Delvcam - Feature Rich at an Affordable Price!

The DELV-WFORM-7 LED field monitor provides high levels of image accuracy and functionality with HDMI, YPbPr (via BNC), composite video, and advanced camera auxiliary image controls. It features four programmable function buttons for shortcut operation.

The compact size and peaking functionality are the perfect complements to a DSLR camera's features. The DELV-WFORM-7 includes an HDMI-output which allows you to duplicate the video content onto a second monitor - no annoying HDMI splitters required.

The 800:1 contrast ratio produces colors that are rich and vivid. With a stunning 178° viewing angle, you see the same vivid picture from wherever you are standing. The sunshade acts as a screen protector and, when folded, saves space in the camera bag.
