

Model Series: VR

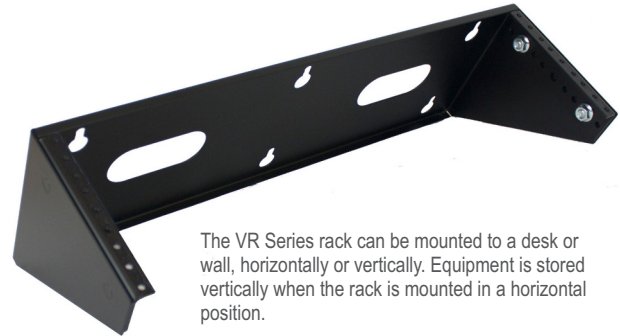

The VR Series wall-mount rack is the quintessential space saver made to mount equipment using a minimal amount of space. Available in two, three, or four rack units, this extremely versatile rack is designed to accommodate equipment of just about any depth. The VR mounts vertically or horizontally – on a wall or under a desk – whichever way works best for the project at hand. With 16-gauge certified U.S. steel construction, this efficient design is made to handle loads up to 200 lbs.

Features:

- 16-gauge steel rack mounts to wall or desk, vertically or horizontally
- Two 11-gauge steel mounting rails tapped 10-32
- Mounting holes on 8" and 16" centers
- Mounts standard 19" E.I.A. equipment
- Two rear obrounds for cable management
- 2U, 3U or 4U models
- Load capacity 200 lbs.
- Use two together for four-point mounting
- EIA/TIA compliant
- Made in the U.S.A. with 100% certified U.S. steel
- Smooth black powder epoxy finish

A&E Specifications:

The wall-mount rack for vertical or horizontal use shall be Lowell Model No. _____. It shall hold up to ____ (2, 3, 4) rack units of equipment and overall measurements shall be 19.17"W x 6.00"H x _____"D. Construction shall be formed 16-gauge steel with a smooth black powder epoxy finish. The rack shall feature mounting holes on 8" and 16" centers and rear obrounds for cable management.

The VR Series rack can be mounted to a desk or wall, horizontally or vertically. Equipment is stored vertically when the rack is mounted in a horizontal position.

Model Numbers:

Model No.	Description	Racking Space	Overall Depth	Overall Height	Overall Width	Load Capacity
VR-2	Versatile wall-mount rack	2U	3.94"	6.00"	19.17"	200 lbs.
VR-3	Versatile wall-mount rack	3U	5.69"	6.00"	19.17"	200 lbs.
VR-4	Versatile wall-mount rack	4U	7.44"	6.00"	19.17"	200 lbs.

One rack unit (RU or U) = 1.75 inches or 44.45 mm.
