

MTR201

Condenser Microphone

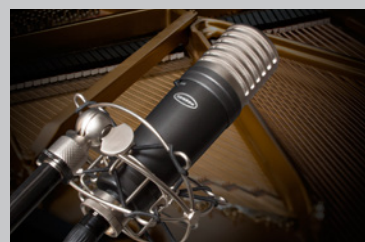

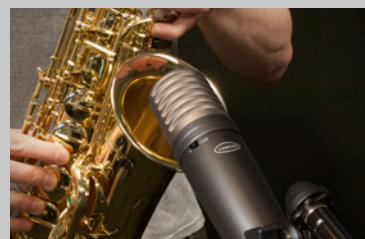

Samson's MTR201 Condenser Microphone brings exceptional performance and high-end quality to a variety of live and studio situations. Ideal for recording vocals, close miking instruments, use as a room microphone and more, the MTR201 solidifies Samson's commitment to offering superior sound and the ability to capture the best audio possible.

The MTR201 is a large, 1" gold-sputtered diaphragm studio condenser microphone. It features a cardioid pickup pattern that provides increased isolation of a sound source and is designed to handle high SPLs of up to 132dB. It also has a 10db attenuation switch for handling ultra-high levels. The MTR201 produces a smooth, extended frequency response, as well as low self-noise and a wide dynamic range perfect for recording. In addition, its internally shock-mounted capsule also reduces handling noise and external vibrations. This rugged die cast mic is bundled with a pop filter, shockmount and protective carry case.

Sound superior with the new MTR201 Condenser Microphone from Samson.
