

DMXStreamer

DMX512 Real-time

Running a light show, but don't want to leave your lighting desk on site ?

The DMXStreamer is the most valuable DMX512 tool you will find. This product records any DMX512 stream for up to 48 hours. You simply play your lighting sequence and record it with the DMXStreamer. You can then play it back when you need it, or automatically based on time of day with the inbuilt astronomical real time clock.

DMXStreamer

Record, Store & Play !

This unit is great for any architectural work due to the built-in astronomical clock and other advanced scheduling features. Another way to use it as backup for a lighting control system. If problems occur, it can automatically start a predefined show upon loss of DMX signal.

► Features

- **Complete stand-alone operation**
- **Records any full DMX512 stream from any DMX source** lighting console, computer system...
- **Recording time from 15 minutes to 2 days** depending on recording parameters and memory installed
- **Built-in real-time clock** for automatic playback
- **100 playlist entries**
- **Support for playlist seasons**
- **Adjustable recording frame rate** from 10 to 40 frames / second
- **Adjustable number of DMX channels** recorded from 5 to 512
- **Records up to 26 different shows**
- **Shows can be given names**
- **Compatible with DMXPlayBack Remote**

► Hardware

- Sturdy construction fits in 9.5" rack size
- 5-pin DMXIN and DMX OUT
- Backlit LCD display
- Expandable recording memory
- RS232 Control

► Flexibility

The DMXStreamer can be used with the **Compact Flash Expansion Module**, which makes it possible to save shows and setup information onto a standard Compact Flash card up to 2GB.

Back panel with Compact Flash Card
