

The Vizi BSW 300 is ADJ's most powerful LED Moving Head to date. It uses a specially designed 300W LED engine that offers massive output for most large venues and event productions. It is a great hybrid utility fixture as it acts as a beam, spot and wash all in one fixture. What's more, is it comes in a smaller footprint than most other movers in its class.

The Vizi BSW 300 offers motorized focus, motorized zoom, two 6-facet rotating prisms (one linear & one circular), 2 separate color wheels, 2 GOBO wheels (1 wheel fixed metal & one wheel rotating/replaceable GOBOs). There is a LCD function display on the front panel, with the rear panel offering powerCON In/Out and 3-pin & 5-pin DMX connections.

VIZI BSW 300

Features:

- Hybrid Beam / Spot / Wash Moving Head
- Gobo scroll mode
- LED DMX 4-Button menu system
- Auto X-Y repositioning
