

ETC

Source Four Dimmer™ silences critics

"Tungsten captivates audience!"

A tungsten revolution – starring ETC's Source Four Dimmer – has stolen the show. Audiences had anticipated its final bow, but the classic beauty of tungsten shines brightly again in a revival from ETC's Source Four Dimmer. A new era of lighting includes a stunning Source Four Dimmer takes ETC efficient, star-quality lighting to today's repertoire. The completely silent distributed dimmer takes ETC Sensor®-quality power control out of the shadows and onto the spotlight, drawing applause without any buzz. ETC allows the tungsten show to go on.

The critically acclaimed Source Four Dimmer reduces cabling and puts fewer demands on the infrastructure of venues. Mounted directly to Source Four® fixtures, the Source Four Dimmer features onboard controls for local operation and RDM for remote setup. Strong and durable, the Source Four Dimmer is designed to last, braving the rigors of everyday lighting over time. The Source Four Dimmer features cutting-edge ES technology to provide electronic silent dimming.

*"Zero dBA
noise level
at 1 meter."*

The Lighting Times

ETC Source Four Dimmer™

THE NEXT GENERATION OF TUNGSTEN

Distributed dimming that doesn't drown out the applause

ETC believes that good dimming shouldn't be seen or heard. That's why the Source Four Dimmer operates completely silently, without any fan drone or filament buzz. It attaches to any ETC Source Four® to provide convenient yet powerful per-fixture distributed dimming. And thanks to ETC's Electronic Silent (ES) technology, the Source Four Dimmer can go anywhere your fixtures go, even in the most acoustically sensitive venues. With noise levels of 0dBA at one meter, you can put 100 Source Four Dimmers on a rig and still hear a pin drop.

Layers of light: Tungsten and LED

Going green doesn't have to mean abandoning quality of light or overspending on new fixtures. A Source Four with an attached Source Four Dimmer brings to your rig the brightness and quality of light that only tungsten can provide, working seamlessly alongside your LED luminaires.

Professional functionality

The Source Four Dimmer gives you the same level of security that you get from an ETC Sensor® system, in a distributed dimming model. You can configure your rig from your desk, thanks to onboard controls for local operation and RDM for remote setup. Find and set DMX addresses, change curves, and receive status information.

Reinventing power distribution

Now you can send simple switched power to your lighting positions to run all of your LEDs and tungsten loads at the same time. Use your existing distributed data network to control Source Four Dimmers, LEDs and moving lights. This new power-distribution system makes your venue more flexible, with an infrastructure that can adapt to new requirements and layouts.
