DMX USB PRO

GENERAL INFORMATION

"A tool, not a toy". Born of the Open DMX USB, the DMX USB Pro represents a significantly more robust way to control lights from your computer, It's lightweight, portable and ready for professional applications. It can be used for output, controlling your lights, or as input to allow DMX data from another source to interact with various programs on your PC, On-board chips handle timing and signal processing, so you get a clean signal no matter what your PC's processor is up to.
