## STICK-ON ${ }^{\circledR}$ SERIES <br> Model STM-3 High Gain Mic Preamplifier

## ANYWHERE YOU NEED...

- High Gain Microphone Preamp
- Adjustable Output Levels
- High or Low Impedance Mic Inputs
- To Convert Line Inputs to Mic Inputs
- Two Balanced or Unbalanced Outputs
- Separate Phantom Supply Input
- RF Filtered Inputs and Outputs
- Low-Distortion Performance

## You Need The STM-3!

The STM-3 is part of the group of STICK-ON products from Radio Design Labs. The STM-3 is a quality microphone preamplifier designed for use in commercial sound, broadcast, and recording applications. The STM-3 is very flexible with gain adjustment from 0 to 75 dB , two balanced or unbalanced outputs, and available phantom supply input! Its compact size makes it ideally suited to locations where a larger or heavier preamplifier cannot be used. The high gain of the STM-3 makes it useful with normal mics in facilities using a +8 dB standard. It is also suited for use with ceiling mics or speakers designed to pick up general activity in a room requiring more than usual gain. Some features of the STM-3 are:

- Balanced microphone input accepts impedances from 150 to $600 \Omega$
- Input circuitry permits connection of unbalanced microphones, or 4 or $8 \Omega$ speakers in intercom or monitoring applications
- Variable gain (up to 75 dB ) and ample headroom allow operation with any mic
- Phantom supply input terminals allow connection of external power when STM-3 is used with phantom powered microphones
- Supply input is single-ended and operates from 24 Vdc to $33 \mathrm{Vdc}(12 \mathrm{Vdc}$ at reduced headroom)
- Two separate outputs are provided for balanced operation
- No lugs required for reliable connections
- Convenience of STICK-ON package yields quick, efficient installation
- Use STM-3 in conjunction with other RDL STICK-ONs to make complete audio systems

Anywhere you need a high-gain Mic to Line preamplifier, STM-3 is the reliable and cost-effective solution!

## STICK-ON ${ }^{\circledR}$ SERIES <br> Model STM-3 <br> High Gain Mic Preamplifier

## Installation/Operation

 SUPPLY

NOTE: THE STM-3 WILL OPERATE (WITH REDUCED HEADROOM) ON SUPPLY VOLTAGES FROM 9 VDC TO 23 VDC.

## TYPICAL PERFORMANCE

Input Impedance:
Output Impedance:
Output Levels:
Frequency Response:
Gain:
THD +N :
CMRR:
Headroom:
Power Requirement:

150 to $600 \Omega$ balanced; $5 \mathrm{k} \Omega$ unbalanced
$150 \Omega$ balanced to drive balanced or unbalanced lines of $150 \Omega$ or higher
+4 dBu balanced
50 Hz to $25 \mathrm{kHz}(+/-1 \mathrm{~dB})$
Adjustable 0 to 75 dB
< 0.050\%
$>60 \mathrm{~dB}$ ( 50 Hz to 30 kHz )
$>20 \mathrm{~dB}$ ( 24 Vdc supply); 14 dB ( 12 Vdc supply)
24 to 33 Vdc @ 25 mA , Ground-referenced
(9 to 23 Vdc with reduced headroom)
