HedgeHog 4™

SKU# **HOG001**

A new breed of Hog!

The Hog range just got broader. HedgeHog 4 is the littlest of the range and still packs quite a punch. It runs the same software as all the other Hogs and even comes with ArtNet and CITP capabilities. Designed for small to mid level shows, it is compact, lightweight and easy to take on a plane!

Running on Linux, it is fast, stable and ready to Hog. Whether being used in a school theatre, nightclub, corporate event, medium scale rental job or House of Worship, this is the perfect console. Retaining the same programming layout as its larger brother, the Road Hog 4, as well as being able to load showfiles from any of the range (and vice versa) means that this compact console is extremely flexible and easy to use.

FEATURES

Robust Hog 4 Operating Software
Use Any Hog 4 Show File in HedgeHog4
(i.e. Hog 4, Full Boar 4, Road Hog 4, Nano Hog 4)
Unlimited Number of Simultaneous Crossfades
