

PT1200

12" Portable Teleprompter Kit

ONE SHEET

Overview

The follow up to the ever-popular PT2500 is Ikan's PT1200. Featuring a custom-designed 12-inch monitor for the perfect balance between viewing distance & portability. The unit is designed around the industry standard 15mm rod system. This allows the whole setup to be more durable and more lightweight.

PT1200

Features you need, Prices you want.

The Teleprompter Evolved

The PT1200 is the most compact full-featured teleprompter we carry. The whole unit breaks apart into 3 main parts, and the glass frame itself folds easily. This allows the teleprompter to pack small and tight.

Extreme Clarity

We include scientific grade, made-in-America, teleprompter glass. You won't have to worry about how the glass will affect your image.

Purpose Built

Other teleprompters include "off-the-shelf" LCD Monitors designed to be used on a desk, attached to your PC. We specifically designed our monitor for use as a teleprompter. The housing is made of metal for durability. The buttons & inputs are laid out for easy access. The screen is sharp & clear.

Fold-able Glass Frame

To make your job easier, we have made the glass frame adjustable. This way, you can adjust it to match your talent's view, and not have to adjust all your other gear. The adjustable frame also makes it easier to pack and travel.

New EV3 Quick Release Baseplate

The PT1200 is equipped with our new EV3 Quick Release Base plate. This allows you to quickly add or remove your camera. It is also adjustable in height to accommodate different sized cameras.

Take it Anywhere Safely

The PT1200 ships in custom-cut high quality foam, so it arrives safely at your door. We designed the dimensions of the foam to perfectly match the SKB Series 1914-* Waterproof Case. Just drop it in, and you're ready to go!
