OVERVIEW:

The amazing ClearVIEW HD-20SE HD PTZ Camera quite literally combines all of the best features of the ClearVIEW HD-18, HD-19 and HD-20 HD PTZ cameras into ONE! The innovation of the HD-18 EZCamera™ Cat-5 interfaces, the low light capability of the HD-19 and the FULL HD performance of the HD-20 are all represented, and improved upon with the ClearVIEW HD-20SE. The ClearVIEW HD-20SE is clearly the best ClearVIEW ever, and here's why.

The HD-20SE is a native 1080p/60 camera using the latest 1/2.8-Type Exmor® high-speed, low noise CMOS image sensor technology with 2.38 Megapixels (total) and 2.14 Megapixels (effective). The ISP (image signal processor) is off-the-hook, not only providing fast, razor-sharp auto-focus routines with incredible detail, realistic textures and vivid colors, it also has an impressive low-light performance of 0.3 Lux (color) and 0.03 Lux (B/W). The lens is a 20X optical zoom multi-element glass lens with an impressive horizontal field of view of 63° on the wide end to 3.47° on the tele end. The outputs are simultaneous HDMI, YPbPr and HSDS™ (differential video for use with Quick-Connect™ Interfaces) and supports both drop frame and non-drop frame HD video resolutions of 1080p/60/59.94/50/30/25, 1080i/60/59.94/50 and 720p/60/59.94/50.

So to recap, latest technology, awesome ISP, superb low-light performance, powerful yet wide angle lens, lots and lots of video outs, drop and non-drop frame video, Full HD and there's more!

The ClearVIEW HD-20SE is paired with the Quick-Connect SR Interface in the QSR system, which provides power to the camera and returns HSDS video from the camera up to 100' (30.5m) over a single Cat-5e cable. RS-232 control and IR signals (modulated or non-modulated) can be passed from the camera to third-party equipment, such as videoconferencing codecs on a second Cat-5e cable.

The ClearVIEW HD-20SE is an exceptional value and a remarkable camera for even the most demanding HD video applications including House of Worship productions, pro A/V system integration, distance learning classrooms, live events, IMAG systems, UCC applications, videoconferencing, distance learning, lecture capture and more!. To top it all off, the ClearVIEW HD-20SE cameras are available in black or arctic white and are made in the USA.

Intended Use:

Before operating the device, please read the entire manual thoroughly. The system was designed, built and tested for use indoors with the power supply provided. The use of a power supply other than the one provided or outdoor operation has not been tested and could damage the device and/or create a potentially unsafe operating condition.

Important Safeguards:

Read and understand all instructions before using. Do not operate any device if it has been dropped or damaged. In this case, a Vaddio technician must examine the product before operating. To reduce the risk of electric shock, do not immerse in water or other liquids and avoid extremely humid conditions.

Use only the power supply provided with the system. Use of any unauthorized power supply will void any and all warranties.

Please do not use "pass-thru" type RJ-45 connectors. These pass-thru type connectors do not work well for professional installations and can be the cause of intermittent connections which can result in the RS-232 control line failing and locking up, and/or compromising the HSDS (high speed differential) signals. For best results please use standard RJ-45 connectors and test all cables for proper pin-outs prior to use and connection to Vaddio product.

Save These Instructions:

The information contained in this manual will help you install and operate your product. If these instructions are misplaced, Vaddio keeps copies of Specifications, Installation and User Guides and most pertinent product drawings for the Vaddio product line on the Vaddio website. These documents can be downloaded from www.vaddio.com free of charge.

UNPACKING:

Carefully remove the product and all of the included parts from the packaging. Identify the following parts for each camera:

ClearVIEW HD-20SE QSR SYSTEM (North America):

Part Number: 999-6985-000

- One (1) ClearVIEW HD-20SE Camera (998-6980-000)
- One (1) Quick-Connect SR Interface
- One (1) 24 VDC, 2.08 Power Supply with Power Cord for North America
- One (1) 3-Pos Molex 5mm Euro Connector
- One (1) Vaddio IR Remote Commander
- One (1) EZCamera™ Control Adapter (RJ-45 to DB-9)
- One (1) CONCEAL Wall Mount System
- Quick-Start Guide (1-pager)

Note: Full Manuals are downloaded from support.vaddio.com

ClearVIEW HD-20se, HD PTZ Camera (International):

Part Number: 999-6985-001

- One (1) ClearVIEW HD-20SE Camera (998-6980-000)
- One (1) Quick-Connect SR Interface
- One (1) 3-Pos Molex 5mm Euro Connector
- One (1) 24 VDC, 2.08 Power Supply
- One (1) Euro Power Cable
- One (1) UK Power Cable
- One (1) Vaddio IR Remote Commander
- One (1) EZCamera™ Control Adapter (RJ-45 to DB-9)
- One (1) CONCEAL Wall Mount System
- Quick-Start Guide (1-pager)

Note: Full Manuals are downloaded from support.vaddio.com

ClearVIEW HD-20se, HD PTZ Camera (North America):

Part Number: 999-6985-000AW (Artic White Version)

- One (1) ClearVIEW HD-20SE Camera (998-6980-000AW)
- One (1) Quick-Connect SR Interface
- One (1) 3-Pos Molex 5mm Euro Connector
- One (1) 24 VDC, 2.08 Power Supply with Power Cord for North America
- One (1) Vaddio IR Remote Commander
- One (1) EZCamera™ Control Adapter (RJ-45 to DB-9)
- One (1) CONCEAL Wall Mount System in AW
- Quick-Start Guide (1-pager)

Note: Full Manuals are downloaded from support.vaddio.com

ClearVIEW HD-20se, HD PTZ Camera (International):

Part Number: 999-6985-001AW (Artic White Version)

- One (1) ClearVIEW HD-20SE Camera (998-6980-000AW)
- One (1) Quick-Connect SR Interface
- One (1) 3-Pos Molex 5mm Euro Connector
- One (1) 24 VDC, 2.08 Power Supply
- One (1) Euro Power Cable
- One (1) UK Power Cable
- One (1) Vaddio IR Remote Commander
- One (1) EZCamera™ Control Adapter (RJ-45 to DB-9)
- One (1) CONCEAL Wall Mount System in AW
- Quick-Start Guide (1-pager)

Note: Full Manuals are downloaded from support.vaddio.com

ANATOMY OF THE CLEARVIEW HD-20SE HD PTZ CAMERA

Image: Front View ClearVIEW HD-20SE

1) Camera and Zoom Lens:

The 20X optical zoom lens is built around a (1/2.8 Type) high-speed, low-noise Exmor CMOS image sensor with a total of 2.38 total megapixels for precise HD video image acquisition.

2) Red Tally Light:

A red tally light is illuminated when the camera receives a command from an external control system.

3) IR Sensors:

IR sensors are built into the front of the ClearVIEW HD-20SE to receive IR signals from the IR remote control supplied with the camera.

4) Blue Power Light:

A Vaddio blue LED power light is illuminated when the camera is turned on. This LED will blink when IR signals are received.

Image: Rear View ClearVIEW HD-20SE Connectors

5) RS-232 IN & IR Out (Color Coded Blue):

The RS-232 accepts modified VISCA protocol for camera control, as well as transmits IR signaling received by the IR receivers to the Quick-Connect SR and the Quick-Connect DVI/HDMI-SR only, which can be sent to third party devices.

6) Dip Switch Settings:

Settings for IR remote, baud rate and image flip can be configured on these switches. See the Switch Settings page for additional information.

7) HD Video Select:

A rotary switch allows the user to choose the component HD output video resolution and format. See the Switch Settings page for additional information.

HD Resolution Note: When changing the resolution of the camera, the camera may have to be power-cycled after the change. The switcher typically will require a reboot or rescan.

8) 12 VDC Input:

Power input for the standard, ClearVIEW HD-20SE camera power supply.

9) HDMI Output:

The HDMI output feeds out HD digital video only (no copy protect or device communication is included). The HDMI output is optimized for HD video signals (seems logical).

10) YPbPr Output:

Component HD video (YPbPr) is output through the DE-15 connector. YPbPr and HDMI signals are simultaneous. Limited SD resolutions are supported.

11) EZ-POWER VIDEO Port (Color Coded Orange):

This RJ-45 connector is only used with the Quick-Connect SR Interface, Quick-Connect DVI-D/HDMI SR Interface and the Quick-Connect USB Interface to supply power and return HSDS (differential) video from the camera.

12) Slot for Optional Cards:

An EZIM CCU Slot Card is available for use with the Quick-Connect Universal CCU and is plugged into this slot.

FIRST TIME SET-UP WITH THE CLEARVIEW HD-20SE:

The ClearVIEW HD-20SE was designed to be a high quality camera that is very easy to use and operate. There is documentation at the back of this manual for pin-outs of the connectors on the ClearVIEW HD-20SE camera.

Step 1: Using the HD VIDEO SELECT rotary switch and CAMERA SETTINGS dip switches on the back of the camera, set up the camera's output resolution and functional preferences. There is a label on the bottom of the camera that identifies the choices.

Important Dip Switch Note: Setting all dip switches down and power cycling the camera will load the factory default camera settings. For the first time set-up, loading the defaults may be a good idea.

Image: Rear Panel Connections

1	2	3	4	5	6	7	8	9	10				

- Set the desired and available HD output resolution for the camera with the Rotary Switch.
- Set the IR frequency of the camera if it is to respond to the IR remote control.
- If using the IR forwarding feature, set the IR OUT switch to ON (SW3).
- Set the Baud Rate dip switch (SW4) to 9600bps for most applications. Default for Vaddio EZCamera Cabling Systems is 9600bps.
- To set the HDMI or DVI color space, use dip switch 7 (SW7).
- If inverting the camera, turn the IMAGE FLIP ON (SW8).

Dip Switch Settings Explained:

- IR 1 & 2:** The IR remote has the capability of operating up to three different PTZ cameras from one remote. Use the selector buttons at the top of the IR remote to select the frequency.
- IR Out 3:** The IR output is sent out on the RS-232 RJ-45 jack on the back of the camera. Turning on the IR output will allow IR signals to be transmitted over the Cat-5 cable to the head end. When using RS-232 control or Vaddio CCU controllers (also via RS-232), turn the IR OUT to OFF (up).
- Baud Rate 4:** The options for baud rate are either 9600 bps or 38,400 bps.
- HDMI Color or sRGB Color space 7:** Default is YCbCr. Use sRGB color space with older DVI-D monitors only. The YCbCr color space works for HDMI digital video. With the Quick-Connect SR, only use YCbCr.
- Image Flip 8:** To invert the HD-20, turn the IMAGE FLIP ON (switch down).
- Switches 5, 6, 9 and 10:** Leave up - or in the OFF position.

QUICK-CONNECT SR INTERFACE

Image: Rear Panel with Feature Call-outs

1) Power Input:

5.5mm OD x 2.5mm ID coaxial connector for the provided 24 VDC, 2.0 Amp switching power supply.

2) EZ-POWER VIDEO Port (Color Coded Orange):

A single Cat-5/5e/6 connection between the EZ-POWER VIDEO RJ-45 connector and the camera's the EZ-POWER VIDEO Port extends power and video. Power is fed to the camera and HSDS video is returned from the camera on the same Cat-5.

3) HD Video Output:

DE-15 connector outputs the YPbPr analog component HD video, which was extended from the camera over Cat-5 cable. SD video resolutions (Y/C and CVBS formats) are not supported by the Quick-Connect SR Interface, however analog component YPbPr SD (high fps format - 480p/59.94 and 576p/50) video is supported.

4) IR Output:

With the IR pass-thru turned ON (see camera dip switch settings), IR from third-party IR remote controls can be sent through the camera to third-party equipment, such as hardware videoconferencing codecs. IR can be used as either modulated (through the air) or non-modulated (wired) signals.

5) RS-232 INPUT (Color Coded Grey) and OUT TO CAMERA (Color Coded Blue) Jacks: These RJ-45 connectors allow an external controller (look-out for upcoming shameless plug) like the ProductionVIEW™ Precision Camera Controller to route through the Quick-Connect SR for ease of cable routing.

Before Installing:

- Choose camera mounting location, paying close attention to camera viewing angles, lighting conditions, possible line of site obstructions, and checking for in-wall obstructions where the camera is to be mounted. Always pick a mounting location that will optimize the performance of the camera.
- The CONCEAL wall mount for the ClearVIEW system can be mounted directly to a 2-gang wall box or can be mounted using only dry wall anchors.
- For Power/Video and RS-232 signals, use standard Cat-5 cable (568B termination with real RJ-45 connectors) from the EZ-POWER VIDEO and RS-232 ports on the back of the camera to the Quick-Connect SR Interface (see install instructions).

Image: Basic Connectivity Example of the ClearVIEW HD-20se

HD-20SE Camera connected to the Quick-Connect SR Interface and ProductionVIEW Precision Camera Controller

RS-232 Cabling:

For RS-232, use a standard Cat-5 cable (568B termination for RJ-45 connectors) from the RS-232 port on the back of a Vaddio ProductionVIEW camera controller or switcher. If the camera will be connected to a third-party control system (such as AMX or Crestron), a DE-9 to RJ-45 adapter is supplied with the camera for RS-232.

INSTALLATION BASICS:

The ClearVIEW QSR system was designed for installation on a vertical surface with Cat-5 cable connectivity for Video, Power and Control signaling (two Cat-5 cables are required). Installation is simplified in that no custom 8-Pin mini-din cables or expensive plenum coax cables or multi-pin cables are needed and no power outlets are required near the camera bracket. All cabling is routed to the head-end using Cat-5 cables with standard straight through RJ-45 connectors (568B termination). *“Pass-thru” type RJ-45 connectors should be avoided, like black bears on an installation site.*

General Installation Instructions for the CONCEAL Wall Mounting System:

Step 1: Determine Camera Mount Location

When locating the camera, consider viewing angles, lighting conditions, possible line of site obstructions and check for in-wall obstructions where the camera is to be mounted. Again, choose a mounting location to optimize the performance of the camera. After determining the optimum location of the camera system, route both of the required Cat-5 cables from the camera to the head-end. Mark the cables EZ-POWER VIDEO and RS-232 accordingly.

Both Cat-5 cables should feed-through a 1” (25.4mm) opening (circular or square shape) centered in the rectangular slot located on the rear flange of the CONCEAL Wall Mount Bracket.

Note: Do not cut out the entire rectangular slot opening in the wall! This will not allow the two lower wall anchors to correctly fasten the CONCEAL bracket to the wall.

If the bracket is to be mounted on a 2-gang wall box, use the screws supplied with the wall box cover plate to attach the CONCEAL Wall Mount Bracket. If mounting to drywall with wall anchors, use the four (4) quality wall anchors/screws provided.

Note: The mounting holes are slotted and are 90° opposing to provide easy leveling. Level the mount and tighten the mounting screws. The example of the CONCEAL mount shows an HD-USB, but the steps are identical for the HD-22 or HD-30.

Camera aligned and attached to the CONCEAL Wall Mount Bracket (by two-(1/4”-20) screws in the bottom of the mount).

Note: Check all Cat-5 cables for continuity in advance of final connection. Plugging the POWER/VIDEO Cat-5 cable into the wrong RJ-45 may cause damage to the camera system and void the warranty!

Step 2: System Wiring

Follow the sample wiring diagrams for connecting the Cat-5 cables to the camera and Quick-Connect SR Interface. Additional diagrams are available on the Vaddio website.

Connect the camera side as follows:

- Connect the Power/Video Cat-5 to the EZ POWER HD VIDEO RJ-45 jack on the back of the camera.
- Connect the RS-232 Control Cat-5 to the “RS-232 IN” RJ-45 on the camera.

Connect the Quick-Connect SR side as follows:

- Connect the Power/Video Cat-5 to the EZCAMERA POWER & HD VIDEO RJ-45 jack
- Connect the RS-232 Cat-5 cable to the RS-232 OUTPUT and route the controller to the RS-232 input.
- The controller can be routed directly to the camera if preferred. For IR Forwarding, the RS-232 cable must be routed through the Quick-Connect SR in order to operate correctly (see pin-out section)
- Wait to connect the power supply until later.

Step 3: Secure the Camera To the CONCEAL Wall Mount Bracket

After all cables are attached to the camera, place the camera onto the camera mount and insert the two 1/4"-20 screws into the camera through the two-screw slots in the bottom of the mount. **Note:** Be sure to align each side of the camera evenly for the best fit prior to tightening the mounting screws.

Step 4: Install the CONCEAL Lower Cover Plate

Attach the CONCEAL lower cover plate. Slide the lower cover plate from front of the mounting bracket toward the rear of the bracket. The two (2) rear locking tabs will need to be guided into position first and will lock in place as the lower cover plate is pushed toward the rear of the mounting bracket. The two (2) front tabs will engage as the cover is pushed back into place.

CONCEAL Lower Cover Plate with Locking Tabs

CONCEAL Lower Cover Plate locked in place

Step 5: Install the CONCEAL Rear Camera Cover

Install the CONCEAL rear camera cover on the mounting bracket with the supplied screw.

CONCEAL Rear Camera Cover

Completed CONCEAL Wall Mount Camera Bracket Installation

NOTE (One more time!): Verify that the Cat-5 cables are plugged in correctly. Plugging the Power/Video cable into the wrong RJ-45 jack may cause damage to the camera system and void the warranty.

Step 6: Connect System Power

Connect the 24 VDC power supply to the Quick-Connect SR Interface and to an AC outlet. The SR will power the camera via the Power/Video Cat-5 cable. The camera will "Home" to a centered position and will output video when it has completely booted up. The ClearVIEW camera is now ready for control information from the controller or IR Remote Commander.

A Note on Boot Order: When using a joystick controller or external control system, in order to ensure proper continuity of control and operation of the cameras, the RS-232 controller should be powered-on after the camera. In most, if not all cases, the camera needs to be on and running in order for communication to take place between the camera and controller. When plugging a new camera into a RS-232 controller/joystick that has already been powered up, a system reboot or camera rescan may be necessary to find the camera.

COMPLIANCE AND CE DECLARATION OF CONFORMITY - CLEARVIEW HD-20SE

Compliance testing was performed to the following regulations:

- **FCC Part 15 (15.107, 15.109), Subpart B**
- **ICES-003, Issue 4: 2004**
- **EN 55022 A: 2006 + A1: 2007**
- **KN24 2008 (CISPR 24: 1997 + A1: 2000 + A2: 2002)**
- **KN22 2008 (CISPR 22: 2006)**
- **EMC Directive 2004/108/EC**
- **EN 55024: A2: 2003**

- Class A

- Class A

FCC Part 15 Compliance

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15, Subpart B, of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his/her own expense.

Operation is subject to the following two conditions: (1) This device may not cause interference, and (2) This device must accept any interference including interference that may cause undesired operation of the device.

Changes or modifications not expressly approved by Vaddio can affect emission compliance and could void the user's authority to operate this equipment.

ICES-003 Compliance

This digital apparatus does not exceed the Class A limits for radio noise emissions from digital apparatus set out in the Radio Interference Regulations of the Canadian Department of Communications.

Le présent appareil numérique n'émet pas de bruits radioélectriques dépassant les limites applicables aux appareils numériques de la classe A prescrites dans le Règlement sur le brouillage radioélectrique édicté par le ministère des Communications du Canada.

European Compliance

This product has been evaluated for Electromagnetic Compatibility under the EMC Directive for Emissions and Immunity and meets the requirements for a Class A digital device. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

Standard(s) To Which Conformity Is Declared:

WARRANTY INFORMATION

(See Vaddio Warranty, Service and Return Policies posted on vaddio.com for complete details):

Hardware* Warranty: Two (2) year limited warranty on all parts and labor for Vaddio manufactured products. Vaddio warrants its manufactured products against defects in materials and workmanship for a period of two years from the day of purchase, to the original purchaser, if Vaddio receives notice of such defects during the warranty. Vaddio, at its option, will repair or replace products that prove to be defective. Vaddio manufactures its hardware products from parts and components that are new or equivalent to new in accordance with industry standard practices.

Exclusions: The above warranty shall not apply to defects resulting from improper or inadequate maintenance by the customer, customers applied software or interfacing, unauthorized modifications or misuse, mishandling, operation outside the normal environmental specifications for the product, use of the incorrect power supply, modified power supply or improper site operation and maintenance. OEM products and products manufactured by other companies are excluded and are covered by the manufacturer's warranty.

Vaddio Customer Service: Vaddio will test, repair, or replace the product or products without charge if the unit is under warranty. If the product is out of warranty, Vaddio will test then repair the product or products. The cost of parts and labor charge will be estimated by a technician and confirmed by the customer prior to repair. All components must be returned for testing as a complete unit. Vaddio will not accept responsibility for shipment after it has left the premises.

Vaddio Technical Support: Vaddio technicians will determine and discuss with the customer the criteria for repair costs and/or replacement. Vaddio Technical Support can be contacted through one of the following resources: e-mail support at support@vaddio.com or online at vaddio.com.

Return Material Authorization (RMA) Number: Before returning a product for repair or replacement request an RMA from Vaddio's technical support. Provide the technician with a return phone number, e-mail address, shipping address, product serial numbers and original purchase order number. Describe the reason for repairs or returns as well as the date of purchase. See the General RMA Terms and Procedures section for more information. RMA's are valid for 30 days and will be issued to Vaddio dealers only. End users must return products through Vaddio dealers. Include the assigned RMA number in all correspondence with Vaddio. Write the assigned RMA number clearly on the shipping label of the box when returning the product. All products returned for credit are subject to a restocking charge without exception.

Voided Warranty: The warranty does not apply if the original serial number has been removed or if the product has been disassembled or damaged through misuse, accident, modifications, use of incorrect power supply, use of a modified power supply or unauthorized repair.

Shipping and Handling: Vaddio will not pay for inbound shipping transportation or insurance charges or accept any responsibility for laws and ordinances from inbound transit. Vaddio will pay for outbound shipping, transportation, and insurance charges for all items under warranty but will not assume responsibility for loss and/or damage by the outbound freight carrier. If the return shipment appears damaged, retain the original boxes and packing material for inspection by the carrier. *Contact your carrier immediately.*

Products not under Warranty: Payment arrangements are required before outbound shipment for all out of warranty products.

Other General Information:

Care and Cleaning

Do not attempt to take this product apart at any time. There are no user-serviceable components inside.

- Do not spill liquids in the product
- Keep this device away from food and liquid
- For smears or smudges on the product, wipe with a clean, soft cloth
- Use a quality lens cleaner on the lens
- Do not use any abrasive chemicals.

Operating and Storage Conditions:

Do not store or operate the device under the following conditions:

- Temperatures above 40°C (104°F) or temperatures below 0°C (32°F)
- High humidity, condensing or wet environments
- In inclement weather
- In swimming pools or beaver dams
- Dry environments with an excess of static discharge
- In orbit (vacuum, temperature and re-entry problem)
- Under severe vibration

GENERAL SPECIFICATIONS:

ClearVIEW HD-20se, HD PTZ Camera	
Part Numbers	999-6985-000 (North America), 999-6985-001 (Int'l) - Black Camera Version 999-6985-000AW (North America), 999-6985-001AW (Int'l) - Artic White Camera Version
Image Sensor	1/2.8-Type Exmor, high-speed, low-noise CMOS Image Sensor 2.38 Megapixels (2.14M effective pixels).
Zoom	20X Optical Zoom with Multi-element Glass Lens
Field of View	Horizontal: 63° Wide End to 3.47° Tele End, (16:9 Aspect Ratio) Vertical: 36.8° Wide End to 1.85° Tele End
Lens Focal Length	f=4.44mm to 89mm / F1.6 - F3.4
Minimum Illumination	Color: 0.3 Lux (F1.6, 1/30 sec, 50 IRE), B/W: 0.03 Lux (F1.6, 1/30 sec, 50 IRE)
Video Resolutions	HD: 1080p/60/59.94/50./30/25, 1080i60/59.94/50 and 720p/60/59.94/50 HD Video Resolutions Only at 16:9
White Balance	Auto, Manual (Red and Blue Gain), OPWB, Indoor, Outdoor and Fluorescent
Video Output Formats	HDMI, Analog Component, HSDS (Differential Video, Power and Control for Quick-Connects)
Signal to Noise Ratio	Greater than 50 dB (AGC: Off)
Compatible Quick-Connects	Quick-Connect SR, Quick-Connect DVI/HDMI SR, Quick-Connect USB and Quick-Connect Universal CCU
Pan Range	Pan: +170 degrees to -170 degrees, Tilt: +90 degrees to -30 degrees
Preset Positions	16 (internal), 6 recalled via IR Remote
Control Methods	RS-232, IR Remote Commander and OSD (on screen display)
Tally Light	Available through RS-232 Control
HD Video Select	16-Position Rotary Switch: Used to set HD Video Resolution Output
Camera Settings	10-Position Dip Switch: Settings for IR Select, Baud Rate 9600, Image Flip and Color Space
Accessory Slot Cards	EZIM CCU Slot Card, Part Number 998-6900-006
Dimensions/Weight	7.81" (198.37mm) H x 6.67" (169.42mm) W x 7.057" (179.25. mm) D / 5.6 lbs. (2.630835643 kg.)
Quick-Connect SR Interface	
Connectors	<ul style="list-style-type: none"> • Power Connector: 5.5mm OD, 2.5mm ID coaxial connector • Power/Video RJ-45: Supplies power to, and differential HD video from the camera • Video Output: DE-15 connector for HD Analog Component (YPbPr) video only (No SD Support) • IR Output: Transmits modulated or non-modulated IR signals - from the camera's IR receiver • RS-232 IN RJ-45: Accepts RS-232 from ProductionVIEW or other external control systems • RS-232 OUT RJ-45: Sends RS-232 from Quick-Connect SR to the camera
Power Supply	24 VDC, 2.08 Amp Switching Power Supply
Dimensions (H x W x D)	1/3 Rack Size 1.6" (40.64mm) H x 5.5" (139.7mm) W x 3.25" (82.55mm) D
Accessory	Rack Mount Adapter: 998-6000-002 - Holds three (3) Quick-Connect SR Interfaces

1)	Unused
2)	Unused
3)	Unused
4)	IR Output (Diff Signal to Quick-Connect SR)
5)	IR Ground (Diff Signal to Quick-Connect SR)
6)	GND (GND of IR Short Range - Pin 3)
7)	RXD (from TXD of control source)
8)	TXD (to RXD of control source)

NOTE: The Vaddio ClearVIEW HD-20SE Control Protocol is similar, but not identical to, the Sony® VISCA™ command set in order to be compatible with several popular control devices. Not all VISCA commands are supported and there are many HD-Series specific commands in the following Command and Inquiry Lists.
