Presenter's Assistant for Learning

Complete Audio Visual Support In The Classroom!

The Presenter's Assistant for Learning securely stores and easily transports all your electronic components for the classroom, providing simple access for any instructor.

PAL - Presenter's Assistant for Learning

FEATURES & BENEFITS

- A complete presentation station for the classroom, supporting a data projector, document camera, DVD player, audio system, power units, and any type of 19" rack mounted accessories.
- Ideal for use as a mobile gaming cabinet.
- Pull out notebook shelf makes it easy for any instructor to walk up and plug their laptop into the cart for use. And at the end of the class they simply unplug and it is ready for the next one.
- Pull out projector shelf provides easy access to controls and retracts when done to secure inside a locked cabinet.
- Lower 19" rack rails provide 14 unit spacing and includes two accessory shelves for non-rack mounted equipment and additional storage.
- Perforated steel cabinet allows equipment to ventilate. Frame assembly is welded with key locking doors to deter theft of valuable electronics.
- Small foot print and wrap around access door allow PAL to easily be positioned in the middle of a classroom, between rows of students.
- Built in handle and 4" twin wheel swivel casters for easy transportation and storage.
- Dual plate cut-out allows for the installation of an optional data pass through plate that allows easy access to equipment with a laptop without reaching inside the cabinet. Cutout is hidden behind a cover plate when not in use.
