

C-Plus Haze Fluid

JEM C-Plus Haze Fluid is a water-based haze formula that is specifically designed for use in the JEM Hazer Pro and JEM Compact Hazer Pro. C-Plus Haze fluid is a dense molecular formula that produces very fine haze particles, specially designed to highlight beam and mid-air light effects, projections and lasers. The fluid produces an evenly dispersed atmospheric haze for optimal visual clarity while maintaining a peak refraction index.

Available in 2.5, 5, 9.5, 25, and 220L containers.
