

CAROUSEL & BRIGHTSIGN

Tightrope and BrightSign have teamed up to bring you the ultimate digital signage solution for large out-of-home networks. Combine the powerful features of the Carousel software with the unparalleled performance of BrightSign's XD2 series media players and you've got the most sophisticated digital signage platform that can scale to the largest of deployments.

BrightSign® XD2 SERIES MEDIA PLAYERS

The BrightSign XD2 series media players feature a powerful video engine capable of dual Full HD video decoding, upscaling 1080p video to 4K resolution and simultaneous content playback from local, networked and streaming sources. It also features a hardware-accelerated HTML5 engine and includes advanced networking capabilities which allow synchronization between players for use with video walls.

SOFTWARE FEATURES

MESSAGING TEMPLATES

Create and modify your bulletins with Carousel's powerful template creation tools.

SIMPLE SCHEDULING

Schedule and send individual bulletins or groups of bulletins in a streamlined workflow.

USER ROLES & PERMISSIONS

Manage user roles and permissions from our web-based user interface or Active Directory.

EMERGENCY NOTIFICATIONS

Override your bulletins with emergency bulletins. Push them out from our web-based software, and pull them down with a single click.

SYSTEM STATUS MONITORING

Get system status, monitor player check-ins and view bulletin impression counts all from the web-based user interface.

WEB-BASED USER INTERFACE

No need to install client software. Log in to Carousel from any web browser.

DATA INTEGRATION

Import dynamic content from Facebook, Twitter, blogs (RSS and ATOM feeds), calendars (iCal, MS Exchange, MS Sharepoint, EMS and Resource25) and Carousel Pro Remote Data Adaptor (XML-based command interface).
