprehensive user interface, ChannelStrip lets users work as efficiently and interactively as they would with a dedicated, world-class mixing console. ChannelStrip comes with more than 100 presets included to help you get your mix started. Use the presets to compress your drums, EQ your vocals, get your sessions ready for mastering and much more.

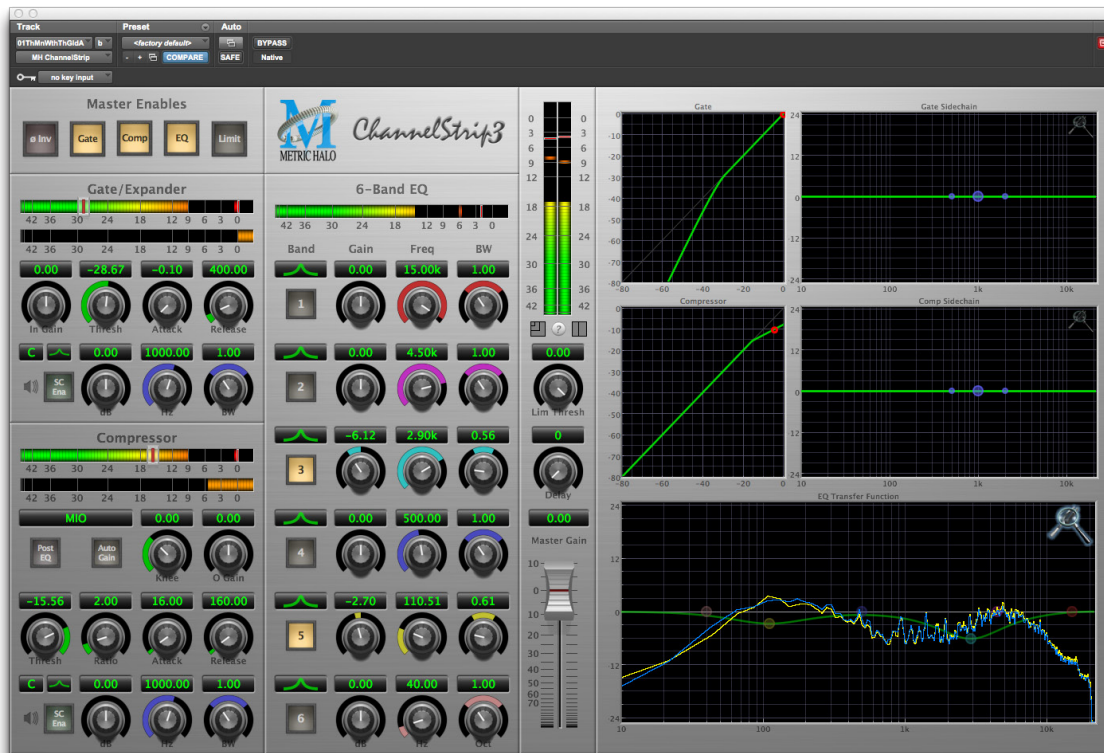

- Input gain/trim
- Polarity Invert
- Expander/gate with integrated side-chain filter
- Compressor with integrated side-chain filter
- Sidechain listen
- 6 band fully parametric EQ
- 6 selectable filter band types
- User adjustable 255 sample delay
- Limiter
- Output gain/trim
- High-resolution metering for each processing block
- SpectraFoo™ spectral analysis
- Preset library to help you start working on individual instruments, vocals or entire mixes
- Resizable UI

With ChannelStrip you get an unparalleled EQ, Gate, Compressor and Limiter all in one easy to use interface.

ChannelStrip 3 is the latest version of the critical mixing tool for thousands of top engineers and producers worldwide, and is now available for Pro Tools™ 10. CS3 supports Native and AAX DSP operation with a single license.

\$199, or part of the \$699 Production Bundle

Software requirements: Pro Tools 10 (Mac / Win), Mac AU host, iLok account

ChannelStrip 3 runs in the new AAX plug-in format in Pro Tools 10 (Native and AAX DSP modes) as well as in Mac Audio Units with a single license!
