Dear Panasonic Customer

Welcome to the Panasonic family of customers. We hope that you will have many years of enjoyment from your new LCD Display.

To obtain maximum benefit from your set, please read these Instructions before making any adjustments, and retain them for future reference.

Retain your purchase receipt also, and note down the model number and serial number of your set in the space provided on the rear cover of these instructions.

Visit our Panasonic Web Site <http://panasonic.com>

Important Safety Instructions

WARNING
RISK OF ELECTRIC SHOCK
DO NOT OPEN

WARNING: To reduce the risk of electric shock, do not remove cover or back.

No user-serviceable parts inside. Refer servicing to qualified service personnel.

The lightning flash with arrow-head within a triangle is intended to tell the user that parts inside the product are a risk of electric shock to persons.

The exclamation point within a triangle is intended to tell the user that important operating and servicing instructions are in the papers with the appliance.

WARNING:

To prevent damage which may result in fire or shock hazard, do not expose this apparatus to rain or moisture.

Do not place containers with water (flower vase, cups, cosmetics, etc.) above the set. (including on shelves above, etc.)

WARNING:

- 1) To prevent electric shock, do not remove cover. No user serviceable parts inside. Refer servicing to qualified service personnel.
- 2) Do not remove the grounding pin on the power plug. This apparatus is equipped with a three pin grounding-type power plug. This plug will only fit a grounding-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact an electrician.
Do not defeat the purpose of the grounding plug. (65-inch model) only)

- 1) Read these instructions.
- 2) Keep these instructions.
- 3) Heed all warnings.
- 4) Follow all instructions.
- 5) Do not use this apparatus near water.
- 6) Clean only with dry cloth.
- 7) Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
- 8) Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- 9) Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet. (65-inch model) only)
- 10) Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
- 11) Only use attachments / accessories specified by the manufacturer.
- 12) Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart / apparatus combination to avoid injury from tip-over. 
- 13) Unplug this apparatus during lightning storms or when unused for long periods of time.
- 14) Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
- 15) To prevent electric shock, ensure the grounding pin on the AC cord power plug is securely connected. (65-inch model) only)

FCC STATEMENT

This equipment has been tested and found to comply with the limits for a class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

FCC CAUTION:

To assure continued compliance, follow the attached installation instructions and use only the provided power supply cord. Any changes or modifications not expressly approved by Panasonic Corp. of North America could void the user's authority to operate this device.

Declaration of Verification

Model No.

TH-65SF2U, TH-55SF2U, TH-49SF2U, TH-43SF2U

Responsible Party:

Panasonic Corporation of North America

Two Riverfront Plaza, Newark, New Jersey

07102-5490

Contact Source:

Panasonic System Communications Company of North America

1-877-655-2357

General Contact:

<http://shop.panasonic.com/support>

This device complies with Part 15 of the FCC Rules and all applicable IC RSS standards. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CANADIAN NOTICE:

This Class A digital apparatus complies with Canadian ICES-003.

WARNING:

- Not for use in a computer room as defined in the Standard for the Protection of Electronic Computer/ Data Processing Equipment, ANSI/NFPA 75.
- For permanently connected equipment, a readily accessible disconnect device shall be incorporated in the building installation wiring.
- For pluggable equipment, the socket-outlet shall be installed near the equipment and shall be easily accessible.

Note:

Image retention may occur. If you display a still picture for an extended period, the image might remain on the screen. However, it will disappear when a general moving picture is displayed for a while.

Trademark Credits

- Microsoft, Windows and Internet Explorer are the registered trademarks or trademarks of Microsoft Corporation in the United States and/or other countries.
- Macintosh, Mac, Mac OS, OS X and Safari are the trademarks of Apple Inc. registered in the United States and other countries.
- PJLink is a registered or pending trademark in Japan, the United States, and other countries and regions.

Important Safety Notice

WARNING

- 1) To prevent damage which may result in fire or shock hazard, do not expose this appliance to dripping or splashing.
Do not place containers with water (flower vase, cups, cosmetics, etc.) above the set. (including on shelves above, etc.)
No naked flame sources, such as lighted candles, should be placed on / above the set.
- 2) To prevent electric shock, do not remove cover. No user serviceable parts inside. Refer servicing to qualified service personnel.
- 3) Do not remove the earthing pin on the power plug. This apparatus is equipped with a three pin earthing-type power plug. This plug will only fit an earthing-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact an electrician.
Do not defeat the purpose of the earthing plug.
(65-inch model) only
- 4) To prevent electric shock, ensure the earthing pin on the AC cord power plug is securely connected.
(65-inch model) only

CAUTION

This appliance is intended for use in environments which are relatively free of electromagnetic fields.

Using this appliance near sources of strong electromagnetic fields or where electrical noise may overlap with the input signals could cause the picture and sound to wobble or cause interference such as noise to appear.

To avoid the possibility of harm to this appliance, keep it away from sources of strong electromagnetic fields.

WARNING:

This equipment is compliant with Class A of CISPR32. In a residential environment this equipment may cause radio interference.

IMPORTANT INFORMATION

If a display is not positioned in a sufficiently stable location, it can be potentially hazardous due to falling. Many injuries, particularly to children, can be avoided by taking simple precautions such as:

- Using cabinets or stands recommended by the manufacturer of the display.
- Only using furniture that can safely support the display.
- Ensuring the display is not overhanging the edge of the supporting furniture.
- Not placing the display on tall furniture (for example, cupboards or bookcases) without anchoring both the furniture and the display to a suitable support.
- Not standing the displays on cloth or other materials placed between the display and supporting furniture.
- Educating children about the dangers of climbing on furniture to reach the display or its controls.

65-inch model

IMPORTANT: THE MOULDED PLUG FOR YOUR SAFETY, PLEASE READ THE FOLLOWING TEXT CAREFULLY.

This display is supplied with a moulded three pin mains plug for your safety and convenience. A 10 amp fuse is fitted in this plug. Shall the fuse need to be replaced, please ensure that the replacement fuse has a rating of 10 amps and that it is approved by ASTA or BSI to BS1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover, you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local Panasonic dealer. Do not cut off the mains plug.

Do not use any other type of mains lead except the one supplied with this display.

The supplied mains lead and moulded plug are designed to be used with this display to avoid interference and for your safety.

If the socket outlet in your home is not suitable, get it changed by a qualified electrician.

If the plug or mains lead becomes damaged, purchase a replacement from an authorized dealer.

WARNING : — THIS DISPLAY MUST BE EARTHED

How to replace the fuse.

Open the fuse compartment with a screwdriver and replace the fuse.

55-inch model

49-inch model

43-inch model

IMPORTANT: THE MOULDED PLUG FOR YOUR SAFETY, PLEASE READ THE FOLLOWING TEXT CAREFULLY.

This display is supplied with a moulded three pin mains plug for your safety and convenience. A 5 amp fuse is fitted in this plug. Shall the fuse need to be replaced, please ensure that the replacement fuse has a rating of 5 amps and that it is approved by ASTA or BSI to BS1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover, you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local Panasonic dealer. Do not cut off the mains plug.

Do not use any other type of mains lead except the one supplied with this display.

The supplied mains lead and moulded plug are designed to be used with this display to avoid interference and for your safety.

If the socket outlet in your home is not suitable, get it changed by a qualified electrician.

If the plug or mains lead becomes damaged, purchase a replacement from an authorized dealer.

How to replace the fuse.

Open the fuse compartment with a screwdriver and replace the fuse.

Safety Precautions

WARNING

■ Setup

This LCD Display is for use only with the following optional accessories.

Use with any other type of optional accessories may cause instability which could result in the possibility of injury.

Securely install the pedestal, an optional accessory. Ask an authorized dealer for installation.

- Pedestal

65-inch model

55-inch model

TY-ST55PE9

49-inch model

43-inch model

TY-ST43PE9

- Digital Interface Box
ET-YFB100
- DIGITAL LINK Switcher
ET-YFB200
- Early Warning Software
ET-SWA100 series*1
- Video Wall Manager
TY-VUK10*2

*1: Suffix of the part number may differ depending on the license type.

*2: Supports Ver1.7 or later.

Note

- The part number of the optional accessories are subject to change without notice.

When installing the pedestal, read the operating instructions supplied with it carefully and install properly. Also, always use the overturn prevention accessories.

We are not responsible for any product damage, etc. caused by failures in the installation environment for the pedestal or wall-hanging bracket even during the warranty period.

Small parts can present choking hazard if accidentally swallowed. Keep small parts away from young children. Discard unneeded small parts and other objects, including packaging materials and plastic bags/sheets to prevent them from being played with by young children, creating the potential risk of suffocation.

Do not place the Display on sloped or unstable surfaces, and ensure that the Display does not hang over the edge of the base.

- The Display may fall off or tip over.

Install this unit at a location with minimal vibration and which can support the weight of the unit.

- Dropping or falling of the unit may cause injury or malfunction.

Do not place any objects on top of the Display.

Transport only in upright position!

- Transporting the unit with its liquid crystal panel facing upright or downward may cause damage to the internal circuitry.

Ventilation should not be impeded by covering the ventilation openings with items such as newspapers, table cloths and curtains.

For sufficient ventilation, see page 11.

Caution - For use only with UL Listed Wall Mount Bracket with minimum weight/load 29.8 kg (65.7 lbs).

When installing the Display vertically, be sure that the Power Indicator comes to the upper side.

- Heat is generated and it may cause fire or damage to the Display.

Cautions for Wall or Pedestal Installation

- The installation should be performed by an installation professional. Installing the Display incorrectly may lead to an accident that results in death or serious injury. Use the optional Pedestal. (see page 8)
- When installing on a wall, a wall hanging bracket that conforms to VESA standards must be used.

65-inch model

55-inch model

49-inch model

43-inch model

VESA 400 × 400

(see page 11)

- Before installation, be sure to check if the mounting location has enough strength to support the weight of the LCD display and the wall hanging bracket for anti drop.
- If you terminate the use of the Display on the Wall or Pedestal, ask a professional to remove the Display as soon as possible.
- When mounting the Display on the wall, prevent the mounting screws and power cable from contacting metal objects inside the wall. An electric shock may occur if they contact metal objects inside the wall.

Do not place the display where it may be affected by salt or corrosive gas.

- Doing so may cause the display to fall due to corrosion. Also, the unit may malfunction.

Do not install the product to a place where the product is exposed to direct sunlight.

- If the unit is exposed to direct sunlight even indoors, the temperature rise of the liquid crystal panel may cause malfunction.

■ When using the LCD Display

The Display is designed to operate on 110 - 127 or 220 - 240 V AC, 50/60 Hz.

Do not cover the ventilation holes.

- Doing so may cause the Display to overheat, which can cause fire or damage to the Display.

Do not stick any foreign objects into the Display.

- Do not insert any metal or flammable objects into the ventilations holes or drop them onto the Display, as doing so can cause fire or electric shock.

Do not remove the cover or modify it in any way.

- High voltages which can cause severe electric shocks are present inside the Display. For any inspection, adjustment and repair work, please contact your local Panasonic dealer.

Ensure that the mains plug is easily accessible.

The mains plug shall be connected to a mains socket outlet with a protective earthing connection.

(65-inch model) only)

Do not use any power supply cord other than that provided with this unit.

- Doing so may cause short-circuit, generates heat, etc., which could cause electric shock or fire.

Do not use the supplied power supply cord with any other devices.

- Doing so could cause electric shock or fire.

Securely insert the power supply plug as far as it will go.

- If the plug is not fully inserted, heat may be generated which could cause fire. If the plug is damaged or the wall socket is loose, they shall not be used.

Do not handle the power supply plug with wet hands.

- Doing so may cause electric shocks.

Do not do anything that may damage the power cable. When disconnecting the power cable, pull on the plug body, not the cable.

- Do not damage the cable, make any modifications to it, place heavy objects on top of it, heat it, place it near any hot objects, twist it, bend it excessively or pull it. To do so may cause fire and electric shock. If the power cable is damaged, have it repaired at your local Panasonic dealer.

Do not touch the power supply cord or the plug directly by hand when they are damaged.

- Electric shock could occur.

Do not remove covers and NEVER modify the Display yourself

- Do not remove the rear cover as live parts are accessible when it is removed. There are no user serviceable parts inside. (High-voltage components may cause serious electrical shock.)
- Have the Display checked, adjusted, or repaired at your local Panasonic dealer.

Keep the AAA/R03/LR03 batteries (supplied) out of reach of children. If accidentally swallowed, it will be harmful to the body.

- Please contact a doctor immediately in case you doubt that the child may have swallowed it.

If the Display is not going to be used for any prolonged length of time, unplug the power supply plug from the wall outlet.

Picture noise may occur if you connect / disconnect the cables connected to the input terminals you are currently not watching, or if you turn the power of the video equipment on / off, but it is not a malfunction.

To prevent the spread of fire, keep candles or other open flames away from this product at all times.

CAUTION

If problems or malfunction occur, stop using immediately.

■ **If problems occur, unplug the power supply plug.**

- Smoke or an abnormal odour come out from the unit.
- No picture appears or no sound is heard, occasionally.
- Liquid such as water or foreign objects got inside the unit.
- The unit has deformed or broken parts.

If you continue to use the unit in this condition, it could result in fire or electric shock.

- Turn the power off immediately, unplug the power supply plug from the wall outlet, and then contact the dealer for repairs.
- To cut off the power supply to this Display completely, you need to unplug the power supply plug from the wall outlet.
- Repairing the unit yourself is dangerous, and shall never be done.
- To enable to unplug the power supply plug immediately, use the wall outlet which you can reach easily.

■ **Do not touch the unit directly by hand when it is damaged.**

Electric shock could occur.

■ **When using the LCD Display**

At least 2 people are required to carry or unpack this unit.

- If this is not observed, the unit may drop, resulting in injury.

Be sure to disconnect all cables and overturn prevention accessories before moving the Display.

- If the Display is moved while some of the cables are still connected, the cables may become damaged, and fire or electric shock could result.

Disconnect the power supply plug from the wall socket as a safety precaution before carrying out any cleaning.

- Electric shocks can result if this is not done.

Clean the power cable regularly to prevent it becoming dusty.

- If dust built up on the power cord plug, the resultant humidity can damage the insulation, which could result in fire. Pull the power cord plug out from the wall outlet and wipe the mains lead with a dry cloth.

Do not step on, or hang from the display or the Pedestal.

- They might tip over, or might be broken and it may result in injury. Pay special attention to the children.

Do not reverse the polarity (+ and -) of the battery when inserting.

- Mishandling the battery may cause its explosion or leakage, resulting in fire, injury or damage to surrounding properties.
- Insert the battery correctly as instructed. (see page 14)

Do not use batteries with the outer cover peeling away or removed.

(The outer cover is attached to the battery for safety. It must not be removed. Doing so may cause short circuits.)

- Mishandling the batteries may cause the batteries to short circuit, resulting in fire, injury or damage to surrounding properties.

Remove the batteries from the remote control transmitter when not using for a long period of time.

- The battery may leak, heat, ignite or burst, resulting in fire or damage to surrounding properties.

Do not burn or breakup batteries.

- Batteries must not be exposed to excessive heat such as sunshine, fire or the like.

Do not turn the Display upside down.

Do not position the unit with its liquid crystal panel facing upright.

Precautions for use

Cautions when installing

Do not set up the Display outdoors.

- The Display is designed for indoor use.

Install this unit at a location which can support the weight of the unit.

- Use the installation bracket that conforms to VESA standards

Environmental temperature to use this unit

- When using the unit where it is below 1 400 m (4 593 ft) above sea level: 0 °C to 40 °C (32 °F to 104 °F)
- When using the unit at high altitudes (1 400 m (4 593 ft) and higher and below 2 800 m (9 186 ft) above sea level): 0 °C to 35 °C (32 °F to 95 °F)

Do not install the unit where it is 2 800 m (9 186 ft) and higher above sea level.

- Failure to do so may shorten the life of the internal parts and result in malfunctions.

We are not responsible for any product damage, etc. caused by failures in the installation environment even during the warranty period.

Required space for ventilation

- When using the pedestal, leave a space of 10 cm (3 15/16") or more at the top, left and right, and 5 cm (1 31/32") or more at the rear, and also keep the space between the bottom of the display and the floor surface.

If using some other setting-up method (wall-hanging, etc.), follow the manual of it. (If there is no specific indication of installation dimension in the installation manual, leave a space of 10 cm (3 15/16") or more at the top, bottom, left and right, and 5 cm (1 31/32") or more at the rear.)

Minimum distance:

- Operation of this unit is guaranteed up to an ambient temperature of 40 °C (104 °F). When installing the unit in a case or chassis, be sure to provide adequate ventilation with a cooling fan or ventilation hole so that the surrounding temperature (inside the case or chassis) including the temperature of the front surface of the liquid crystal panel can be kept at 40 °C (104 °F) or less.

About the screws used when using a wall hanging bracket that conforms to VESA standards

65-inch model

55-inch model

49-inch model

43-inch model

Screw pitch for installation	Depth of screw hole	Screw (quantity)
400 mm × 400 mm	10 mm	M6 (4)

Be careful of the movable structure of the power indicator and remote control sensor.

- As factory default, the power indicator and remote control sensor are stored in the main unit. For normal use, pull out the remote control sensor from the edge side of the main unit by operating the lever on the rear panel. Depending on the setup condition such as when using the multi display, store the remote control sensor in the main unit. (see page 28)

Do not grab the liquid crystal panel.

- Do not forcibly press the liquid crystal panel, or push it with a pointed object. Applying a strong force to the liquid crystal panel will cause unevenness of the screen display, resulting in malfunction.

Depending on the temperature or humidity conditions, uneven brightness may be observed. This is not a malfunction.

- This unevenness will disappear while applying current continuously. If not, consult the distributor.

Notes on Using Wired LAN

When setting up the Display at a place, where electric static occurs often, take a sufficient antistatic measure before start using.

- When the Display is used at a location, where static electricity occurs often, such as on a carpet, a wired LAN or DIGITAL LINK communication is disconnected more often. In that case, remove static electricity and the noise source that may cause problems with an antistatic mat, and re-connect the wired LAN or DIGITAL LINK.
- In rare cases, the LAN connection is disabled due to static electricity or noise. In that case, turn off the power of the Display and the connected devices once and then re-turn on the power.

The Display may not work properly due to strong radio wave from the broadcast station or the radio.

- If there is any facility or equipment, which outputs strong radio wave, near the installation location, set up the Display at a location sufficiently far from the source of the radio wave. Or, wrap the LAN cable connected to the DIGITAL LINK / LAN terminal by using a piece of metal foil or a metal pipe, of which is grounded at both ends.

Request Regarding Security

When using this product, take safety measures against the following incidents.

- Personal information being leaked via this product
- Unauthorized operation of this product by a malicious third party
- Interfering or stopping of this product by a malicious third party

Take sufficient security measures. (see page 87, 88)

- Set a password for the LAN control and restrict the users who can log in.
- Make your password difficult to guess as much as possible.
- Change your password periodically.
- Panasonic Corporation or its affiliate companies will never ask for your password directly. Do not divulge your password in case you receive such inquiries.
- The connecting network must be secured by a firewall, etc.
- When disposing the product, initialize the data before disposing. [Shipping] (see page 119)

Cleaning and maintenance

First, remove the mains plug from the mains socket.

Gently wipe the surface of the liquid crystal panel or cabinet by using a soft cloth to remove dirt.

- To remove stubborn dirt or fingerprints on the surface of the liquid crystal panel, dampen a cloth with diluted neutral detergent (1 part detergent to 100 parts water), wring out the cloth firmly, and then wipe away the dirt. Finally, wipe away all the moisture with a dry cloth.
- If water droplets get inside the unit, operating problems may result.

Note

- The surface of the liquid crystal panel is specially treated. Do not use a hard cloth or rub the surface too hard, otherwise this may cause scratches on the surface.

Usage of a chemical cloth

- Do not use a chemical cloth for the liquid crystal panel surface.
- Follow the instructions for the chemical cloth to use it for the cabinet.

Avoid contact with volatile substances such as insect sprays, solvents and thinner.

- This may degrade surface quality or cause peeling of the paint. Furthermore, do not leave it in contact with a rubber or PVC substance for a long time.

Disposal

When disposing the product, ask your local authority or dealer about the correct methods of disposal.

TH-49SF2E

TH-43SF2E

(Approx. 1.8 m)

- TZSH03039

- TZSH03040

Attention

- Store small parts in an appropriate manner, and keep them away from young children.
- The part numbers of accessories are subject to change without notice. (The actual part number may differ from the ones shown above.)
- In case you lost accessories, please purchase them from your dealer. (Available from the customer service)
- Dispose the packaging materials appropriately after taking out the items.

Remote Control Batteries

1. Pull and hold the hook, then open the battery cover.

2. Insert batteries - note correct polarity (+ and -).

AAA/R03/LR03 type

3. Replace the cover.

Helpful Hint

- For frequent remote control users, replace old batteries with Alkaline batteries for longer life.

Precaution on battery use

Incorrect installation of the batteries can cause battery leakage and corrosion that will damage the remote control transmitter.

Disposal of batteries should be in an environment-friendly manner.

Observe the following precaution:

1. Batteries shall always be replaced as a pair. Always use new batteries when replacing the old set.
2. Do not combine a used battery with a new one.
3. Do not mix battery types (example: "Zinc Carbon" with "Alkaline").
4. Do not attempt to charge, short-circuit, disassemble, heat or burn used batteries.
5. Battery replacement is necessary when remote control acts sporadically or stops operating the Display set.
6. Do not burn or breakup batteries.
7. Batteries must not be exposed to excessive heat such as sunshine, fire or the like.

Kensington security

The security slot of this unit is compatible with the Kensington security slot.

65-inch model

55-inch model

49-inch model

43-inch model

Connections

AC cord connection and fixing / Cable fixing

65-inch model

Back of the unit

AC cord fixing

AC cord (supplied)

Plug the connector into the display unit.

Plug the connector until it clicks.

Note

- Make sure that the connector is locked on both the left and right sides.

Unplug the AC cord

Unplug the connector pressing the two knobs.

Note

- When disconnecting the AC cord, be absolutely sure to disconnect the AC cord plug at the socket outlet first.
- The supplied AC cord is for this unit exclusive use. Do not use this for other purposes.

Cable fixing

Note

- 3 clampers are supplied with this unit. Fix the cables at 3 locations using the holes for clampers as shown below.

If you need more clampers, purchase them from your dealer. (Available from the customer service)

1. Attach the clumper

To remove from the unit:

2. Bundle the cables

To loosen:

55-inch model

49-inch model

43-inch model

Class II equipment

Back of the unit

Insert the AC cord all the way until fully seated to the back side of the unit.

Insert the plug until the lines inside are not visible.

Note

- When disconnecting the AC cord, be absolutely sure to disconnect the AC cord plug at the socket outlet first.
- The supplied AC cord is for this unit exclusive use. Do not use this for other purposes.

Cable fixing

Note

- 3 clampers (large: 2, small: 1) are supplied with this unit. Fix the cables using clampers (Fixation type) appropriate for each cable as shown below.

If you need more clampers, purchase them from your dealer. (Available from the customer service)

Attaching positions of the clampers

- 1 For AC cord: clamber (small)
- 2 For signal cable: clamber (large) × 2

1. Attach the clamber

Note

- Wipe off dirt, such as dust, water and oil on the attachment surface, and affix the clamber on the attachment surface by pushing it firmly.
- Once the clamber is affixed, it cannot be reused. Be sure to confirm the attaching position before affixing it.

Remove the tape at the back, and affix the clamber on the flat surface.

2. Bundle the cables

Pass the tip of the band to the hooks. Then pull and hook it on the knob.

To loosen:

Remove the band from the knob, and pull out the band tip.

Video equipment connection

*1: TH-65SF2E

*2: TH-65SF2U, TH-55SF2U, TH-49SF2U, TH-43SF2U, TH-55SF2E, TH-49SF2E, TH-43SF2E

1 IR IN, IR OUT:	Infrared Signal Input / Output Terminal Use this when operating more than one display with one remote control. (see page 25)
2 SERIAL IN, SERIAL OUT:	SERIAL Input / Output Terminal Control the Display by connecting to PC. (see page 23)
3 AUDIO OUT:	Analogue Audio Output Terminal Connect to audio equipment with analogue audio input terminal. (see page 26)
4 AV IN:	Composite Video / Audio Input Terminal Connect to video equipment with Composite signal output. Audio input is shared by AV IN, DVI-D IN and PC IN. (see page 22)
5 USB:	USB Terminal Connect the USB memory to use "USB media player" or "Memory viewer". Also, this can be used to supply power of up to 5V/1A to an external device when the picture is displayed. (see page 26)
6 DVI-D IN, DVI-D OUT:	DVI-D Input / Output Terminal Connect to video equipment with DVI-D output. Also, when displaying the picture by daisy chaining multiple displays, connect to the other display (DVI-D OUT). The DVI-D output function is enabled only for the DVI input. Note this is not output if the HDMI or DIGITAL LINK input is selected. (see page 19)
7 AV IN (HDMI 1, HDMI 2):	HDMI Input Terminal Connect to video equipment such as VCR or DVD player, etc. (see page 18)
8 DIGITAL LINK / LAN:	DIGITAL LINK / LAN Terminal Control the Display by connecting to Network. Alternatively, connect to a device that sends video and audio signals via the DIGITAL LINK terminal. (see page 22, 78)
9 PC IN:	PC Input Terminal Connect to video terminal of PC, video equipment with "YPbPr / YCbCr" or "RGB" output. (see page 21)
10 LAN:	LAN Terminal Control the Display by connecting to Network. (see page 78)

Before connecting

- Before connecting cables, carefully read the operating instructions for the external device to be connected.
- Turn off the power of all devices before connecting cables.
- Take note of the following points before connecting the cables. Failure to do so may result in malfunctions.
 - When connecting a cable to the unit or a device connected to the unit itself, touch any nearby metallic objects to eliminate static electricity from your body before performing work.
 - Do not use unnecessarily long cables to connect a device to the unit or to the unit body. The longer the cable, the more susceptible to noise it becomes. Since using a cable while it is wound makes it act like an antenna, it is more susceptible to noise.
 - When connecting cables, insert them straight into the connecting terminal of the connecting device so that the ground is connected first.
- Acquire any cable necessary to connect the external device to the system that is neither supplied with the device nor available as an option.
- If the outer shape of the plug of a connection cable is large, it may come in contact with the periphery such as a back cover or the plug of an adjacent connection cable. Use a connection cable with the suitable plug size for the terminal alignment.
- When connecting the LAN cable with plug cover, be aware that the cover may come in contact with the back cover and it may be difficult to disconnect.
- If video signals from video equipment contain too much jitter, the images on the screen may wobble. In this case, a time base corrector (TBC) must be connected.
- When the sync signals output from PC or video equipment are disturbed, for example, when changing settings of video output, the colour of the video may be disturbed temporarily.
- The unit accepts Composite video signals, YCbCr/YPbPr signals (PC IN), analogue RGB signals (PC IN) and digital signals.
- Some PC models are not compatible with the unit.
- Use cable compensator when you connect devices to the unit using long cables. Otherwise the image may not display properly.
- Refer to “Preset Signals” (see page 117) for the types of video signals that can be displayed with the unit.

HDMI 1 and HDMI 2 terminals connection

Note

- Video equipment and HDMI cable shown are not supplied with this unit.
- Some HDMI equipment may not be able to display picture.
- This Display does not support VIERA LINK.
- For audio, it is also possible to use AV IN terminal input. (For [Audio input select] function, see page 72.)

- 1 HDMI cable (commercially available)
- 2 Video Cassette Recorder
- 3 DVD Player
- 4 PC

Pin assignments and signal names for HDMI Terminal

Pin No.	Signal name
①	T.M.D.S Data2+
②	T.M.D.S Data2 Shield
③	T.M.D.S Data2-
④	T.M.D.S Data1+
⑤	T.M.D.S Data1 Shield
⑥	T.M.D.S Data1-
⑦	T.M.D.S Data0+
⑧	T.M.D.S Data0 Shield
⑨	T.M.D.S Data0-
⑩	T.M.D.S Clock+
⑪	T.M.D.S Clock Shield
⑫	T.M.D.S Clock-
⑬	CEC
⑭	_____
⑮	SCL
⑯	SDA
⑰	DDC/CEC Ground
⑱	+5V DC
⑲	Hot Plug Detect

DVI-D IN / DVI-D OUT terminal connection

Note

- Video equipment and cables shown are not supplied with this unit.
- Use the DVI-D cable complying with the DVI standard. Image deterioration may occur depending on the length or the quality of the cable.
- DVI-D IN terminal is for Single Link only.
- Audio input is shared with AV IN terminal.

- ① DVI-D video cable (Within 5 m) (commercially available)
- ② Stereo mini plug (M3) cable (commercially available)
- ③ PC with DVI-D video out

Daisy chain connection

It is possible to daisy chain multiple displays when displaying the picture on multi screen, etc.

- 1 First display
- 2 Second display
- 3 Third display

Note

- It is possible to daisy chain up to 10 displays. However, the number of connectable displays may be limited depending on the cables, signals, the devices used, etc.
- When inputting HDCP signal, it is possible to daisy chain up to 8 displays.
- The DVI-D output function is enabled only for the DVI-D input.

This is not output if the HDMI or DIGITAL LINK input is selected. When using the daisy-chain connection method, all the displays should be in the state where the picture is displayed via DVI-D IN.

Pin assignments and signal names for DVI-D Input/Output

Pin No.	Signal Name
1	T.M.D.S. data 2-
2	T.M.D.S. data 2+
3	T.M.D.S. data 2 shield

PC IN terminal connection

- ① Mini D-sub 15p cable (commercially available)
- ② Conversion adapter (if necessary) (commercially available)
- ③ Stereo mini plug (M3) cable (commercially available)
- ④ PC

The type of computer signal that can be connected

- With regard to the typical PC input signals that are described in "Preset Signals" (see page 117), adjustment values such as for the standard picture positions and sizes have already been stored in this unit.
(Computer signals which can be input are those with a horizontal scanning frequency of 30 to 110 kHz and vertical scanning frequency of 48 to 120 Hz.)
- The display resolution is a maximum of 1 440 x 1 080 dots when the aspect mode is set to [4:3], and 1 920 x 1 080 dots when the aspect mode is set to [16:9]. If the display resolution exceeds these maximums, it may not be possible to show fine detail with sufficient clarity.
- In [ENGLISH(US)] OSD language, [16:9] is displayed as [FULL].

Note

- The PC IN terminal is DDC2B-compatible. If the computer being connected is not DDC2B-compatible, you will need to make setting changes to the computer at the time of connection.
- There is no need to use an adapter for computers with DOS/V compatible Mini D-sub 15P terminal.
- Additional computer, cables and conversion adapter shown are not supplied with this set.

- Do not set the horizontal and vertical scanning frequencies for PC signals which are above or below the specified frequency range.
- Component Input is possible with the pin 1, 2, 3 of the Mini D-sub 15P Connector.
- Change the [Component/RGB-in select] setting in the [Signal] menu to [Component] (when Component signal connection) or [RGB] (when RGB signal connection). (see page 48)
- Audio input is shared with AV IN terminal.

Pin assignments and signal names for PC Input Terminal (Mini D-sub 15P)

Pin No.	Signal Name
①	R (P _R /C _R)
②	G (Y)
③	B (P _B /C _B)
④	NC (not connected)
⑤	GND (Ground)
⑥	GND (Ground)
⑦	GND (Ground)
⑧	GND (Ground)
⑨	+5 V DC
⑩	GND (Ground)
⑪	NC (not connected)
⑫	SDA
⑬	HD/SYNC
⑭	VD
⑮	SCL

AV IN terminal connection

Note

- Video equipment and connection cables are not supplied with this unit.

- 4-pole mini plug conversion cable (supplied)
- Audio video pin cable (commercially available)
- Video Cassette Recorder
- DVD Player

Wiring specifications for 4-pole mini plug

Note

- Use a 4-pole mini plug (M3) (supplied) with the following wiring specifications for the AV IN terminal of this unit. If the wiring of a plug is different, audio and video are not correctly input.

①	Audio L (White)
②	Audio R (Red)
③	GND (Ground)
④	Video (Yellow)

DIGITAL LINK terminal connection

* DIGITAL LINK is for TH-65SF2E only.

Twisted pair cable transmitters such as the Panasonic Digital Interface Box (ET-YFB100G) or the DIGITAL LINK Switcher (ET-YFB200G) use twisted pair cables to transmit inputted video and audio signals, and these digital signals can be input to the Display via the DIGITAL LINK terminal.

- PC to control the unit
- Example: Panasonic ET-YFB100G
- PC
- Video Cassette Recorder
- DVD Player

Note

- Video equipment and connection cables are not supplied with this unit.
- When connecting with DIGITAL LINK, be sure to configure each of the [Network settings] settings. (see page 59)

For the cautions for DIGITAL LINK setting and connection, refer to “DIGITAL LINK Terminal connection” and “Precautions for use while connecting with a twisted pair cable transmitter”. (see page 79)

- Corresponding signal for DIGITAL LINK input is the same as that of HDMI input. (see page 117)
- For audio, it is also possible to use AV IN terminal input. (For [Audio input select] function, see page 72.)

SERIAL IN / SERIAL OUT terminal connection

The SERIAL terminal conforms to the RS-232C interface specification, so that the Display can be controlled by a computer which is connected to this terminal.

Note

- Additional computer and cables shown are not supplied with this set.

① RS-232C Straight cable (commercially available)

② PC

Note

- Use the RS-232C straight cable to connect the computer to the Display.

Pin assignments and signal names for SERIAL Terminal

Pin No.	Signal Name	
①	NC (not connected)	
②	RXD	
③	TXD	
④	Non use	
⑤	GND (Ground)	
⑥	Non use	
⑦	RTS] Shorted in this set
⑧	CTS	
⑨	NC (not connected)	

These signal names are those of computer specifications.

Communication parameters

- Signal level: RS-232C compliant
- Synchronization method: Asynchronous
- Baud rate: 9600 bps
- Parity: None
- Character length: 8 bits
- Stop bit: 1 bit
- Flow control: None

Basic format for control data

The transmission of control data from the computer starts with a STX signal, followed by the command, the parameters, and lastly an ETX signal in that order. If there are no parameters, then the parameter signal does not need to be sent.

Command

Command	Parameter	Control details
PON	None	Power ON
POF	None	Power OFF
AVL	***	Volume 000 – 100
AMT	0	Audio MUTE OFF
	1	Audio MUTE ON
IMS	None	Input select (toggle)
	HM1	HDMI 1 input (HDMI1)
	HM2	HDMI 2 input (HDMI2)
	DL1	DIGITAL LINK input (DIGITAL LINK)
	DV1	DVI-D IN input (DVI-D)
	PC1	PC IN input (PC)
	VD1	AV IN input (VIDEO)
	UD1	USB input (USB)
	MV1	“Memory viewer” input (MEMORY VIEWER)
	DAM	None
ZOOM		Zoom1
FULL		16:9
NORM		4:3
ZOM2		Zoom2

Note

- If multiple commands are transmitted, be sure to wait for the response for the first command to come from this unit before sending the next command.
- If an incorrect command is sent by mistake, this unit will send an “ER401” command back to the computer.
- When sending a command which does not require parameter, a colon (:) is not needed.
- Consult your local Panasonic dealer for detail instructions on command usage.

For more details, visit the following web site.

<https://panasonic.net/cns/prodisplays/>

It is possible to daisy chain multiple displays, and then control the specific display with PC.

- ① First display
- ② Second display
- ③ Third display

Note

- When daisy chaining, set [Options] - [Serial daisy chain position]. (see page 75)
- When daisy chaining, use a straight cable which pin No. ② to ④ are hard wired.

IR IN/IR OUT terminal connection

Connect the mini plug (M3) cable from the IR OUT terminal of the first display to the IR IN terminal of the second display.

The infrared signal of the first display is sent to the second display.

In this case, the IR (infrared ray reception on the remote control sensor) on the second display does not operate.

Repeating the above connections enables the daisy chain connection.

Note

- Connection cables are not supplied with this unit.
- Daisy chain connection is possible only between the displays of the same series.

- ① Stereo mini plug (M3) cable (commercially available)
- ② First display
- ③ Second display
- ④ Third display

AUDIO OUT terminal connection

Note

- Audio equipment and the cable shown are not supplied with this set.

1 Stereo audio cable (commercially available)

2 Audio equipment

Note

- To output sound from AUDIO OUT terminal of the unit, be sure to set [Output select] in the [Sound] menu to [AUDIO OUT]. (see page 40)

USB terminal connection

Connect the USB memory (commercially available) to use "USB media player" or "Memory viewer". (see page 94, 104)

Also, power is supplied when a separately sold stick PC, etc. are connected.

Note

- A stick PC and connection cables are not supplied with this unit.

1 Stick PC

2 USB cable (commercially available)

3 HDMI extension cable (commercially available)

Pin assignments and signal names for USB Terminal

Pin No.	Signal name
①	+5 V DC
②	DATA -
③	DATA +
④	GND (Ground)

Power of up to 5V/1A can be supplied to an external device when the picture is displayed.

- If the electric current exceeding the power supplying capability is applied, the output is blocked, and the following message is displayed.

[USB DC5V OUT overload. Please remove cable or equipment, then turn the display off/on.]

In this case, remove the equipment and then turn the power off/on using the remote control, etc.

Note

- If the direct connection to this unit is not possible due to the size of a stick PC, etc. use a commercially sold extension cable.
- Depending on the type of a USB memory device, it may come in contact with the periphery such as a back cover, and cannot be attached. Use a commercially sold extension cable, or use a small type of a USB memory device connectable to this unit.
- Depending on the USB memory, the access lamp may remain blinking even when it is not being accessed. In this case, remove the device after switching to the input other than [USB] or [MEMORY VIEWER].

Also, when reading the user image, remove the device after the menu screen display finishes (see page 47). When performing the data cloning, remove the device after the completion screen is displayed. (see page 110)

■ Caution on handling and storing the USB memory

- Do not put USB memory or its cap within close reach of children. Swallowing it may cause suffocation.
- If the smoke or questionable odour rises, remove the USB memory from the equipment and contact the manufacturer.
- Do not put water, chemical or oil to the USB memory. It may cause short out or fire.
- Do not put foreign objects or put metal objects to the USB terminal. Static electricity may cause data loss or data corruption.
- Do not remove the USB memory from the computer or the display while the USB memory is reading out or writing the data. It may cause data loss or data corruption.
- Do not store the USB memory in hot, humid or dusty place or near magnetized items.

Identifying Controls

Main unit

- Slide the lever on the rear panel to eject the power indicator and remote control sensor.
To store them, slide the same lever, or directly push in the bottom surface of the remote control sensor.

Note

- For normal use, pull out the power indicator and remote control sensor from the edge side of the main unit by operating the lever on the rear panel. Depending on the setup condition such as when using the multi display, store them in the main unit.

1 Power Indicator / Remote control sensor

The Power Indicator will light.

When the power of the unit is ON (Main Power On / Off button: ON)

- Picture is displayed: Green
- Power OFF (standby) with remote control:
 - When [Network control] is set to [Off]: Red
 - When [Network control] is set to [On]: Orange (Red/Green)

About [Network control] settings, see page 59.

- Power OFF with "Power management" function: Orange (Red/Green)
About "Power management" function, see page 51.

When the power of the unit is OFF (Main Power On / Off button: OFF): No light

Note

- Even if the display unit is turned off with the power indicator off, some of the circuits are in power-on status.
- When the power indicator is orange, power consumption during standby is generally larger than that of when the power indicator is red.

1 External Input Terminal

Connects to video equipment, PC, etc. (see page 17)

2 <Main Power On / Off button>

Turns the power On / Off.

3 <INPUT (Unit)>

Selects the connected device. (see page 31)

4 <MENU (Unit)>

Displays the menu screen. (see page 36)

5 <+ (Unit)> / <- (Unit)>

Adjusts the volume. (see page 32)

On the main screen, switches settings or adjusts settings level. (see page 36)

6 <▲ (Unit)> / <▼ (Unit)>

Selects the setting item on menu screen. (see page 36)

7 <ENTER (Unit)>

Configures the item on menu screen. (see page 36)

Switches aspect mode. (see page 34)

8 Built-in speakers

65-inch model

Sound is output upward.

55-inch model

49-inch model

43-inch model

Sound is output backward.

Note

- To output sound from the built-in speakers of the unit, be sure to set [Output select] in the [Sound] menu to [SPEAKERS]. (see page 40)

Remote Control Transmitter

1 Standby (ON/OFF) button (⏻/⏻)

- Turns the power on or off when the Display is turned on at the <Main Power On / Off button>. (see page 30)

2 POSITION

(see page 38)

3 SETUP

(see page 47)

4 ENTER / Cursor buttons (▲▼◀▶)

- Used to operate the menu screens. (see page 36)

5 ZOOM

Enters the digital zoom mode. (see page 35)

6 DEFAULT

- Resets the settings of picture, sound, etc., to defaults. (see page 38, 40, 41)

7 MUTE

- Sound mute on / off. (see page 33)

8 ASPECT

- Adjusts the aspect. (see page 34)

9 VOL + / VOL -

- Adjusts sound volume level. (see page 32)

10 AUTO SETUP

- Automatically adjusts the position/size of the screen. (see page 38)

11 INPUT

- Switches input to display on the screen. (see page 31)

12 PICTURE

(see page 41)

13 SOUND

(see page 40)

14 RECALL

- Displays the current setting status of Input mode, Aspect mode, etc. (see page 32)

15 RETURN

- Used to return to the previous menu. (see page 36)

16 FUNCTION

- Displays [Function button guide]. (see page 64)

17 OFF TIMER

- Switches to stand-by after a fixed period. (see page 33)

18 Numeric buttons (1 - 6)

- Used as shortcut buttons by assigning frequently used operations. (see page 64)

19 Signal emission

Note

- In this manual, buttons of the remote control and the unit are indicated as < >.

(Example: <INPUT>.)

The operation is mainly explained indicating the remote control buttons but you can also operate with the buttons on the unit when there are the same buttons.

Basic Controls

Operate pointing the remote control directly at the unit's Remote Control Sensor.

Note

- For normal use, pull out the remote control sensor from the edge side of the main unit by operating the lever on the rear panel. (see page 28)
- Do not put an obstacle between the remote control sensor of the main unit and the remote control.
- Operate the remote control in front of the remote control sensor or from the area where the sensor can be seen.
- When directly aiming the remote control at the remote control sensor of the main unit, the distance from the front of remote control sensor should be approx. 7 m or less. Depending on the angle, the operation distance may be shorter.
- Do not subject the remote control sensor of the main unit to the direct sunlight or strong fluorescent light.

1 Connect the AC cord plug to the Display.

(see page 15)

2 Connect the plug to the socket outlet.

Note

- Main plug types vary between countries. The power plug shown at left may, therefore, not be the type fitted to your set.
- When disconnecting the AC cord, be absolutely sure to disconnect the AC cord plug at the socket outlet first.
- The settings may not be saved if the power plug is disconnected immediately after changing settings with on-screen menu. Disconnect the power plug after a enough period of time. Or, disconnect the power plug after turning the power off with the remote control, RS-232C control or LAN control.

3 Press the <Main Power On / Off button> on the unit to turn the set on: Power-On.

- Power Indicator: Green (Picture is displayed.)
- When the power of the unit is ON, remote control operation is possible.

■ To turn the power ON/OFF with the remote control

Press the <Standby (ON/OFF) button> to turn the Display on.

- Power Indicator: Green (Picture is displayed.)

Press the <Standby (ON/OFF) button> to turn the Display off.

- Power Indicator: Red (standby)

Press the <Main Power On / Off button> on the unit to turn the unit off, when the power of the unit is turned on or in standby mode.

Note

- During operation of the "Power management" function (see page 51), the power indicator turns orange in the power off state.
- After the power plug is disconnected, the power indicator may remain lit for a while. This is not a malfunction.

■ When the Unit is turned on for the first time

Following screen will be displayed.

1 Select the language with ▲ ▼ and press <ENTER>.

2 For vertical installation, select [Portrait] with ▲ ▼ and press <ENTER>.

Note

- Once the items are set, the screens won't be displayed when switching on the unit next time. Each item can be reset in the following menus.
[OSD language] (see page 55)
[Display orientation] (see page 65)

■ Power ON message

The following message may be displayed when turning the unit power ON:

No activity power off Precautions

'No activity power off' is enabled.

When [No activity power off] in the [Setup] menu is set to [Enable], a warning message is displayed every time the power is turned ON. (see page 55)

"Power management" Information

Last turn off due to 'Power management'.

When "Power management" is functioned, an information message is displayed every time the power is turned ON. (see page 51)

These message displays can be set with the following menu:

- [Options] menu
Power on message(No activity power off) (see page 76)
Power on message(Power management) (see page 76)

Selecting the input signal

Select the signals input to the unit.

Press <INPUT> or <INPUT (Unit)>.

Switches input every time the buttons are pressed.

[HDMI1] → [HDMI2] → [DIGITAL LINK] → [DVI-D] → [PC] → [VIDEO] → [USB] → [MEMORY VIEWER]

* DIGITAL LINK is for TH-65SF2E only.

[HDMI1]:

HDMI 1 terminal, HDMI input

[HDMI2]:

HDMI 2 terminal, HDMI input

[DIGITAL LINK]:

DIGITAL LINK / LAN terminal, DIGITAL LINK input

[DVI-D]:

DVI-D IN terminal, DVI-D input

[PC]:

PC IN terminal, PC input

[VIDEO]:

AV IN terminal, composite video input

[USB]:

USB terminal, USB input

[MEMORY VIEWER]:

USB terminal, "Memory viewer" input

Note

- Displays the signal name as set in [Input label]. (see page 51)
- Input will not be switched unless [Input lock] is set to [Off]. (see page 73)
- Image retention (image lag) may occur on the LCD liquid crystal panel when a still picture is kept on the panel for an extended period. To prevent such a problem, using the screensaver and wobbling is recommended. (see page 50, 55)

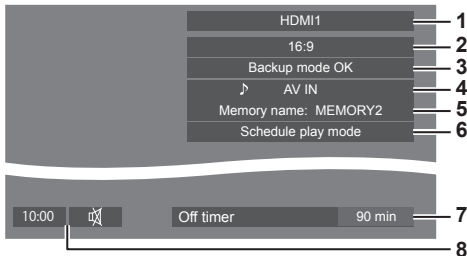

RECALL

It is possible to check the setting status of input label, picture mode, etc.

Press <RECALL>.

Current setting status will be displayed.

- 1 Input label
- 2 Aspect mode (see page 34)
- 3 Backup input change (see page 70, 71)
- 4 Audio input (see page 72)
- 5 Profile name (see page 46)
- 6 [Schedule play mode] (see page 101)
- 7 Off timer remaining time (see page 33)
- 8 Clock / Mute (see page 33, 76)

- When there is no video signal to the selected input, [No signal] is displayed for about 30 seconds at the end.
- When a USB memory is not connected to the USB terminal at the time of switching to the USB input, [No external media] is displayed for about 30 seconds. Even when a USB memory is connected, if it does not contain any playable file, [No play file] is displayed at all times.

- When [No signal image settings] - [Display setting] is set to [On] (see page 54), the message [No signal] / [No external media] / [No play file] are not displayed. Instead, the image set in [No signal image settings] will be displayed.
- To display the clock, set [Date and time] and then set [Clock display] to [On]. (see page 57, 76)

Volume Adjustment

Press <VOL +> <VOL -> or <+ (Unit)> <- (Unit)> to adjust volume.

- The current sound volume level is memorised even if the power is turned off.
- When [Maximum VOL function] is set to [On], the volume can only be adjusted to the maximum point you set, and the displayed value turns red when it reached its maximum. (see page 73)
- When [Initial VOL function] is set to [On], the volume will be at the set level when the display is turned on. (see page 72)

Sound mute On / Off

It is useful when you want to mute the sound temporarily, for example, when answering the phone or door.

Press <MUTE>.

-  appears on the screen and the sound is muted. Press again to reactivate the sound.

- It is also reactivated when the power is turned on / off or the volume level is changed.
- While MUTE is active,  is displayed as a reminder after operation.
- When the image set in [No signal image settings] (see page 54) is displayed,  is not displayed after operation.
- In [ENGLISH(US)] OSD language,  is displayed as [MUTE].

OFF TIMER

The Display can be preset to switch to stand-by after a fixed period. (30 min, 60 min, 90 min)

The setting switches each time <OFF TIMER> is pressed.

- [0 min] → [30 min] → [60 min] → [90 min]
→ [0 min] (Cancel)

- When three minutes remain, the remaining time will flash (Red). After that, it switches to stand-by.
- To see the Off timer remaining time, press <RECALL>.
- The Off timer is cancelled if a power interruption occurs. When the power is turned on later on, it will be in stand-by condition.
- When the image set in [No signal image settings] (see page 54) is displayed, remaining time is not displayed even when the timer expires in 3 minutes. Instead, the image is displayed until the power is turned off. Press <RECALL> to check the remaining time.

ASPECT Controls

Press <ASPECT> or <ENTER (Unit)> repeatedly to move through the aspect options:

[4:3] → [Zoom1] → [Zoom2] → [16:9]

Note

- The aspect mode is memorised separately for each input terminal.
- When input from USB or MEMORY VIEWER, the aspect mode is fixed to [16:9].

List of Aspect Modes

Aspect mode	Description
16:9	<p>Picture → Enlarged screen</p> <p>Pictures are displayed filling the screen.</p>
4:3	<p>Pictures are displayed in the 4:3 area. Pictures with a 4:3 aspect ratio are displayed as is. PC signals are enlarged or reduced to be displayed in the 4:3 area. Side panels are displayed both at the right and left edges of the screen.</p>
	<p>Pictures with a 4:3 aspect ratio in 16:9 signals are displayed with their original aspect ratio. The left and right edges of the pictures are masked by side panels.</p>

Aspect mode	Description
Zoom1	<p>Letterbox pictures with a 16:9 aspect ratio are enlarged vertically to fill the screen. The top and bottom edges of the pictures are cut off.</p>
Zoom2	<p>Letterbox pictures with a 16:9 aspect ratio are enlarged vertically and horizontally to fill the screen. The top and bottom edges as well as the left and right edges of the pictures are cut off.</p>

Note

- Be aware that if you put the display in a public place for commercial purposes or a public showing and then use the aspect mode select function to shrink or expand the picture, you may be violating the copyright under copyright law. It is prohibited to show or alter the copyrighted materials of other people for commercial purposes without the prior permission of the copyright holder.
- In [ENGLISH(US)] OSD language, [16:9] is displayed as [FULL].

Digital ZOOM

Select the screen areas (25 areas) to zoom in, and zoom in the selected image areas $\times 2$, $\times 3$ or $\times 4$.
(Use the remote control. The main unit's buttons cannot be used for operation.)

1 Set the digital zoom mode.

Press **<ZOOM>**.

The screen aspect is set to [16:9], and the digital zoom operation guide is displayed.

2 Select the image areas to zoom in.

Select pressing **▼▲◀▶**.

Digital Zoom operation guide

3 Switch the zoom ratio for the screen areas.

Switches every time **<ENTER>** is pressed.

- If no operation is performed for the period set for [Menu display duration] (see page 66) (5 – 180 seconds) **when the zoom ratio for the screen is “ $\times 1$ ”**, the unit exits the zoom mode.
- If no operation is performed for approx. 3 seconds **when the zoom ratio for the screen is “ $\times 2$ ”, “ $\times 3$ ” or “ $\times 4$ ”**, the digital zoom operation guide display disappears. Pressing any of the **▼▲◀▶** buttons displays the guide again.

4 Exit the digital zoom mode.

Press **<RETURN>** to exit the mode.

The screen returns to the previous state just before entering the digital zoom mode, and the digital zoom operation guide display disappears.

- Press any of the following buttons to exit the mode. Then, the operation of the pressed button is performed.

Remote Control:

<AUTO SETUP> <POSITION> <PICTURE>
<INPUT> <SETUP> <SOUND>
<DEFAULT> <RECALL> <MUTE>
<ASPECT> <OFF TIMER> <FUNCTION>
<VOL +> <VOL -> <1> – <6>

Unit:

<INPUT (Unit)> <MENU (Unit)> <+ (Unit)>
<- (Unit)> ▲ ▼ <ENTER (Unit)>

- When the screen saver timer starts up, the digital zoom mode finishes.
- When the power is turned OFF, a force-quit is performed.
 - When the power is turned OFF by pressing the <Standby (ON/OFF) button>.
 - When the display is turned OFF at the <Main Power On / Off button>
 - When the power is turned OFF by the off-timer
 - When the power is turned OFF by [No signal power off] or “Power management”.

Note

- In the following cases, the digital zoom mode is not available.
 - When [Multi display setting] is [On]
 - When the screen saver is in operation
 - When USB input or MEMORY VIEWER input is selected.
- The zoomed image is rougher than the original image.
- For multi display use, use the functions in [Multi display settings]. (see page 56)

On-Screen Menu Displays

1 Display the menu screen.

Remote Control

Unit

Each time the button is pressed, the menu screen will switch.

Normal Viewing → [Picture] → [Setup] → [Position] → [Sound]

2 Select the item.

(Example: [Picture] menu)

Picture	
Default	Default
Picture mode	Standard
Backlight	50
Contrast	50
Brightness	50
Colour	50
Hue	50
Sharpness	50
Enhance level	High
Gamma	2.2
Colour temperature	6500K
6-segment colour management	Off
Dynamic contrast	5
Colour enhancement	Off
Refine enhancer	Off
Gradation smoother	Off
Memory save	
Memory load	
Memory edit	

To display the submenu, press <ENTER>.

3 Set.

4 Exit from the menu.

Press <RETURN> to return to the previous screen.

Alternatively, press the button selected in step 1 to exit from the menu.

Note

- When changing the settings of the display, picture or sound disturbance may occur temporarily. This is not a malfunction.

Menu display list

- Menu that cannot be adjusted is greyed out.
Adjustable menu changes depending on signal, input and menu setting.

Adjusting Position

1 Press <POSITION> to display the [Position] menu.

2 Select the item to adjust with ▲ ▼.

- Unadjustable items are greyed out.
- Adjustable items differ depending on the signal, input and the display mode.

3 Adjust with ◀ ▶.

4 Press <POSITION> to exit from adjust mode.

■ To return to the previous screen

Press <RETURN>.

■ To reset to defaults

When [Default] is selected, pressing <ENTER> resets the adjustment values of all the displayed menus to default.

When adjusting each item, pressing <DEFAULT> resets the adjustment value of the item to default.

Note

- Settings for [Position] are memorised separately for each input signal.
- With MEMORY VIEWER input, each item in the [Position] menu cannot be adjusted.

Setting [Position] when the display is installed vertically

When adjusting, please note that even when the display is installed vertically, setting directions of position / size are the same as that of horizontal installation.

Auto setup

When inputting a PC signal, [H-position] / [V-position], [H-size] / [V-size], [Clock phase] and [Dot clock] are automatically corrected.

This setting is enabled under the following condition:

- When inputting an analogue signal (PC).

While displaying the picture of the corresponding signal, select [Auto setup] and press <ENTER>.

Using Remote Control

Press <AUTO SETUP>.

When Auto Setup does not work, [Invalid] is displayed.

Note

- When the dot clock frequency of a PC signal is 162 MHz or higher, [Clock phase] and [Dot clock] cannot be automatically corrected.
- Auto Setup may not work when a cropped or dark image is input. In such case, switch to a bright image with borders and other objects are clearly shown, and then try auto setup again.
- Depending on the signal, out of alignment may occur after Auto Setup. Carry out fine tuning for the position/size as required.
- If Auto Setup cannot set properly for XGA signal (1024 x 768, 1280 x 768, 1366 x 768), pre-selecting the individual signal in [XGA mode] (see page 49) may result in correct Auto Setup.
- Accurate auto setup is not possible when a signal such as additional information is superimposed out of valid image period or when intervals between synchronizing signal and image signal are short. Also, accurate auto setup is not possible when image signals with tri level synchronizing signal added, or when some SYNC ON G signals are input.
- When the [PC auto setting] is set to [On] in the [Options] menu (see page 74), automatic position adjustment starts under the following conditions:
 - When the display power is turned ON.
 - When the input signal is switched.
- If Auto Setup does not work well, select [Default], press <ENTER>, and then adjust the position/size manually.

[H-position] Adjust the horizontal position with ◀▶.

[H-size] Adjust the horizontal size with ◀▶.

[V-position] Adjust the vertical position with ◀▶.

[V-size] Adjust the vertical size with ◀▶.

[Clock phase] (For PC IN input)

In some cases, frame of the screen appears blurred or smudged, when PC signal is input.

[Dot clock] (For PC IN input)

Periodic striped pattern interference (noise) may occur when a striped pattern is displayed. If this happens, adjust so that any such noise is minimized.

[Over scan] Turn image over scan On/Off.

Applicable input signal:

480/60i, 480/60p, 576/50i, 576/50p,
720/60p, 720/50p

[On]

[Off]

Note

- When [Off] is set, [H-size] and [V-size] cannot be adjusted.

[1:1 pixel mode] Adjusts the display size when 1080i or 1080p signal is input.

[Off]

[On]

Applicable input signal:

1080 / 50i, 60i, 24PsF, 24p, 25p, 30p,
50p, 60p

Note

- Select [Off] when flickering is shown around the image.
- [H-size] and [V-size] cannot be adjusted when [On] is selected.

Note

- In some cases, noise appears outside the area picture is displayed, but it is not a malfunction.

Sound Adjustment

1 Press <SOUND> to display the [Sound] menu.

2 Select the item to adjust with ▲ ▼.

- Menu that cannot be adjusted is greyed out.

3 Adjust with ◀ ▶.

4 Press <SOUND> to exit from adjust mode.

■ To return to the previous screen

Press <RETURN>.

■ To reset to defaults

Press <DEFAULT> while the menu is displayed, or press <ENTER> when [Default] is selected, then the adjustment values of all the displayed menus are reset to default.

[Output select] Select the audio output.

[SPEAKERS]:

Internal speakers

[AUDIO OUT]:

AUDIO OUT terminal output

- When [AUDIO OUT] is selected, the other menus are greyed out and cannot be selected.
- Audio volume setting is memorized separately for each output.

[Balance] Adjusts left and right volumes.

[Sound mode] Select for best audio.

[Normal]:

Emits the original sound.

[Dynamic]:

Accentuates sharp sound.

[Clear]:

Attenuates human voice.

- In [ENGLISH(US)] OSD language, [Sound mode] and [Normal] are displayed as [AUDIO MENU] and [STANDARD].

[Bass]

Adjusts low pitch sounds.

[Treble]

Adjusts high pitch sounds.

[Surround]

[Off]:

Normal sound

[On]:

Surround sound

Note

- [Bass], [Treble] and [Surround] settings are memorised separately for [Normal], [Dynamic] and [Clear] in [Sound mode].

Picture Adjustments

1 Press <PICTURE> to display the [Picture] menu.

2 Select the item to adjust with ▲ ▼.

- Menu that cannot be adjusted is greyed out.

3 Adjust with ◀ ▶.

4 Press <PICTURE> to exit from adjust mode.

■ To return to the previous screen

Press <RETURN>.

■ To reset to defaults

When [Default] is selected, pressing <ENTER> resets the adjustment values of all the displayed menus to default.

When adjusting each item, pressing <DEFAULT> resets the adjustment value of the item to default.

Note

- When displaying still pictures with the USB input (USB media player) or displaying the thumbnail screen or file list screen of the MEMORY VIEWER input (Memory viewer) (see page 106), only the following settings have an effect on the picture. [Backlight], [Gamma], [Colour temperature]

[Picture mode]

This menu switches to easy-to-see pictures suitable to the picture source or environment where this unit is used.

[Vivid signage]:

Suitable for signage applications featuring more vivid and sharper images in bright environments such as a shop.

[Natural signage]:

Suitable for signage applications such as merchandise exhibition, featuring natural tone images with colour reproduction emphasized under light.

[Standard]:

Faithfully reproduces original picture.

[Surveillance]:

Tone-focused pictures with brightness reduced suitable for input from a monitoring camera.

[Graphic]:

Suitable for PC input.

[DICOM]:

Pictures close to the grayscale standard DICOM Part14.

- The settings are memorised separately for each input terminal.

Note

- DICOM is the abbreviation for "Digital Imaging and Communications in Medicine", which is a standard for communications between medical imaging devices. Although "DICOM" is used as a picture mode name, this unit is not a medical device. Do not use displayed images for such purposes as diagnosis.
- In [ENGLISH(US)] OSD language, [Picture mode] is displayed as [PICTURE MENU].

[Backlight]

Adjusts luminance of the back light.

Darker ↔ Brighter

[Contrast]

Selects the proper brightness and density for the room.

Less ↔ More

- In [ENGLISH(US)] OSD language, [Contrast] is displayed as [PICTURE].

[Brightness]

Adjusts for easier viewing of dark pictures.

Darker ↔ Brighter

[Colour]

Adjusts colour saturation.

Less ↔ More

[Hue]

Adjusts hue of skin colour.

Reddish ↔ Greenish

- In [ENGLISH(US)] OSD language, [Hue] is displayed as [TINT].

[Sharpness] Adjusts picture sharpness.

Less ↔ More

[Enhance level] Switches the effect range for sharpness.

[High]: Large effect

[Low]: Small effect

[Gamma] Adjusts gamma.

[2.0], [2.2], [2.4], [2.6], [DICOM]:

Small tilt - Large tilt

Note

- When [DICOM] is selected in [Picture mode], [Gamma] is fixed to [DICOM].

When the items other than [DICOM] are selected in [Picture mode], [DICOM] cannot be set for [Gamma].

[Colour temperature] Adjusts colour tone.

[3200K], [4000K], [5000K], [6500K], [7500K], [9300K], [10700K], [Native], [USER1], [USER2]

Note

- Emphasizes red when the numerical value of [Colour temperature] is small, and emphasizes blue when it is big.
- [Native] is a colour tone of the panel element. When this is selected, [Gamma] is fixed to 2.2 or equivalent and it cannot be adjusted.
- When [DICOM] is selected in [Picture mode], only [6500K] and [9300K] can be selected.

User setting of [Colour temperature]

2 kinds of detailed [Colour temperature] settings ([USER1] and [USER2]) can be stored.

1 Press <ENTER> while setting [Colour temperature].

Example:

When [Colour temperature] is [6500K], it is possible to reflect the set point, [6500K], to the set point of [USER1] and [USER2].

2 Select the user to memorise settings with ▲ ▼ and press <ENTER>.

3 Select [Yes] with ◀▶ and press <ENTER>.

4 Set each item on detail settings screen.

[R gain]

Adjusts the white balance for light red areas.

0 – 255

[G gain]

Adjusts the white balance for light green areas.

0 – 255

[B gain]

Adjusts the white balance for light blue areas.

0 – 255

[R bias]

Adjusts the white balance for dark red areas.

-127 – 128

[G bias]

Adjusts the white balance for dark green areas.

-127 – 128

[B bias]

Adjusts the white balance for dark blue areas.

-127 – 128

The settings are saved for the user. When you return to [Picture] menu, the user you have set is selected for [Colour temperature].

[6-segment colour management]

Adjusts the colour tone of R (red), G (green), B (blue) and complementary colours (cyan, magenta and yellow) on the screen individually.

- 1 Set [6-segment colour management] to [On], and then press <ENTER>.

- 2 Set each item on detail settings screen.

[Select colour]

Select the colour to adjust with ◀▶.

[Hue]

Adjusts colour balance.

- 511 to + 511

[Saturation]

Adjusts gradations of colour.

- 127 to + 127

[Value]

Adjusts brightness of colour.

- 127 to + 127

[Reset]

Resets to defaults. Select [Yes] with ◀▶ and press <ENTER>.

- In [ENGLISH(US)] OSD language, [Hue] is displayed as [TINT].

[Dynamic contrast]

Automatically adjusts the contrast by determining the changes in the use of colours for images that constantly change, such as motion pictures.

No effect ↔ Large effect

[Colour enhancement]

Displays images by emphasising colours.

[Off], [Low], [Mid], [High]
(Small effect to Large effect)

[Refine enhancer]

Enhances the sense of resolution by correcting fuzzy outlines of pictures resulted from resizing, etc.

[Off], [Low], [Mid], [High]
(Small effect to Large effect)

[Gradation smoother]

Extracts and eliminates noise components from the input video signals, and then displays noiseless pictures.

[Off], [On]

Picture Profiles

Up to 6 combinations of picture adjustment values (in the [Picture] menu) can be stored in the display memory as profiles and applied as needed, for a convenient way to enjoy your preferred picture settings.

Picture

Default	Default	Standard
Picture mode		Standard
Backlight	50	
Contrast	50	
Brightness	50	
Colour	50	
Hue	50	
Sharpness	50	
Enhance level		High
Gamma		2.2
Colour temperature		6500K

Saving profiles

Follow these steps to save picture adjustment values as profiles.

- 1 Specify the picture quality in the [Picture] menu.
(see page 41 – 43)
- 2 In the [Picture] menu, select [Memory save] with ▲▼ and press <ENTER>.

- 3 Select a profile name for saving the picture adjustment values with ▲▼ and press <ENTER>.

- [*] appears for a profile in which the picture adjustments have already been saved.

- 4 Select [Ok] with ◀▶ and press <ENTER>.

- 5 Enter a profile name with ▲▼◀▶.

- Entering characters (see page 116)

- 6 When you finished entering the profile name, select [Ok] with ▲▼◀▶ and press <ENTER>.

- To cancel saving the profile, select [Cancel].

Loading profiles

Load profiles and apply the picture adjustment values to the display as follows.

- 1 In the [Picture] menu, select [Memory load] with ▲▼ and press <ENTER>.

- 2 Select the profile to load with ▲▼ and press <ENTER>.

Loading profiles using numeric buttons on the remote control.

Each numeric button <1> – <6> is allocated for loading [MEMORY1] to [MEMORY6].

[Function button settings] (see page 64)

- 1 Press any of <1> – <6>.
- 2 Select [Ok] with ◀▶ and press <ENTER>.

When profile is being loaded, profile name is displayed.

Note

- Loaded profiles are stored in memory according to the selected input terminal.

Editing profiles

Delete or rename profiles as follows.

■ Deleting profiles

1 In the [Picture] menu, select [Memory edit] with ▲ ▼ and press <ENTER>.

2 Select [Memory delete] with ▲ ▼ and press <ENTER>.

3 Select the profile to delete with ▲ ▼ and press <ENTER>.

- To delete all profiles, select [All delete].

4 Select [Ok] with ◀▶ and press <ENTER>.

■ Renaming profiles

1 In the [Picture] menu, select [Memory edit] with ▲ ▼ and press <ENTER>.

2 Select [Memory name change] with ▲ ▼ and press <ENTER>.

3 Select the profile to rename with ▲ ▼ and press <ENTER>.

4 Enter a name for the profile with ▲ ▼ ◀▶.

- Entering characters (see page 116)

5 When you finished entering the profile name, select [Ok] with ▲ ▼ ◀▶ and press <ENTER>.

- To cancel renaming the profile, select [Cancel].

Setup menu

1 Press <SETUP> to display the [Setup] menu.

2 Select the item to set with ▲ ▼.

- Menu that cannot be adjusted is greyed out. Adjustable menu changes depending on signal input and menu setting.

3 Set with ◀ ▶.

4 Press <SETUP> to exit from adjust mode.

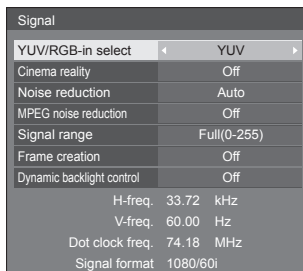

■ To return to the previous screen

Press <RETURN>.

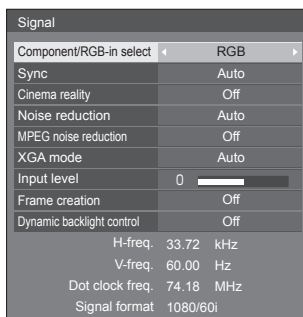

Signal

Examples of [Signal] submenu screen

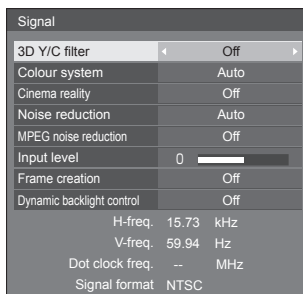

When HDMI / DVI / DIGITAL LINK is selected

When PC is selected

When VIDEO is selected

When USB / MEMORY VIEWER is selected

Signal	
Noise reduction	Auto
MPEG noise reduction	Off
Frame creation	Off

Note

- [Signal] setup menu displays a different setting condition for each input signal.
- Menu that cannot be adjusted is greyed out.
- [Frame creation] is a function for 65-inch models. This function is not available for 55/49/43-inch models.

■ **[Component/RGB-in select]**

This menu is displayed at PC signal input.

Select to match the signals from the source connected to PC IN terminal.

[Component] YPbPr/YCbCr signals

[RGB] RGB signals

■ **[YUV/RGB-in select]**

This menu is displayed at HDMI 1, HDMI 2, DIGITAL LINK and DVI-D IN inputs.

Select to match the signals from the source connected to each terminal.

[YUV] YUV signals

[RGB] RGB signals

Note

- Set for each input terminal (HDMI 1, HDMI 2, DIGITAL LINK, DVI-D IN).

■ **[Sync]**

This menu is displayed at PC IN input.

Setting RGB/PC sync signal

[Auto]:

The H and V sync or synchronized signal is automatically selected. When both of them have sync signal, H and V sync will be selected.

When displaying CS signal, connect to HD input terminal.

[on G]:

Uses a synchronized signal on the Video G signal, which is input from the G connector.

[HV sync]:

Uses a synchronized signal on the Video HD/VD signal, which is input from the HD/VD connector.

Setting Component sync signal

[Auto]:

The H and V sync or synchronized signal is automatically selected. When both of them have sync signal, H and V sync will be selected.

When displaying CS signal, connect to HD input terminal.

[on Y]:

Uses a synchronized signal on the Video Y signal, which is input from the Y connector.

[HV sync]:

Uses a synchronized signal on the Video HD/VD signal, which is input from the HD/VD connector.

■ **[Cinema reality]**

Faithfully reproduces videos shot with cinema films. Set this to [Off] normally.

Note

- In [ENGLISH(US)] OSD language, [Cinema reality] is displayed as [3:2 PULLDOWN].
- If [Cinema reality] is set to [On], videos including movies shot at 24 frames per second are reproduced more naturally.
- If the video is unnatural with [On] set, set it to [Off].

■ **[Noise reduction]**

Reduces picture noise.

[Off]:

Disables Noise Reduction.

[Min], [Mid], [Max]:

Sets strength of Noise Reduction.

[Auto]:

Noise reduction will be automatically selected from [Min], [Mid] or [Max].

■ **[MPEG noise reduction]**

Reduces block noise and mosquito noise on MPEG videos.

[Off]:

Disables Noise Reduction.

[Min], [Mid], [Max]:

Sets strength of Noise Reduction.

■ [XGA mode]

This menu is displayed at PC IN input.

This unit supports XGA signals (1024 x 768, 1280 x 768, 1366 x 768) having different aspect ratios and sampling rates.

[Auto]:

Automatically detects the signal.

Switch the setting to suit the input signal for better display depends on the angle of view or display resolution condition.

Note

- After making this setting, be sure to make each adjustment (such as [Auto setup]) on the [Position] menu as necessary. (see page 38)

■ [Signal range]

This menu is displayed at HDMI1, HDMI2, DIGITAL LINK and DVI-D IN inputs. Switches the dynamic range to match the signals from the source connected to each terminal.

[Video(16-235)]:

If the input signal is the video range

Example: HDMI terminal output for DVD player

[Full(0-255)]:

If the input signal is full range

Example: HDMI terminal output for personal computer

[Auto]:

Switches the dynamic range automatically between [Video(16-235)] and [Full(0-255)] according to the input signal.

Note

- [Auto] can be selected when HDMI or DIGITAL LINK signal is input.

■ [Input level]

This menu is displayed at PC IN and AV IN inputs.

Adjustment of parts which are extremely bright and hard to see.

-16 – +16:

(Level low) – (Level high)

■ [3D Y/C filter]

Set this if the video looks unnatural at AV IN input. Set this to [On] normally.

Note

- Depending on the signalling system, this setting may be less effective or may not be effective at all.

■ [Colour system]

Sets the colour system according to the signal method at AV IN input. Set this to [Auto] normally. This automatically detects the input signal format.

[Auto], [PAL], [SECAM], [NTSC], [NTSC4.43], [PAL-M], [PAL-N]:

Set this to [Auto] when viewing PAL-60 videos.

When images are unstable

When the system is set to [Auto], images become unstable in rare case under the condition that the input signals are at low level or have many noises. In this case, set the system so it conforms with the input signal format.

■ [Dynamic backlight control]

Improves picture contrast and alleviates whiteness by controlling the back light when signals with the low average brightness level (APL) are input.

[On]:

The function is enabled.

[Off]:

The function is disabled.

Note

- When this function is operating, the on-screen brightness becomes lower.
- If the [Dynamic backlight control] setting is different for each input, the on-screen brightness may change by switching input.
- Depending on the displayed image, the screen may flicker. If this annoys you, set [Dynamic backlight control] to [Off].

■ [Frame creation]

(65-inch model) only

Improves motion picture quality. Select [Off] when the motion picture looks unnatural.

[Off]:

[Frame creation] is disabled.

[On]:

[Frame creation] is enabled.

Note

- [Frame creation] is a function for 65-inch models. This function is not available for 55/49/43-inch models.

■ Input signal display

Displays the frequency and the type of the current input signal.

H-freq.	33.72	kHz
V-freq.	60.00	Hz
Dot clock freq.	74.18	MHz
Signal format	1080/60i	

Display range:

Horizontal (15 kHz – 135 kHz)

Vertical (24 Hz – 120 Hz)

The dot clock frequency is displayed when Digital and PC signal are input.

Screensaver (For preventing image retention)

Do not display a still picture, especially in 4:3 mode, for any length of time.

If the display must remain on, a Screensaver should be used.

[Screensaver] - submenu screen

■ Screensaver settings

Screensaver operation

When the Screensaver is operating, the following 5 patterns are displayed full screen for 5 seconds each, and it will be repeated.

Black → Dark grey → Grey → Light grey → White → Light grey → Grey → Dark grey

To start Screensaver now

- ① Select [On] in [Mode].
- ② Select [Start] and press <ENTER>.
 - The Screensaver will be activated.

Note

- If the following buttons are pressed while the screen saver is operating, the screen saver is cancelled.

Remote control: <RETURN>

Main unit: <MENU (Unit)> <INPUT (Unit)>
<+ (Unit)> <- (Unit)> ▲ ▼
<ENTER (Unit)>

- When the display is turned off, the Screensaver will be deactivated.

To set interval of Screensaver

- ① Select [Interval] in [Mode].
- ② Set [Periodic time].
 - Press ◀▶ to change the time by 15 minutes.
 - In [ENGLISH(US)] OSD language, [Periodic time] is displayed as [SHOW DURATION].
- ③ Set [Operating time].
 - Press ◀▶ once to change the time by 1 minute. Keep pressing down to change the time by 15 minutes.
 - In [ENGLISH(US)] OSD language, [Operating time] is displayed as [SAVER DURATION].

Note

- It is not possible to set the duration of [Operating time] longer than that of [Periodic time].

To set start and finish time of Screensaver

- ① Select [Time designation] in [Mode].
- ② Set [Start time] and [Finish time].
 - Press ◀▶ once to change the time by 1 minute. Keep pressing down to change the time by 15 minutes.
 - In [ENGLISH(US)] OSD language, [Time designation] is displayed as [TIME OF DAY].

Note

- When the current time is displayed as [- -], set [Date and time] before setting [Start time] and [Finish time]. (see page 57)

To turn the power off after Screensaver

- ① Select [Standby after SCR saver] in [Mode].
- ② Set [Screensaver duration].
 - Press ◀▶ once to change the time by 1 minute. Keep pressing down to change the time by 15 minutes.
- ③ Select [Start] and press <ENTER>.
 - Screensaver will be activated and the power will be turned off (standby) at the time set.

Note

- [Screensaver duration] can be set from 0:00 to 23:59.

When this is set to [0:00], [Standby after SCR saver] will not be activated.

Input label

This function can change the label of the Input signal to be displayed.

[Input label] - submenu screen

Input label	
HDMI1	HDMI1
HDMI2	HDMI2
DIGITAL LINK	DIGITAL LINK
DVI-D	DVI-D
PC	PC
VIDEO	VIDEO

[HDMI1]	[HDMI1] / [DVD1] / [DVD2] / [DVD3] / [Blu-ray1] / [Blu-ray2] / [Blu-ray3] / [CATV] / [VCR] / [STB] / (Skip)
[HDMI2]	[HDMI2] / [DVD1] / [DVD2] / [DVD3] / [Blu-ray1] / [Blu-ray2] / [Blu-ray3] / [CATV] / [VCR] / [STB] / (Skip)

(Skip): When <INPUT> is pressed, the input will be skipped.

Power management settings

Set each item to reduce power consumption.

This function works only for the input terminal that is currently selected.

[Power management settings] - submenu screen

Power management settings	
Power management mode	Custom
No signal power off	Disable
HDMI1 power management	Off
HDMI2 power management	Off
DIGITAL LINK power management	Off
DVI-D power management	Off
PC power management	Off
Power save	Off
Extended standby mode	Off

■ [Power management mode]: [On]

The following fixed values are set to the menu of power consumption reduction. Individual setting is not available.

- [No signal power off]: [Enable]
- [HDMI1 power management]: [On]
- [HDMI2 power management]: [On]
- [DIGITAL LINK power management]: [On]
- [DVI-D power management]: [On]
- [PC power management]: [On]
- [Power save]: [On]

■ [Power management mode]: [Custom]

The menu of the power consumption reduction is individually set. This setting is enabled when [Power management mode] is set to [Custom].

[No signal power off]

When this is set to [Enable], the power supply of the unit goes off automatically (standby) when there is no operation or sync signal for about 10 minutes.

Note

- When set to the USB input, the unit determines no signal is present if the USB memory is not connected to the USB terminal, or the connected USB memory does not contain any playable file.
- This function operates regardless of the [On] / [Off] settings of [No signal image settings].
- This function may not operate depending on the video output devices.

[HDMI1 power management]

When this function is set to [On], it operates under the following conditions to turn the power on or off automatically.

When no pictures (sync signal) are detected for 60 seconds or so at HDMI1 input:

Power is turned off (standby); the power indicator lights up orange.

When pictures (sync signal) are subsequently detected at HDMI1 input:

Power is turned on; the power indicator lights up green.

Note

- This function may not operate depending on the video output devices.

[HDMI2 power management]

When this function is set to [On], it operates under the following conditions to turn the power on or off automatically.

When no pictures (sync signal) are detected for 60 seconds or so at HDMI2 input:

Power is turned off (standby); the power indicator lights up orange.

When pictures (sync signal) are subsequently detected at HDMI2 input:

Power is turned on; the power indicator lights up green.

Note

- This function may not operate depending on the video output devices.

[DIGITAL LINK power management]

When this function is set to [On], it operates under the following conditions to turn the power on or off automatically.

When no pictures (sync signal) are detected for 60 seconds or so at DIGITAL LINK input:

Power is turned off (standby); the power indicator lights up orange.

When pictures (sync signal) are subsequently detected at DIGITAL LINK input:

Power is turned on; the power indicator lights up green.

Note

- This function may not operate depending on the video output devices.

[DVI-D power management]

When this function is set to [On], it operates under the following conditions to turn the power on or off automatically.

When no pictures (sync signal) are detected for 60 seconds or so at DVI-D input:

Power is turned off (standby); the power indicator lights up orange.

When pictures (sync signal) are subsequently detected at DVI-D input:

Power is turned on; the power indicator lights up green.

Note

- This function may not operate depending on the video output devices.

[PC power management] (DPMS function)

When this function is set to [On], it operates under the following conditions to turn the power on or off automatically.

When no pictures (HD/VD sync signals) are detected for 60 seconds or so at PC input:

Power is turned off (standby); the power indicator lights up orange.

When pictures (HD/VD sync signals) are subsequently detected at PC input:

Power is turned on; the power indicator lights up green.

Note

- This function is effective when [Sync] in [Signal] is set to [Auto] or [HV sync] and [Component/RGB-in select] are set to [RGB]. (see page 48)
- This function may not operate depending on the video output devices.

[Power save]

This function adjusts the brightness of the backlight to reduce power consumption.

[Off]:

This function does not operate.

[On]:

Backlight brightness is reduced.

[Extended standby mode]

Sets the operation in standby mode by the "Power management" function for the input terminal for which the "Power management" function is set to [On].

[On]:

If a video signal (synchronized signal) is detected at any of the input terminals for which the "Power management" function is set to [On], the power is turned "ON", and the input is switched to the detected input.

[Off]:

If a video signal (synchronized signal) is detected at the input terminal with which the standby mode is entered, the power is turned "ON" with the input.

Note

- If [Input search] is set to items other than [Off], the [Input search] function is prioritised. (The "Power management" function does not operate for each terminal.) (For details of [Input search] function, see page 68.)
- If [Failover/Failback] is set to items other than [Off], the [Failover/Failback] function is prioritised. (The "Power management" function does not operate for each terminal.) (For details of [Failover/Failback] function, see page 69.)

HDMI-CEC settings

Set for HDMI-CEC function.

For details of HDMI-CEC function, refer to "About HDMI-CEC function". (see page 108)

[HDMI-CEC settings] - submenu screen

■ [HDMI-CEC control]

Enables/Disables the HDMI-CEC function.

[Disable]: Disables HDMI-CEC control.

[Enable]: Enables HDMI-CEC control.

Note

- Set to [Enable] to operate HDMI-CEC compatible device with remote control of the unit.

■ [HDMI1]

Displays the device to operate when HDMI-CEC compatible device is connected to HDMI 1 terminal.

The control subject can be changed with ◀▶.

Note

- When there is no connected device, [----] will be displayed.

■ [HDMI2]

Displays the device to operate when HDMI-CEC compatible device is connected to HDMI 2 terminal.

The control subject can be changed with ◀▶.

Note

- When there is no connected device, [----] will be displayed.

■ [HDMI-CEC operation]

Displays the operation screen of the HDMI-CEC compatible device.

Press <RETURN> to hide the operation screen.

■ [MENU code]

Changes the code to assign for the [MENU] operation on the HDMI-CEC operation screen.

Adjust the code to that of the connected HDMI-CEC compatible device.

■ [Display → Device]

Enables/Disables this unit to perform interlocking control of the HDMI-CEC compatible device.

[Disable]:

Disables this unit to perform interlocking control of the HDMI-CEC compatible device.

Even if the power status of this unit changes, the power status of the device will not be affected.

[Power off]:

Turning this unit off (standby) turns off (standby) all the devices connected to the HDMI 1 and HDMI 2 terminals. The power-on operation is not interlocked.

[Power on / off]:

The device turns on/off (standby) in conjunction with the power-on/off (standby) operation of this unit.

Note

- For details of operation, refer to "About HDMI-CEC function". (see page 108)

■ [Device → Display]

Enables/Disables the HDMI-CEC compatible device to perform interlocking control of this unit.

[Disable]:

Disables the HDMI-CEC compatible device to perform interlocking control of this unit.

Even if the power status of the device changes, the power status of this unit will not be affected.

[Power on]:

Turning on the device turns on this unit, and the input (HDMI1/HDMI2) is switched to that of the device.

[Power on / off]:

The power status of this unit interlocks with the power-on/off operation of the device.

Note

- For details of operation, refer to "About HDMI-CEC function". (see page 108)
- Input will not be switched when [Options] - [Input lock] is set.

Image settings

Sets the image displayed on the screen when the power is turned on or no signal is input.

[Image settings] - submenu screen

[Startup image settings]:

Sets the image displayed when the power is turned on.

[No signal image settings]:

Sets the image displayed when there is no signal at the selected input terminal.

Conditions of the image that can be set in [Read user image]

- Image size: 1 920 x 1 080 only
- jpg files / bmp files (except for the ones that cannot be played back with USB media player (see page 95))
- jpg files (Applies only to a no-signal image of 3.5 MB or less in file size.)

File and folder names are displayed on the file list with conditions as below.

– If a file or folder is placed directly under the root directory of the USB device.

- Up to 246 characters of file name (including the extension) are properly displayed.

Note that the file list may disappear due to the display time of the on-screen menu before the entire display of file names completely appears.

- Up to 244 characters of folder name are properly displayed.
 - If the folder is placed hierarchically, the number of characters displayed decreases by the number of characters for the file path (folder information).

– Only the files with file names described with ASCII characters excluding control code are displayed.

Note

- [Picture] cannot be adjusted when setting the startup image.
- Only [Backlight] and [Colour temperature] can be adjusted when setting the no-signal image.
- Images displayed for the startup image and no-signal image may slightly differ from images confirmed on the computer.

■ [Startup image settings] / [No signal image settings]

Operate [No signal image settings] in the same way as [Startup image settings].

[Startup image settings] - submenu screen

[Display setting]

Sets the image display when the power is turned on.

[Off]: The function does not operate.

[On]: Enables the function.

Note

- When no-signal image is displayed, the screen position moves at certain intervals and images are displayed to alleviate burn-in on the LCD panel.
- Shifts the display position regardless of the setting of [Wobbling] (see page 55).
- When this function is operating, part of the screen may appear to be missing.

[Image select]

Select the image to display.

[Default image]: Panasonic logo (blue background)

[User image]: Image registered by the user

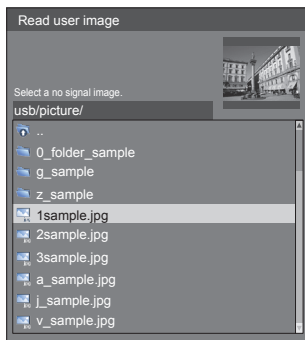

Note

- Only when [Default image] is displayed, the logo automatically rotates when displayed, according to the [Display orientation] (see page 65) setting ([Landscape] / [Portrait]).
- When [User image] is selected, the image does not rotate according to the [Display orientation] setting. Prepare an image of 1 920 x 1 080 aspect ratio compatible with the installation direction.
- [Default image] of [No signal image settings] is the Panasonic logo (black background).

[Read user image]

Register the image read from a USB memory device.

[Read user image] - submenu screen

Note

- Set the input to something other than [USB] or [MEMORY VIEWER], and read the image.
- One user image can be registered for [Startup image settings] and [No signal image settings] respectively.
- Do not turn the power off while reading the user image.
- The selected image is previewed on the [Read user image] submenu screen.
- When USB memory device is not connected to the USB terminal, [Read user image] is greyed out and cannot be selected.
- If starting to read the image while creating the preview image, an access error will occur, and the image may not be recognized as a image file. Confirm the preview image display, and then start reading process.
- The displayed file names are restricted as follows.
 - Applicable extension: jpg, jpe, jpeg or bmp
 - The file name is not “.jpg”, “.jpe”, “.jpeg”, or “.bmp” which start with dot (.).
- Depending on the OS setting, folders or files in the USB memory invisible on your computer may be displayed on this unit.

[Clear user image]

Clears the image registered in [Read user image].

[Startup image settings] - submenu screen

Note

- When there is no [User image] that have been read, [Clear user image] is greyed out and cannot be selected.
- When [Image select] is set to [User image], performing [Clear user image] will change the setting of [Image select] to [Default image].

Wobbling

Automatically shifts the display image (therefore unnoticeable to the eye) to prevent image retention of sharper contour of image.

Setting this to [On] moves the screen position at certain intervals and displays the images.

Note

- If [Multi display setting] is set to [On], this function does not operate. (see page 56)
- When this function is operating, part of the screen may appear to be missing.

No activity power off

When this function is set to [Enable], the power is turned off (standby) automatically when there is no operation of the Display for 4 hours.

Starting from 3 minutes before the turn off, the remaining time will be displayed.

When the power is turned off due to this function, a message [Last turn off due to 'No activity power off'.] is displayed next time the power is turned on.

When the image set in [No signal image settings] (see page 54) is displayed, remaining time is not displayed even when the power is going to be turned off in 3 minutes. Instead, the image is displayed until the power is turned off.

Note

- While the screensaver is running, this function is disabled.

Multi display settings

1 to 10 displays can be aligned in horizontal direction and vertical direction respectively, and those displays are regarded as one group. The enlarged image is shown on the combined display.

[Multi display settings]- submenu screen

Multi display settings	
Multi display setting	Off
Horizontal scale	2
Vertical scale	2
Bezel H adjustment	0
Bezel V adjustment	0
Location	A1

Note

- The settings are memorised separately for each input terminal.
- When the multi display is set to [Off], adjust to the same angle of view for [Position] (see page 38). Then, set the multi display to [On]. Again, make fine adjustment of the angle of view for [Position].
- The [Position] menu can be adjusted in the multi display status.
- For USB input, [Horizontal scale] and [Vertical scale] can be set only with the following combinations.

1 × 2, 1 × 3, 1 × 4, 2 × 1, 2 × 2, 3 × 1, 4 × 1

■ [Multi display setting]

[Off]:

The display is not divided when enlarged.

[On]:

The display is divided when enlarged.

When [On] is set, the display aspect is [16:9].

■ [Horizontal scale]

Set the horizontal scale in the multi display.

1 to 10

■ [Vertical scale]

Set the vertical scale in the multi display.

1 to 10

Example:

[Horizontal scale] [5] and [Vertical scale] [5] is set in the multi display

■ [Bezel H adjustment] / [Bezel V adjustment]

Adjust the area of image hidden in the joint horizontally and vertically respectively.

0 – 100

Display example

Setting value: 0

Displays the entire image including the joint area. (Suitable when displaying character information on PC.)

Setting value: 100

Does not display the image of the joint area. (Suitable when displaying motion pictures.)

■ [Location]

Assign the multi display position.

Example:

[Horizontal scale] [10], [Vertical scale] [10]

A1	A2	...	A9	A10
B1	B2	...	B9	B10
...
I1	I2	...	I9	I10
J1	J2	...	J9	J10

Select from A1 to J10.

- The displayed content for setting changes according to the settings for the [Horizontal scale] and [Vertical scale].
- By setting [Multi display setting] to [Off], it is possible to check the location on the screen while the setting menu is displayed.

Set up timer

Sets the program to turn the power on with the specified time and video input, or to turn the power off at the specified time. Up to 20 programmes can be set.

Note

- When the current time is displayed as [- -], set [Date and time] before setting [Set up timer]. (see page 57)
- When multiple programs are set at the same time, the program with the smallest program number is enabled.
- If [Power mode] is set to [Power on], executing the program at power-on will switch to the input set for [Input].

[Set up timer] - submenu screen

Setting Example

Program 1, Every Monday, 12:00,

Power On, Input: HDMI1

Set up timer	
2017/01/01 SUNDAY 10:00	
Program	1
Timer function	On
Day	MONDAY
Power mode	Power on
Time	12:00
Input	HDMI1

- 1 Set the program number.
- 2 To execute the program, set to [On].
The program is disabled when [Off] is set.
- 3 Set the day.
The program is executed every day when [Everyday] is set.
- 4 Set the power On/Off.
- 5 Set the time.
Pressing ◀▶ once changes time 1 minute.
Pressing continuously changes time by 15 minutes.
- 6 Set the input.

Date and time

Set date and time. ([- -] shows no programme is set.)

[Date and time] - submenu screen

Date and time	
2017/01/01 SUNDAY 10:00	
Set	
Year	2017
Month	1
Day	1
Hour	10
Minute	0
Synchronize display setting	
Synchronize display	Off
Parent or child setting	Child
NTP status	
NTP synchronization	Off
Time zone	(GMT + 00:00)

■ Set date and time

- ① Select [Year / Month / Day / Hour / Minute].
- ② Set the selected item.

Date and time	
2017/01/01 SUNDAY 10:00	
Set	
Year	2017
Month	1
Day	1
Hour	10
Minute	0

- ③ Select [Set] and press <ENTER>.

Date and time	
2017/02/05 SUNDAY 18:00	
Set	
Year	2017
Month	2
Day	5
Hour	18
Minute	0

Note

- If the present date and time are not set, the time settings for [Set up timer], [Screensaver], etc. cannot be made.
- The present date and time setting is reset in the following case.
When the main unit is left unattended for 7 days or longer after the main unit is turned off with the <Main Power On / Off button>, the power plug is removed, or power failure has occurred, etc.
- Date and time cannot be set when [Year / Month / Day / Hour / Minute] are set to [- -].
- The upper limit of date and time that can be set is, Year 2035, Month 12, Day 31, Hour 23 and Minute 59.

■ [Synchronize display setting]

Synchronizes the time of all the displays connected on the network.

Note

- This function does not operate if the displays to synchronize the time are not connected via a LAN.
- This function operates only when the devices connected via a LAN are connected with different IP addresses.
- The time synchronization operates only in power-on state or in schedule standby state.
- Normal operation is achieved only when the display synchronization function is enabled among the units. If other devices are connected on the same network, operation may not be normal.

[Synchronize display]:

Enables/Disables display synchronization function.

[Parent or child setting]:

Set this unit to [Parent] or [Child] for display synchronization.

Operates when [Synchronize display] is [On].

[Parent]:

Set the time as a source of synchronization.

[Child]:

Synchronizes with the time of the parent.

Note

- When [Synchronize display] is [On], and [Parent or child setting] is [Child], date and time cannot be set.
- When [Synchronize display] is [On], and [Parent or child setting] is [Child], [NTP synchronization] off-operation is performed.
- If two or more displays with [Parent] set are present on one network, display synchronization does not operate properly.
- Time is not synchronized if no displays with [Parent] set is present on one network.
- Time is not synchronized if the time is not set for the display with [Parent] set on the network.
- Depending on the network environment, synchronization may be largely lost.
- Synchronization is not possible if a router is placed between displays.
- Synchronization is not possible via a wireless LAN.

■ [NTP status]

Displays the current [NTP synchronization] and [Time zone] (see page 90) settings.

Note

- When [NTP synchronization] is set to [On], and if [Synchronize display] and [Parent or child setting] are set to [On] and [Child] respectively, [NTP synchronization] shows [--], and the off-operation is performed.
- When [NTP synchronization] is [On], date and time cannot be set.
- The settings for [NTP synchronization] and [Time zone] cannot be changed with this menu. Change the settings with WEB browser. (see page 90)
- [NTP synchronization] operates only in power-on state or in schedule standby state.

Network settings

Set when networking with a computer.
[Network settings] submenu will be displayed.

Network settings	
Serial control	SERIAL IN
Network control	Off
Auto display name	Off
Display name	SF2-000
LAN setup	
Network status	
DIGITAL LINK mode	Auto
DIGITAL LINK status	
DIGITAL LINK menu	
AMX D. D.	Off
Crestron Connected™	Off
Extron XTP	Off
USB memory network settings	Permit
Reset	

■ [Serial control] (TH-65SF2E only)

Selects the RS232-C control terminal.

[SERIAL IN]:

Controls using the SERIAL IN terminal of the display.

[DIGITAL LINK]:

Controls via the optional device that supports DIGITAL LINK output (ET-YFB100G, ET-YFB200G) and the DIGITAL LINK / LAN terminal.

■ [Network control]

Set when controlling with the unit's LAN terminal.

[On]:

Controls via LAN using the LAN terminal of the Display. The power indicator lights orange when the power is turned off with the remote control (standby).

[Off]:

Invalidates control with LAN terminal.

(In this case, the power consumption of Standby condition (when the power is turned off with the remote control) will be slightly reduced.)

Note

- When using the LAN control function for "Using Network Function" (see page 78 – 93), set this function to [On]. Even if [Off] is selected, the HDMI communication via a twisted pair cable transmitter is possible while the power is on.

■ [Auto display name]

Sets whether to change the display name automatically.

[On]:

Changes the display name automatically in accordance with the set point of the display ID.

[Off]:

The display name is not changed automatically.

■ [Display name]

The name of the Display that is shown on the network can be changed.

Note

- The name can be changed only when [Auto display name] is set to [Off].
- Display ID is not reset to default with [Network settings] - [Reset].

■ [LAN setup]

Detailed network settings for the LAN established via the LAN terminal of the Display can be configured.

Select [LAN setup] with ▲ ▼ and press <ENTER>.

LAN setup	
Save	
DHCP	Off
IP address	192.168. 0. 8
Subnet mask	255.255.255. 0
Gateway	192.168. 0. 1
Port	
1024	
MAC address	
12:34:56:78:9A:BC	

[DHCP], [IP address], [Subnet mask], [Gateway]

① Press ◀▶ to set [On] / [Off] of [DHCP].

When [Off] is selected, IP address and other settings can be set manually.

[DHCP]:

(DHCP client function)

[On]:

Obtains an IP address automatically when a DHCP server exists in the network the Display is going to be connected.

[Off]:

When a DHCP server does not exist in the network the Display is going to be connected, set [IP address], [Subnet mask] and [Gateway] manually.

[IP address]:

(IP address display and setting)

Enter an IP address when DHCP server is not used.

[Subnet mask]:

(Subnet mask display and setting)

Enter a Subnet mask when DHCP server is not used.

[Gateway]:

(Gateway address display and setting)

Enter a gateway address when DHCP server is not used.

Note

- When [DHCP] is set to [On], the IP address, etc. will be displayed in grey.

Entering numbers

- Select the address and press <ENTER>.
- Select digits with ◀▶.
- Change numbers with ▲▼.
- Press <ENTER>.

You can cancel the change by pressing <RETURN>.

② Select [Save] and press <ENTER>.

Save the current network Setup.

Note

- To use a DHCP server, make sure the DHCP server is started.
- Contact your network administrator for details on [IP address], [Subnet mask] and [Gateway].
- Shipping condition

[DHCP]: Off

[IP address]: 192.168.0.8

[Subnet mask]: 255.255.255.0

[Gateway]: 192.168.0.1

[Port]

Set the port number used for command control.

Select [Port] and press <ENTER> to set the number.

- The available setting range is 1024 – 65535.
- Entering numbers (see page 60)

Note

- When the PLink protocol is used, the port setting is not necessary.

[MAC address]

Displays the MAC address of this unit.

■ [Network status]

Checks the current Network settings status.

Network status	
DHCP	Off
IP address	192.168.0.8
Subnet mask	255.255.255.0
Gateway	192.168.0.1
MAC address	12:34:56:78:9A:BC

■ [DIGITAL LINK mode]

(TH-65SF2E only)

Switches communication method of DIGITAL LINK terminal.

[Auto]:

Communication method is selected automatically. HDMI, LAN, serial communication are possible. Ethernet connection is possible.

[DIGITAL LINK]:

HDMI, LAN, serial communication are possible via a twisted pair cable transmitter.

[Ethernet]:

LAN communication is possible via the LAN terminal of the display.

[Long reach]:

Communication method is fixed to Long reach.

Modes allowing communication

✓ : Valid

— : Invalid

Settings		Communication validity			
		Picture transmission		Ethernet	RS-232C
		100 m	150 m		
Auto	For DIGITAL LINK	✓	—	✓	✓
	For Long reach	—	✓	✓	✓
	For Ethernet	—	—	✓	—
DIGITAL LINK		✓	—	✓	✓
Long reach		—	✓	✓	✓
Ethernet		—	—	✓	—

Note

- When connected with the [Long reach] communication method, the maximum transmission distance is 150 m. In this case, this unit can receive the signals of up to 1080/60p (148.5 MHz).
- If the communication method of the twisted pair cable transmitter is set to [Long reach], set [DIGITAL LINK mode] to [Auto]. Then, connection is enabled with the [Long reach] communication method.

When connecting with the separately sold DIGITAL LINK Switcher (ET-YFB200G) with the [Long reach] communication method, set [DIGITAL LINK mode] to [Long reach].

- Even if [DIGITAL LINK mode] is set to [Long reach], when the twisted pair cable transmitter does not support the communication method of [Long reach], it will not be connected properly.

■ DIGITAL LINK status

(TH-65SF2E only)

Display the DIGITAL LINK connection environment.

Select [DIGITAL LINK status] with ▲ ▼ and press <ENTER>.

DIGITAL LINK status	
LINK status	No link
HDMI status	No HDMI
Signal quality	
Min	-XX dB
Max	-YY dB

[LINK status]:

1 of the followings will be displayed.

[No link]:

No LAN connection, etc.

[DIGITAL LINK]:

Connected to the DIGITAL LINK device by LAN.

[Long reach]:

Communication method is set to [Long reach] and is connected to the DIGITAL LINK device by LAN.

[Ethernet]:

The PC is connected to the DIGITAL LINK / LAN terminal of this product and is LAN connected.

[HDMI status]:

Displays the connection status of the HDMI format.

1 of the followings will be displayed.

[No HDMI]:

DIGITAL LINK not connected

[HDMI on]:

DIGITAL LINK connected

[HDCP on]:

HDCP supported on DIGITAL LINK

[Signal quality]:

It is the quantified minimum and maximum numbers of errors that have occurred. The display colours are red, yellow, or green, depending on the number.

Signal quality	Display Colours	Reception Status
-12dB or below	Green	Good
-11 to -8dB	Yellow	Bad
-7dB or above	Red	Terrible

- The number is represented by yellow or red if the LAN cable is disconnected or the cable is not shielded.
- This signal quality shows figures between the twisted pair cable transmitter that is connected and the display.

■ DIGITAL LINK menu

(TH-65SF2E only)

Displays the setting menu of Digital Interface Box.

Select [DIGITAL LINK menu] with ▲ ▼ and press <ENTER>.

Note

- This function can only be selected when the Panasonic device that supports DIGITAL LINK output (ET-YFB100G, ET-YFB200G) is connected to a DIGITAL LINK / LAN terminal and its power is on.
- For details, refer to the manuals of the devices that support DIGITAL LINK output.

■ [AMX D. D.]

Set whether to allow the Display to be detected by AMX Device Discovery.

[On]:

Enables detection by AMX Device Discovery.

[Off]:

Disables detection by AMX Device Discovery.

- For more details, visit the following web site.
<http://www.amx.com/>

■ [Crestron Connected™]

When this function is set to [On], the Display can be monitored or controlled via the network using equipment and application software of Crestron Electronics, Inc.

This Display supports the following application software from Crestron Electronics, Inc.

- RoomView® Express
- Fusion RV®
- RoomView® Server Edition

[Crestron Connected™] is a function to connect to a system developed by Crestron Electronics, Inc. which manages and controls multiple system devices connected to the network.

- For details of "Crestron Connected™", refer to the Crestron Electronics, Inc. web site (Provided only in English).

<http://www.crestron.com/>

For the download of "RoomView® Express", refer to the Crestron Electronics, Inc. web site (Provided only in English).

<http://www.crestron.com/getroomview>

■ [Extron XTP]

Set to [On] when connecting XTP Transmitter made by Extron to DIGITAL LINK terminal.

- For more details on Extron, visit the following web site.

<http://www.extron.com>

■ [USB memory network settings]

Sets whether to permit the network setting using the USB memory device. (see page 114)

[Permit]:

Permits USB memory network settings.

[Prohibit]:

Prohibits USB memory network settings.

Note

- This function is set to [Permit] as factory default.
- Once the network setting is done with USB memory device, this function is set to [Prohibit].

■ [Reset]

You can reset the network setting to the factory default of the Display.

Select [Yes] with ◀▶ and press <ENTER>.

Note

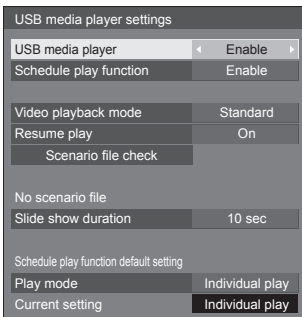

- The settings for [NTP synchronization], NTP server and [Time zone] will be reset to the factory default.

USB media player settings

Set for "USB media player".

For details of the function, refer to "USB media player" (see page 94).

[USB media player settings] - submenu screen

■ [USB media player]

Set to enable or disable the USB media player function.

■ [Schedule play function]

Enables/Disables the schedule playback function using "Content Management Software".

Note

- When [Schedule play function] is set to [Enable], if both the scenario file of the existing "USB media player" and the schedule file of this function are present, the [Schedule play function] operation takes priority.
- [USB media player] cannot be changed during the schedule playback mode.

■ [Video playback mode]

Sets the video playback mode.

If image disturbance occurs at the switching timing of motion picture files during playback in [Standard] mode, switch to [Adjust] mode.

[Standard]: Plays without a black image at the joint between video files.

[Adjust]: Plays with a black image (approx. 2 seconds) inserted at the joint between video files.

Note

- When using the Multi Media Player, a black screen is displayed for a certain period of time at the switching timing of motion picture files regardless of the [Video playback mode] settings.
- The display may be disturbed at the switching timing of files during playback in [Standard] mode.
- When the schedule playback is proceeding using "Content Management Software", [Video playback mode] can be switched both in single mode and multi mode.

■ [Resume play]

Set resume play off/on.

■ [Scenario file check]

Execute the contents check of the USB memory which is connected to the USB terminal. If any error is detected, the error code and file name will be displayed.

For details of the error codes, refer to "USB memory contents check". (see page 99)

Select [Scenario file check] with ▲▼ and press <ENTER>.

Note

- When the schedule playback is proceeding using "Content Management Software", [Scenario file check] is disabled.

■ [Slide show duration]

Select the displaying duration for still images.

[10 sec] – [600 sec]

Note

- When the schedule playback is proceeding using “Content Management Software, [Slide show duration] is disabled.

■ Play mode

Specifies the playback mode operating with [Schedule play function]. To apply this setting to the schedule playback operation, restart this unit.

Also, if the playback mode is specified for the schedule data of “Content Management Software” during the schedule playback, it takes priority.

[Individual play]:

Plays in the individual playback mode.

Content is played only on one display.

[Synchronize play]:

Plays in the synchronized playback mode.

Content is played on multiple displays in synchronization.

Note approx. 5 seconds of preparation time are added in switching content to synchronize the playback timing.

Note

- The synchronized playback operates properly only when [Date and time] - [Synchronize display] is set to [On] and the time is synchronized.
- [Current setting] shows [Play mode] when the schedule playback is performed by this unit.

Memory viewer settings

Set for “Memory viewer”.

For details of the function, refer to “Memory viewer” (see page 104).

[Memory viewer settings] - submenu screen

Memory viewer settings	
Memory viewer	Enable
View	Thumbnail
Content select	Video
Sort type	File name
Sort order	Ascending
Play method	None
Picture duration	10 sec
Auto display content info	On
Auto display operation guide	On

■ [Memory viewer]

Enables/Disables “Memory viewer”.

■ [View]

Sets the display format of the content in the USB memory device to the thumbnail display or the list display.

■ [Content select]

Sets the type of content to display.

[Picture]:

Displays still picture files only.

[Video]:

Displays motion picture files only.

[Music]:

Displays music files only.

[All]:

Displays all the files including still pictures, motion pictures and music files.

■ [Sort type]

Sets the order of content in combination with [Sort order].

■ [Sort order]

Sets the order of content in combination with [Sort type].

■ [Play method]

Sets the playback method of content.

[None]:

Automatically returns to the content display screen when the playback of the selected file has finished.

[Single]:

Plays the selected file repeatedly.

[All]:

Plays the content displayed on the content display screen repeatedly in displayed order.

[Random]:

Plays the content displayed on the content display screen at random.

■ [Picture duration]

Sets the display time of still picture files.

10 sec to 600 sec

■ [Auto display content info]

When this is set to [On], the content information is automatically displayed at the beginning of the content playback, and the information is automatically erased after a certain period of time.

■ [Auto display operation guide]

When this is set to [On], the operation guide is automatically displayed at the beginning of the content playback, and the information is automatically erased after a certain period of time.

The playback control (see page 106) is performed only while the operation guide is being displayed. If it is not displayed, the unit shows the operation guide without performing the playback control.

When this is set to [Off], the operation guide is not displayed at the beginning of the content playback. The playback control is performed regardless of Show/Hide of the operation guide.

Note

- When [Play method] is set to [Single], playback information and operation guide are automatically displayed only at the beginning of the first playback of content.
- This menu will be greyed out and cannot be set while content is being played.

Function button settings

Assigns specific functions to the numeric buttons (<1> to <6>). The buttons can be used as shortcut keys by assigning frequently used operations.

1 Switch [Function group] with ◀▶.

[Function button settings] - submenu screen

2 Select the numeric button with ▲▼ and set the function to assign with ▶.

■ Functions assignable to the numeric buttons

[Input] (Direct input select)

Input can be selected with single-touch operation.

[HDMI1] / [HDMI2] / [DIGITAL LINK] / [DVI-D] / [PC] / [VIDEO] / [USB] / [MEMORY VIEWER]

[Memory load]

Memory can be loaded with single-touch operation. Refer to "Memory load". (see page 45)

[MEMORY1] to [MEMORY6]

- [MEMORY1] to [MEMORY6] load functions are already assigned to <1> to <6> respectively. These settings cannot be changed.

[Shortcut]

[Signal], [Screensaver], [Set up timer], [Power management settings], [Network settings], [Multi display settings]

- Pressing the numeric button displays the menu screen. Pressing the button again exits the menu screen.

[AV mute]

- Pressing the numeric button mutes the audio and pictures.

To cancel, press any button on the remote control except the <Standby (ON/OFF) button>.

[Digital zoom]

- Switches to [Digital zoom] mode by pressing numeric buttons. (see page 35)

[Display ID / Display name]

- Pressing the numeric button enlarges [Display ID] and [Display name].

[HDMI-CEC operation]

- Press the numeric buttons to display the operation screen of the HDMI-CEC compatible device.

Shipping condition

The following functions are assigned to the numeric buttons as factory default.

TH-65SF2E

	[Input]	[Memory load]	[Shortcut]
1	HDMI1	MEMORY1	[Signal]
2	DIGITAL LINK	MEMORY2	[Screensaver]
3	DVI-D	MEMORY3	[Set up timer]
4	PC	MEMORY4	[Network settings]
5	USB	MEMORY5	[AV mute]
6	MEMORY VIEWER	MEMORY6	[HDMI-CEC operation]

TH-65SF2U, TH-55SF2U, TH-49SF2U, TH-43SF2U, TH-55SF2E, TH-49SF2E, TH-43SF2E

	[Input]	[Memory load]	[Shortcut]
1	HDMI1	MEMORY1	[Signal]
2	HDMI2	MEMORY2	[Screensaver]
3	DVI-D	MEMORY3	[Set up timer]
4	PC	MEMORY4	[Network settings]
5	USB	MEMORY5	[AV mute]
6	MEMORY VIEWER	MEMORY6	[HDMI-CEC operation]

■ [Function button guide]

Sets the function display when numeric buttons are pressed. Set this for each function group.

[On]:

Displays the function list for the numeric buttons.

[Off]:

Does not display the function list. Operation starts when numeric buttons are pressed.

Note

- When <FUNCTION> is pressed, [Function button guide] will be displayed regardless of the [On] / [Off] settings.

■ To use shortcut (numeric buttons)

1 Press <FUNCTION> or <1> – <6>.

[Function button guide] will be displayed.

[Function button guide]: When [Off] is set, pressing the numeric button starts operation.

Example: Input

2 Press <FUNCTION> to switch function group.

Example: Memory load

3 Press <1> – <6>.

The function for the pressed button starts to operate.

Example: When <2> is pressed.

Display orientation

Sets the on-screen display orientation in the portrait setting.

[Landscape]:

On-screen display angle is for horizontal installation.

[Portrait]:

The on-screen display rotates clockwise by 90 degrees for easy view in the portrait setting.

Note

- In the portrait setting, the power indicator shall come to the upper side.

Image rotation

Sets the picture rotation in the portrait setting.

[Off]:

Pictures are not rotated.

[180 degrees]:

Pictures are rotated 180 degrees.

Note

- This function does not operate when [Display orientation] is [Landscape].

OSD position

Sets the display position of the on-screen menu.

Each time ◀ or ▶ is pressed, the display position of the on-screen menu changes.

Display example:

Menu display duration

Sets the display duration time for the on-screen menu.

[5 sec] – [180 sec]

Menu transparency

Sets the transparency rate of the on-screen display background.

0 – 100

Options Adjustments

This unit offers special functions conveniently used according to the installation location and application.

■ Remote control

1 Press <SETUP>.

[Setup] menu screen will be displayed.

2 Select [OSD language] with ▲ ▼ and press <ENTER> for more than 3 seconds.

Following screen will be displayed.

Options	
Display software information	
Software licenses	
USB data cloning	
LAN data cloning	
Shipping	

3 Select [Options] with ▲ ▼ and press <ENTER>.

[Options] menu screen will be displayed.

Options		1/3
Input search		
Failover/Failback		
Audio input select		
Onscreen display	On	
Initial input	Off	
Initial VOL function	Off	
Initial VOL level	0	
Maximum VOL function	Off	
Maximum VOL level	0	
Input lock	Off	
Button lock	Off	
Controller user level	Off	
PC auto setting	Off	

Options		2/3
Off-timer function	Enable	
Initial startup	Last memory	
Display ID	0	
Controller ID function	Off	
Serial ID function	Off	
Serial response(Normal)	Off	
Serial response(ID all)	Off	
Serial daisy chain position	---	
LAN control protocol	Protocol 2	
Information timing		

Options		3/3
Power on screen delay	Off	
Clock display	Off	
Power on message(No activity power off)	On	
Power on message(Power management)	On	
POWER button lock	Off	

Note

- [POWER button lock] function is only for TH-65SF2U, TH-55SF2U, TH-49SF2U and TH-43SF2U.

4 Select the item to set with ▲ ▼.

For [Input search], [Failover/Failback], [Audio input select] and [Information timing], the submenu screen will be displayed when you press <ENTER>.

(see page 68, 75)

5 Set with ◀▶.

6 Press <SETUP> to exit from [Options] menu.

■ Unit

1 Press <MENU (Unit)> for several times and display the [Setup] menu.

2 Select [OSD language] with ▲ ▼, and then press and hold <ENTER (Unit)> for more than 5 seconds.

3 Select [Options] with ▲ ▼ and press <ENTER (Unit)>.

[Options] menu screen will be displayed.

4 Select the item to set with ▲ ▼.

For [Input search], [Failover/Failback], [Audio input select] and [Information timing], the submenu screen will be displayed when you press <ENTER>.

(see page 68, 75)

5 Set with <- (Unit)> or <+ (Unit)>.

6 Press <MENU (Unit)> for several times to exit from [Options] menu.

Note

- Press <RETURN> to return to the previous menu.
- The serial number and the software version of this unit are displayed when [Display software information] is selected in step 3.
- The software License is displayed when [Software licenses] is selected in step 3.

Input search

When a signal is not detected, another input with a signal is automatically selected.

Note

- MEMORY VIEWER input is not a subject of the “no signal” detection. It is excluded from this function.

Select the item with ▲ ▼.

Select the set point with ◀ ▶.

Input search	
Input search	◀ Custom ▶
1st search input	(None)
2nd search input	(None)

[Input search]

[Off]:

When there is no signal, the input is not switched automatically.

[All inputs]:

Searches all inputs and switches to an input with a signal.

Input search is executed in the following order.

(Example) When the current input is [HDMI1]

[HDMI2] → [DIGITAL LINK] → [DVI-D] → [PC] → [VIDEO] → [USB] → [HDMI1]

Note

- The inputs set to [(Skip)] in [Input label] (see page 51) are skipped when searching.

[Custom]:

Repeatedly searches [Current input], [1st search input] and [2nd search input] in order, and switches to an input with a signal.

[Input detection]:

Monitors the following inputs set to [On], detects the status change from no signal to signal present, and switches to the input.

[HDMI1], [HDMI2], [DIGITAL LINK], [DVI-D], [PC]

[Searching...] is displayed during the input search.

[1st search input], [2nd search input]

Set the input to search when [Custom] is selected.

[HDMI1] / [HDMI2] / [DIGITAL LINK] / [DVI-D] / [PC] / [VIDEO] / [USB] / (None)

[Detect digital input]

Sets the digital input to monitor during [Input detection].

[HDMI1] / [HDMI2] / [DIGITAL LINK] / [DVI-D]

[Changing delay]

Sets the delay time until the input is switched during [Input detection].

[Off]:

Switches the input if a signal is interrupted even for a very short period.

1 – 10:

Sets the delay time (sec.).

Switches the input when the set time has elapsed after detecting no signal is present.

However, if the detection period during which no signal is present is shorter than the set delay time, the input is not switched.

Note

- When set to the USB input, the unit determines no signal is present if the USB memory is not connected to the USB terminal.
In addition, even when a USB memory is connected, if there is no playable file, the unit determines no signal is present.
- This menu will be greyed out and cannot be set under the following conditions.
 - [Input lock] is not set to [Off]. (see page 73)
 - When [Setup] - [Image settings] - [No signal image settings] - [Display setting] is set to [On]. (see page 54)
- If the input is changed by this function, the last input is selected when the power is turned on next time.

If you wish to retain the original input when the power is turned on, set [Initial input] to the original input. (see page 72)

- [Input detection] is the function that automatically switches the input as below by monitoring the presence of signal for the set input.
 - If a video signal is input to the set input that is not displayed (When the status has changed from signal absent to signal present.), the input is selected and switched.
 - If no signal is detected for the displayed input, the setting switches to the set input to which a signal is input. Also, if no signal is present for the displayed input when the power is turned on or when the input is switched, the setting switches to the set input to which a signal is input. When signals are input to multiple set inputs, the priority order as default (immediately after power-on) is as follows:
[HDMI1], [HDMI2], [DIGITAL LINK], [DVI-D], [PC]
In the other case (When the input is switched after power-on), the input displayed last takes priority.

- [Changing delay] is the function to prevent the accidental input switch during a short period, such as when the signal is interrupted due to the frequency change for the input signal while [Input detection] is operating.

If a signal is detected again within the set period (sec.), the input is not switched.

- [Input detection] may not operate correctly depending on the image playback device.

Failover/Failback

Automatically switches to the backup input if an interruption of video occurs.

Note

- MEMORY VIEWER input is excluded from this function.

1 Select the item with ▲ ▼.

Select the set point with ◀ ▶.

[Input change mode]

[Off]:

Disables the Backup Input function.

[Quick]:

Promptly switches to the backup input if an interruption of video occurs.

The backup video signal needs to be in the same format as the (main) input in use for viewing.

Upon switching to the backup input, the video and audio adjustment values for the (main) input used for viewing will be inherited.

[Normal]:

Switches to the backup input if an interruption of video occurs.

The backup video signal does not need to be in the same format as the (main) input in use for viewing.

Upon switching to the backup input, the video and audio adjustment values for the backup input will be used.

■ [Input change mode]: [Quick]

Promptly switches to the backup input if an interruption of video occurs, and enables switching between digital (HDMI1 / HDMI2 / DIGITAL LINK / DVI-D) inputs.

Note

- The backup video signal needs to be in the same format as the (main) input in use for viewing.
- Upon switching to the backup input, the video and audio adjustment values for the (main) input used for viewing will be inherited.
- This function will start operating once a video signal is detected by both the input in use for viewing and the backup input and the [Backup input change] item is displayed as [Active].
- This function may not operate correctly depending on the image playback device.

[Primary backup input]

Sets the first priority backup input.

(None) / [HDMI1] / [HDMI2] / [DIGITAL LINK] / [DVI-D]

The input name that is of the same type as the one in use for viewing will be greyed out.

[Secondary backup input]

Sets the second priority backup input.

(None) / [HDMI1] / [HDMI2] / [DIGITAL LINK] / [DVI-D]

The input name that is of the same type as the one in use for viewing will be greyed out.

[Auto switch back mode]

Sets whether or not to automatically return to the former (main) input when the former input video initially viewed is restored while viewing the video of the backup input enabled by the operation of the Backup Input function.

[Disable]:

Unreturned

[Enable]:

Returned

[Changing mode]

Select speed of input switching.

[High speed]:

If switching between the same signal formats, it is possible to switch within 1 second.

If switching between the different signal formats, picture noise is caused.

[Normal speed]:

If switching between the same signal formats, it is possible to switch within 2 seconds.

If switching between the different signal formats, it takes 3 to 4 seconds to switch but picture noise is not caused.

[Backup input change]

Displays whether or not operating conditions for the Backup Input function are met.

[Inactive]:

Indicates that the conditions are not met, and inactivates the Backup Input function.

[Active]:

Indicates that the conditions are met, and activates the Backup Input function.

[Main input]

Displays the (main) input set by switching input.

[Current input]

Displays whether the input currently in use for viewing is the (main) input set by switching input or the backup one.

Setting conditions

The following table describes restrictions (available combinations) on each setting item.

		Main		
		HDMI1 HDMI2 DIGITAL LINK DVI-D	PC VIDEO	USB
Backup	HDMI1 HDMI2 DIGITAL LINK DVI-D	○	×	×
	PC VIDEO	×	×	×
	USB	×	×	×

○: Selectable for both Primary and Secondary.

×: Not selectable for neither Primary nor Secondary.

Recall display

Pressing <RECALL> displays any of the followings.

- When the main input is being used for viewing and the operating conditions for the Backup Input function are met.

- When the backup input, enabled by the operation of the Backup Input function, is being used for viewing.

When the conditions for the Backup Input function are met, the following screen is displayed.

■ [Input change mode]: [Normal]

Switches to the backup input if an interruption of video occurs.

Note

- When an analogue (PC or VIDEO) input is being used for viewing, you cannot set an analogue (PC or VIDEO) input as a backup input.
- Any analogue (PC or VIDEO) input cannot be set as [Primary backup input] or [Secondary backup input].
- This function will start operating once a video signal is detected by both the input in use for viewing and the backup input and the [Backup input change] item is displayed as [Active].

[Primary backup input]

Sets the first priority backup input.

[None] / [HDMI1] / [HDMI2] / [DIGITAL LINK] / [DVI-D] / [PC] / [VIDEO] / [USB]

The input that is of the same type as the one in use for viewing will be greyed out.

When an analogue (PC or VIDEO) input is being used for viewing, you cannot set an analogue (PC or VIDEO) input as a backup input.

Any analogue (PC or VIDEO) input cannot be set as [Primary backup input] or [Secondary backup input].

[Secondary backup input]

Sets the second priority backup input.

[None] / [HDMI1] / [HDMI2] / [DIGITAL LINK] / [DVI-D] / [PC] / [VIDEO] / [USB]

The input that is of the same type as the one in use for viewing will be greyed out.

When an analogue (PC or VIDEO) input is being used for viewing, you cannot set an analogue (PC or VIDEO) input as a backup input.

Any analogue (PC or VIDEO) input cannot be set as [Primary backup input] or [Secondary backup input].

[Auto switch back mode]

Sets whether or not to automatically return to the former (main) input when the former input video initially viewed is restored while viewing the video of the backup input enabled by the operation of the Backup Input function.

[Disable]:

Unreturned

[Enable]:

Returned

[Backup input change]

Displays whether or not operating conditions for the Backup Input function are met.

[Inactive]:

Indicates that the conditions are not met, and inactivates the Backup Input function.

[Active]:

Indicates that the conditions are met, and activates the Backup Input function.

[Main input]

Displays the (main) input set by switching input.

[Current input]

Displays whether the input currently in use for viewing is the (main) input set by switching input or the backup one.

Setting conditions

The following table describes restrictions (available combinations) on each setting item.

		Main		
		HDMI1 HDMI2 DIGITAL LINK DVI-D	PC VIDEO	USB
Backup	HDMI1 HDMI2 DIGITAL LINK DVI-D	○	○	○
	PC VIDEO	△	×	△
	USB	○	○	×

○: Selectable for both Primary and Secondary.

△: Selectable for either Primary or Secondary.

×: Not selectable for neither Primary nor Secondary.

Recall display

Pressing <RECALL> displays any of the followings.

- When the main input is being used for viewing and the operating conditions for the Backup Input function are met.

- When the backup input, enabled by the operation of the Backup Input function, is being used for viewing.

When the conditions for the Backup Input function are met, the following screen is displayed.

Note

- This menu will be greyed out and cannot be set under the following condition.
 - [Input search] is set to the item other than [Off]. (see page 68)
- When set to the USB input, the unit determines video signals are interrupted by judging the USB memory is not connected to the USB terminal.
- This function may not operate correctly depending on the image playback device.

Audio input select

Set up the sound when a video input is selected.

1 Select the video input with ▲ ▼.

Set the audio input with ◀ ▶.

- The illustration above shows the factory settings.

Video input	Audio input
HDMI1	HDMI1 / AV IN / No audio
HDMI2	HDMI2 / AV IN / No audio
DIGITAL LINK	DIGITAL LINK / AV IN / No audio
DVI-D / PC / VIDEO	AV IN / No audio

No audio: No audio input (Mute)

When the setting for the audio input has been changed from the factory settings, the audio input is displayed as below.

Onscreen display

Set to display / hide the following Onscreen display.

- Power on display
- Input signal switch display
- No signal display
- No external media display (at USB input)
- MUTE display after displaying the menu screen
- Off timer remaining time display when 3 minutes remaining

[On]:

Displays the Onscreen display.

[Off]:

Hides the Onscreen display.

Initial input

Adjusts the input signal when the unit is turned on.

[Off] / [HDMI1] / [HDMI2] / [DIGITAL LINK] / [DVI-D] / [PC] / [VIDEO] / [USB] / [MEMORY VIEWER]

Note

This menu is available only when [Input lock] is [Off]. (see page 73)

Initial VOL function

Enables/Disables [Initial VOL function] when the unit is turned on.

[Off]:

It will be the sound volume level which had been set before the power of the unit was turned off.

[On]:

It will be the sound volume level set for [Initial VOL level].

Initial VOL level

Sets the sound volume when [Initial VOL function] is enabled.

Note

- Outputs with the set volume when [Initial VOL function] is [On].
- When [Maximum VOL function] is [On], the volume cannot be set to the level higher than the level set for [Maximum VOL level].

Maximum VOL function

Enables/Disables [Maximum VOL function].

[Off]:

The sound volume level can be set up to 100 (maximum).

[On]:

The volume cannot be set to the level higher than the level set for [Maximum VOL level].

Maximum VOL level

Sets the sound volume when [Maximum VOL function] is enabled.

Note

- Outputs with the set volume when [Maximum VOL level] in [On] state is selected on the menu.
- When the [Maximum VOL function] is switched from [Off] to [On], if the [Maximum VOL level] is set lower than the [Initial VOL level], the [Initial VOL level] automatically becomes the same as the [Maximum VOL level].

Input lock

Locks the input switch operation.

[Off] / [HDMI1] / [HDMI2] / [DIGITAL LINK] / [DVI-D] / [PC] / [VIDEO] / [USB] / [MEMORY VIEWER]

Note

- Input switch can be used when this is set to [Off].

Button lock

Limits operation of the buttons on the unit.

[Off]:

All the buttons on main unit can be used.

[On]:

All button operations except for the <Main Power On / Off button> are disabled.

[MENU & ENTER]:

Locks <MENU (Unit)> and <ENTER (Unit)> buttons.

■ To set [Button lock]

Set with the buttons on the unit.

[Off]:

- ① Press <+ (Unit)> for 4 times.
- ② Press <INPUT (Unit)> for 4 times.
- ③ Press <- (Unit)> for 4 times.
- ④ Press <ENTER (Unit)>.

[On]:

- ① Press <- (Unit)> for 4 times.
- ② Press <ENTER (Unit)> for 4 times.
- ③ Press <+ (Unit)> for 4 times.
- ④ Press <ENTER (Unit)>.

[MENU & ENTER]:

- ① Press <ENTER (Unit)> for 4 times.
- ② Press <+ (Unit)> for 4 times.
- ③ Press <INPUT (Unit)> for 4 times.
- ④ Press <ENTER (Unit)>.

Note

- About how to reset the settings to defaults: "Initialization" (see page 77)

Controller user level

Limits operation of the buttons on the remote control.

[Off]:

You can use all of the buttons on the remote control.

[User1]:

You can only use <Standby (ON/OFF) button>, <INPUT>, <RECALL>, <MUTE>, <VOL +> and <VOL -> buttons on the remote control.

[User2]:

You can only use <Standby (ON/OFF) button> on the remote control.

[User3]:

Locks all the buttons on the remote control.

Note

- About how to reset the settings to defaults: "Initialization" (see page 77)

PC auto setting

Sets the operational mode of the automatic position adjustment in the [Position] menu.

[Off]:

Automatic position adjustment starts when <AUTO SETUP> is pressed on the remote control or automatic position adjustment is executed from the [Position] menu.

[On]:

Other than remote control or menu operation, automatic position adjustment starts:

- When the display power is turned ON.
- When the input signal is switched.

Off-timer function

Enables / disables Off timer function.

[Enable]:

Enables the [Off-timer function].

[Disable]:

Disables the [Off-timer function].

Note

- When [Disable] is set, the Off-timer is cancelled.

Initial startup

Sets the power mode of the unit for when the power recovers from failure or after plugging off and in again.

[Last memory]:

Power returns in as the same state as before the power interruption.

[On]:

Power returns in power On.
(Power Indicator: green)

[Standby]:

Power returns in standby mode.
(Power Indicator: red/orange)

Note

- When using multiple displays, [Standby] is preferred to be set in order to reduce a power load.

Display ID

Sets ID number when controlling the Display with [Controller ID function] and [Serial ID function].

0 – 100 (Standard value: 0)

Controller ID function

Enables/Disables the ID remote control function.

To operate this function, please purchase ID remote controller sold separately. (see page 115)

[Off]:

Disables the ID remote control function. (Can be operated as normal remote control.)

[On]:

Enables the ID remote control function.
Effective on switching to [On].

Note

- To use the ID remote control function, setting ID numbers both for the remote control and for the display unit is required.

For ID number setting for the remote control and display unit, see page 115 and [Display ID] respectively.

- About how to reset the settings to defaults: "Initialization" (see page 77)

Serial ID function

Set to control external control with the PC connected to SERIAL terminal according to the Display's ID number (Panel ID).

[Off]:

Disables external control by the ID.

[On]:

Enables the external control by the ID.

Serial response(Normal)

Sets whether to send the response command to normal commands without ID.

[Off]:

Does not respond. (Including the inquiry command)

[On]:

Responds.

Serial response(ID all)

Sets whether to respond to the command or not, when serial command of ID No "0" is received.

[Off]:

Does not respond.

[On]:

Responds.

Serial daisy chain position

Set the first and last terminals in the chain when the SERIAL IN/OUT terminal of this unit is connected using a daisy chain scheme.

[---]:

When controlling this unit alone with serial control, or connecting at a position other than the first and last terminals in a daisy chain

[Top]:

When connecting at the first terminal in a daisy chain

[End]:

When connecting at the last terminal in a daisy chain

LAN control protocol

Select the LAN control protocol.

[Protocol 1]:

Control with the Panasonic Display sequence.

[Protocol 2]:

Control with the sequence that is compatible with Panasonic Projector.

Note

- For PJLink and WEB browser control, the operation is possible regardless of the setting.
- When operating the “Early Warning Software” or “Multi Monitoring & Control Software”, select [Protocol 2].

Information timing

Set up the informing manner for no signal or temperature rising.

During RS-232C controls:

Warning or error message sent from the display automatically.

During LAN controls:

Acquire the warning or error message from the display.

1 Select the item with ▲ ▼.

Select the set point with ◀ ▶.

Information timing	
No signal warning	On
No signal warning timing	5min
No signal error	On
No signal error timing	10min
Temperature warning	On

[No signal warning]

When set to [On], the display sends out the no signal warning.

[No signal warning timing]

Set up the detecting time for no signal warning.
(Range: 01 – 60, Interval: 1 minute)

[No signal error]

When set to [On], the display sends out the no signal error.

[No signal error timing]

Set up the detecting time for no signal error.
(Range: 01 – 90, Interval: 1 minute)

- The warning of [No signal warning] and the error of [No signal error] are not sent when the no signal state is detected through any of the following functions:

[No signal power off], [HDMI1 power management], [HDMI2 power management], [DIGITAL LINK power management], [DVI-D power management], [PC power management] (see page 51)

Setting Example:

- If there is no signal when [PC IN] is input, [PC power management] is activated first and the Display enters the standby mode.

[No signal warning timing]: 5 minutes

[No signal error timing]: 10 minutes

[PC power management]: [On] (60 seconds)

Note

- The [No signal error timing] cannot be set shorter than [No signal warning timing].
- Even when a USB memory is connected, if there is no playable file, the unit determines no signal is present.

[Temperature warning]

When set to [On], the display sends out the warning message.

Power on screen delay

You can set the power-on delay time of the displays to reduce the power load, when you press <Main Power On / Off button> to turn on the multiple displays that are set together.

Set each display's setting individually.

[Off]:

The display will be turned on at the same time as <Main Power On / Off button> is pressed.

[Auto]:

Sets the delay time automatically according to the number set for [Display ID].

The delay time is determined by multiplying [Display ID] × 0.3 seconds.

Example:

When [Display ID] is 3 → 0.9 seconds

1 – 30:

Set the power-on delay time (second).

After pressing <Main Power On / Off button>, the display will be powered on with time delay depending on this setting.

Note

- While this function is working, the power indicator is blinking green.
- This function also works when the power recovers from failure or after plugging off and in again the power cord.

Clock display

Sets to display / hide the clock.

[Off]:

Hides the clock.

[On]:

Displays the clock.

Note

- The clock is displayed at the lower left of the screen when <RECALL> button is pressed.
Display duration is approx. 5 seconds.
- When current date and time is not set, the clock is not displayed even when [Clock display] is [On]. (see page 57)

Power on message(No activity power off)

Sets to show/hide [No activity power off] precautions when the power is turned on.

[On]:

The warning precautions are shown when the power is turned on.

[Off]:

The warning precautions are not shown when the power is turned on.

Note

- This setting is enabled only when [No activity power off] is [Enable] (see page 55).

Power on message(Power management)

Sets to show/hide an information message that tells the power has been turned off by "Power management" function when the power is turned on.

[On]:

The information is shown when the power is turned on.

[Off]:

The information is not shown when the power is turned on.

Note

- This setting is enabled only when "Power management" function is [On] (see page 51).

POWER button lock

Sets the lock setting for the display <Main Power On / Off button>.

[On]:

<Main Power On / Off button> operation is disabled.

[Off]:

<Main Power On / Off button> operation is enabled.

Note

- This function is only for TH-65SF2U, TH-55SF2U, TH-49SF2U and TH-43SF2U.

Initialization

When both main unit buttons and remote control buttons are disabled due to the [Button lock], [Controller user level] and [Controller ID function] settings, set all the values [Off] so that all the buttons are enabled again.

Press <- (Unit)> together with <RETURN> and hold for more than 5 seconds.

[Shipping] is displayed and the lock is released when it disappears.

- Settings for [Button lock], [Controller user level] and [Controller ID function] will be back to [Off].

Using Network Function

This unit has a network function and you can control the Display connected to the network using your computer.

Necessary environment for computers to be connected

First of all, confirm your computer whether it has a wired LAN.

Before connecting the Display to the computer, be sure to check the following settings.

Check 1: About LAN cable

- Connect the cable properly.
- Use LAN cable that is compatible with category 5 or above.

Check 2: Wired LAN settings

Computer with a built-in wired LAN function

- Switch on the wired LAN.

Computer without a built-in wired LAN function

- Check that your wired LAN adapter is recognized properly and it is switched on.
- Install the wired LAN adapter driver beforehand.

For details on how to install the driver, refer to the instructions accompanying the wired LAN adapter.

About Web Browser

Web Browser is necessary to use WEB control.

- Compatible OS:
Windows, Mac OS
- Compatible Web Browser:
Internet Explorer 7.0 / 8.0 / 9.0 / 10.0 / 11.0 (Windows)
Safari 4.x / 5.x / 6.x (Mac OS)

Example of network connection

Note

- To use the network function, set each item in [Network settings] and make sure to set [Network control] to [On].

(see page 59)

When it is set to [On], power indicator lights orange under the condition of power "Off" with remote control (stand-by state).

LAN Terminal connection

*1: TH-65SF2E

*2: TH-65SF2U, TH-55SF2U, TH-49SF2U, TH-43SF2U, TH-55SF2E, TH-49SF2E, TH-43SF2E

① Display (Back of the unit)

② PC

③ DIGITAL LINK / LAN Terminal

④ LAN cable (commercially available)

⑤ Hub or broadband router

Note

- For LAN cable, use shielded cable, otherwise picture noise may be caused.
- Make sure the broadband router or hub supports 100BASE-TX.
- Touching the LAN Terminal with a statically charged hand (body) may cause damage to the device due to its discharge.

Do not touch the LAN Terminal or the metal part of the LAN cable.

- For instructions on connection, consult your network administrator.

■ DIGITAL LINK Terminal connection

A twisted pair cable transmitter, such as the Panasonic device that supports DIGITAL LINK output (ET-YFB100G, ET-YFB200G) uses twisted pair cables to transmit inputted video and audio signals, and these digital signals can be input to the Display via the DIGITAL LINK terminal.

1 Display (Back of the unit)

2 PC

3 DIGITAL LINK / LAN Terminal

4 LAN cable (commercially available)

5 Example: Panasonic ET-YFB100G

6 Hub or broadband router

Note

- When using a DIGITAL LINK connection, set each item in [Network settings]. (see page 59)

Precautions for use while connecting with a twisted pair cable transmitter

About installation / connection

- Ask a professional or the dealer to carry out the cable wiring work for DIGITAL LINK connections. Insufficient wiring work may cause the inability to apply the cable transmission characteristics and cropped or fuzzy images and sounds.
- The transmission distance between the twisted pair cable transmitter and the device is normally up to 100 meters. When the transmitter supports [Long reach] communication method, the transmittable distance is up to 150 m. Please note that if exceeding the limit, video or audio may be interrupted, or malfunction may be caused during LAN communication. Furthermore, when connecting using [Long reach] communication method, depending on the specification of the transmitters, transmittable video signals or the distance may be limited.
- Do not use a hub between the twisted pair cable transmitter and the device.
- When connecting the Display using the twisted pair cable transmitter (receiver) of other manufacturer, do not use another twisted pair cable transmitter between the twisted pair cable transmitter of other manufacturer and this device. The images and sounds may be interrupted or become unstable.
- If possible, lay the cable extended and not coiled in order to minimize both external and internal noise.
- Lay out cables of the twist pair cable transmitter and this product away from other cables, especially from the power supply cable.
- When laying multiple cables, keep them together as close as possible running parallelly and not bundled.
- After laying the cable(s), check that the signal quality in [DIGITAL LINK status] is -12 dB or below.

About Twisted pair cables

- Between the twisted pair cable transmitter and the device, use a LAN cable that conforms to the following conditions.
 - It meets or exceeds CAT5e standards
 - It is a straight cable
 - It is a shielded cable (with a connector)
 - It is a solid cable
- When laying the cable(s), use an instrument such as a cable tester or cable analyser and check whether the cable characteristics are CAT5e or above. When using a relay connector along the path, also include this in the measurements.
- Do not pull cables hard. Also, avoid bending or folding them forcefully.

Other

- This device is compatible with Panasonic devices that support DIGITAL LINK output (ET-YFB100G, ET-YFB200G). For the twisted pair cable transmitter of other manufacturers, see the web site:
https://panasonic.net/cns/prodisplays/solutions/digital_link/compatible_equipment/
- Panasonic has tested other manufacturers' devices according to our check items. This will not guarantee all the operations. For operation and performance defects caused by other manufacturers' devices, contact each manufacturer.

Command control

Network function of the unit can control the unit in the same way as serial control from a network.

Supported commands

Commands used in the serial control are supported. (see page 24)

Control Command via LAN

The communication differs whether [Options] - [LAN control protocol] is set to [Protocol 1] or [Protocol 2].

1. When [LAN control protocol] is set to [Protocol 1].

Communicates using the display-specific protocol.

■ When the WEB control administrator privileges password has been set (Protect mode)

Connection method

- 1 Obtain the display's IP address and the port number (Default is 1024), and request connection to the display.

The IP address and the port number can be obtained from the following menus.

- IP address:
[Setup] → [Network settings] → [LAN setup] or [Network status]
- Port number:
[Setup] → [Network settings] → [LAN setup]
- For more detail of the settings, see page 59.

- 2 The display responds.

Response data

Data part	Space	Mode	Space	Random number part	Last terminal symbol
[PDPCTRL] (ASCII character string)	[] 0x20	[1] 0x31	[] 0x20	[zzzzzzzz] (ASCII code hex number)	(CR) 0x0d
10 bytes	1 byte	1 byte	1 byte	8 bytes	1 byte

Mode: 1 = Protect mode

- 3 Hash the following data with the MD5 algorithm, and generate a 32-byte hash value.

[zzzzzzzzzyyyyy]

zzzzzzzz :

8-byte random number obtained in step 2

yyyyy :

Password of the WEB control administrator privileges user

- Default user name and password are as follows:
User name: dispadmin
Password: @Panasonic

Command transmission method

Transmit in the following command format

Transmitted data

Header	Control symbol	Data part	Control symbol	Last terminal symbol
Hash value (see "Connection method")	(STX) 0x02	Control command (ASCII character string)	(ETX) 0x03	(CR) 0x0d
32 bytes	1 byte	Undefined	1 byte	1 byte

Received data

Control symbol	Data part	Control symbol	Last terminal symbol
(STX) 0x02	Control command (ASCII character string)	(ETX) 0x03	(CR) 0x0d
1 byte	Undefined	1 byte	1 byte

Error response

Error message	Last terminal symbol
"ERR1" : Undefined control command "ERR2" : Out of parameter range "ERR3" : Busy status or reception invalid period "ERR4" : Timeout or reception invalid period "ERR5" : Wrong data length "PDPCONTROL ERRA" : Mismatching of password	(CR) 0x0d
4 bytes or 15 bytes	1 byte

■ When the WEB control administrator privileges password has not been set (Non-protect mode)

Connection method

1 Obtain the display's IP address and the port number (Default is 1024), and request connection to the display.

The IP address and the port number can be obtained from the following menus.

- IP address:
[Setup] → [Network settings] → [LAN setup] or [Network status]
- Port number:
[Setup] → [Network settings] → [LAN setup]
- For more detail of the settings, see page 59.

2 The display responds.

Response data

Data part	Space	Mode	Last terminal symbol
[PDPCONTROL] (ASCII character string)	[] 0x20	[0] 0x30	(CR) 0x0d
10 bytes	1 byte	1 byte	1 byte

Mode:0 = Non-protect mode

Command transmission method

Transmit in the following command format

Transmitted data

Control symbol	Data part	Control symbol	Last terminal symbol
(STX) 0x02	Control command (ASCII character string)	(ETX) 0x03	(CR) 0x0d
1 byte	Undefined	1 byte	1 byte

Received data

Control symbol	Data part	Control symbol	Last terminal symbol
(STX) 0x02	Control command (ASCII character string)	(ETX) 0x03	(CR) 0x0d
1 byte	Undefined	1 byte	1 byte

Error response

Error message	Last terminal symbol
"ERR1" : Undefined control command "ERR2" : Out of parameter range "ERR3" : Busy status or reception invalid period "ERR4" : Timeout or reception invalid period "ERR5" : Wrong data length	(CR) 0x0d
4 bytes	1 byte

2. When [LAN control protocol] is set to [Protocol 2].

Communicates with the same protocol as that of a Panasonic projector

■ When the WEB control administrator privileges password has been set (Protect mode)

Connection method

- 1 Obtain the display's IP address and the port number (Default is 1024), and request connection to the display.

The IP address and the port number can be obtained from the following menus.

- IP address:
[Setup] → [Network settings] → [LAN setup] or [Network status]
- Port number:
[Setup] → [Network settings] → [LAN setup]
- For more detail of the settings, see page 59.

- 2 The display responds.

Response data

Data part	Space	Mode	Space	Random number part	Last terminal symbol
[NTCONTROL] (ASCII character string)	[] 0x20	[1] 0x31	[] 0x20	[zzzzzzzz] (ASCII code hex number)	(CR) 0x0d
9 bytes	1 byte	1 byte	1 byte	8 bytes	1 byte

Mode: 1 = Protect mode

- 3 Hash the following data with the MD5 algorithm, and generate a 32-byte hash value.

[xxxxxx:yyyyy:zzzzzzzz]

xxxxxx :

WEB control administrator privileges user name

yyyyy :

Above administrator privileges user password

- Default user name and password are as follows:

User name: dispadmin

Password: @Panasonic

zzzzzzzz :

8-byte random number obtained in step 2

Command transmission method

Transmit in the following command format

Transmitted data

Header			Data part	Last terminal symbol
Hash value (see "Connection method")	'0' 0x30	'0' 0x30	Control command (ASCII character string)	(CR) 0x0d
32 bytes	1 byte	1 byte	Undefined	1 byte

Received data

Header		Data part	Last terminal symbol
'0' 0x30	'0' 0x30	Control command (ASCII character string)	(CR) 0x0d
1 byte	1 byte	Undefined	1 byte

Error response

Error message	Last terminal symbol
"ERR1" : Undefined control command	(CR) 0x0d
"ERR2" : Out of parameter range	
"ERR3" : Busy status or reception invalid period	
"ERR4" : Timeout or reception invalid period	
"ERR5" : Wrong data length	
"ERRA" : Mismatching of password	
4 bytes	1 byte

■ **When the WEB control administrator privileges password has not been set (Non-protect mode)**

Connection method

1 Obtain the display's IP address and the port number (Default is 1024), and request connection to the display.

The IP address and the port number can be obtained from the following menus.

- IP address:
[Setup] → [Network settings] → [LAN setup] or [Network status]
- Port number:
[Setup] → [Network settings] → [LAN setup]
- For more detail of the settings, see page 59.

2 The display responds.

Response data

Data part	Space	Mode	Last terminal symbol
[NTCONTROL] (ASCII character string)	[] 0x20	[0] 0x30	(CR) 0x0d
9 bytes	1 byte	1 byte	1 byte

Mode: 0 = Non-protect mode

Command transmission method

Transmit in the following command format

Transmitted data

Header		Data part	Last terminal symbol
'0' 0x30	'0' 0x30	Control command (ASCII character string)	(CR) 0x0d
1 byte	1 byte	Undefined	1 byte

Received data

Header		Data part	Last terminal symbol
'0' 0x30	'0' 0x30	Control command (ASCII character string)	(CR) 0x0d
1 byte	1 byte	Undefined	1 byte

Error response

Error message	Last terminal symbol
"ERR1" : Undefined control command	(CR) 0x0d
"ERR2" : Out of parameter range	
"ERR3" : Busy status or reception invalid period	
"ERR4" : Timeout or reception invalid period	
"ERR5" : Wrong data length	
4 bytes	1 byte

Note

- With some of the commands, a part of character string of the transmitted data may not be included in the received data.
- Consult your local Panasonic dealer for detail instructions on command usage.
For more details, visit the following web site.
<https://panasonic.net/cns/prodisplays/>

PJLink protocol

The unit's Network function is compatible with PJLink Class 1. The following operations can be performed from a computer when PJLink protocol is used.

- Setting the Display
- Querying the Display status

Supported commands

The commands to control the unit with PJLink protocol are as follows.

Command	Control
POWR	Power control 0: Standby 1: Power On
POWR?	Power status query 0: Standby 1: Power On
INPT	Input switch 11: PC IN input (PC) 21: AV IN input (VIDEO) 31: HDMI 1 input (HDMI1) 32: HDMI 2 input (HDMI2) 33: DIGITAL LINK input (DIGITAL LINK) DVI-D IN input (DVI-D)*1 34: DVI-D IN input (DVI-D)*2 41: USB input (USB) 42: MEMORY VIEWER input (MEMORY VIEWER)
INPT?	Input switch query 11: PC IN input (PC) 21: AV IN input (VIDEO) 31: HDMI 1 input (HDMI1) 32: HDMI 2 input (HDMI2) 33: DIGITAL LINK input (DIGITAL LINK) DVI-D IN input (DVI-D)*1 34: DVI-D IN input (DVI-D)*2 41: USB input (USB) 42: MEMORY VIEWER input (MEMORY VIEWER)

Command	Control
AVMT	Shutter control 10: Picture On (picture mute deactivated) 11: Picture Off (picture on mute) 20: Audio On (audio mute deactivated) 21: Audio Off (audio on mute) 30: Shutter mode Off (picture and audio mute deactivated) 31: Shutter mode On (picture and audio on mute)
AVMT?	Shutter control query 11: Picture Off (picture on mute) 21: Audio Off (audio on mute) 30: Shutter mode Off (picture and audio mute deactivated) 31: Shutter mode On (picture and audio on mute)
ERST?	Error status query First byte: 0 Second byte: 0 Third byte: 0 Fourth byte: 0 Fifth byte: 0 Sixth byte: Other error. 0 or 2. • Meaning of 0, 2. 0: Error is not detected, 2: Error
LAMP?	Lamp status query Not supported
INST?	Input switch list query 11: PC IN input (PC) 21: AV IN input (VIDEO) 31: HDMI 1 input (HDMI1) 32: HDMI 2 input (HDMI2) 33: DIGITAL LINK input (DIGITAL LINK) DVI-D IN input (DVI-D)*1 34: DVI-D IN input (DVI-D)*2 41: USB input (USB) 42: MEMORY VIEWER input (MEMORY VIEWER)
NAME?	Display name query The name selected in [Display name] is returned.
INF1?	Manufacturer name query Returns "Panasonic".

Command	Control
INF2?	Model name query Returns "65SF2U" / "65SF2E". (Example: 65-inch SF2U / SF2E model)
INFO?	Other information query Returns version number.
CLSS?	Class information query Returns "1".

*1: For TH-65SF2E only

*2: For TH-65SF2U, TH-55SF2U, TH-49SF2U,
TH-43SF2U, TH-55SF2E, TH-49SF2E, TH-43SF2E
only

PJLink security authentication

The password used for PJLink is the same as the password set for the WEB control. (see page 87)

When using PJLink without security authorization, set use without the password for administrator privileges and the password for user privileges of Web browser control.

- Concerning the specification of PJLink, see the web site of Japan Business Machine and Information System Industries Association (JBMA) below:
<http://pjlink.jbma.or.jp/english/index.html>

Early Warning Software

This unit supports "Early Warning Software" which monitors the statuses of devices (projectors or displays) connected to an intranet, reports failures of devices and gives advance warning by detecting a predicted abnormality.

The maximum number of devices that can be registered to monitor differs according to the type of license. Up to 2048 devices can be registered and used for free for a maximum of 90 days after the installation to PC has completed.

- For more details, visit the following web site.

<https://panasonic.net/cns/prodisplays/products/et-swa100/index.html>

Multi Monitoring & Control Software

This unit supports "Multi Monitoring & Control Software" which monitors and controls devices (projectors or displays) connected to an intranet.

- For more details, visit the following web site.

<https://panasonic.net/cns/prodisplays/download/software/index.html>

Video Wall Manager

This unit supports the "Video Wall Manager" software which adjusts multiple displays simultaneously or separately on one computer without rearranging cables.

For more details, visit the following web site.

<https://panasonic.net/cns/prodisplays/download/software/index.html>

Content Management Software

This unit supports "Content Management Software" to create schedule data on a PC required to play back still pictures and motion pictures. (Supports Ver. 3.0 or later.)

- For more details, visit the following web site.

<https://panasonic.net/cns/prodisplays/download/software/index.html>

Connecting with LAN

Note

- To use the network function, set each item in [Network settings] and be sure to set [Network control] to [On]. (see page 59)

Computer operation

- 1 Turn on the computer.
- 2 Make the network setting according to your system administrator.

When the Display settings are the default settings (see page 60), the computer can be used with the following network settings.

IP address	192.168.0.9
Subnet mask	255.255.255.0
Gateway	192.168.0.1

Using Web Browser Control

You can use a Web browser to control the unit and set up a network and password.

Before Using Web Browser Control

To use the Web browser control, the unit and computer set ups are required.

■ About Web Browser

Set each item in [Network settings] and be sure to set [Network control] to [On]. (see page 59)

■ Computer Setup

Disable the proxy server settings and enable JavaScript.

- The setting procedure differs depending on the software version.

Please refer to description in HELP, etc. of the software.

(Windows)

Windows 7 is used as an example.

Disable proxy server settings

- 1 Display [Internet Properties] window.
Click [Start] - [Control Panel] - [Network and Internet] - [Internet Options].
 - If the on screen display looks different, please set [View by:] to [Category].
- 2 Click the [Connections] tab and then [LAN Settings].
- 3 Deselect the [Use automatic configuration script] and [Use a proxy server for your LAN] boxes.
- 4 Click [OK].

Enable JavaScript

- 1 Display [Internet Properties] window.
Click [Start] - [Control Panel] - [Network and Internet] - [Internet Options].
 - If the on screen display looks different, please set [View by:] to [Category].
- 2 Set the security level on the [Security] tab to [Default Level]. Alternatively enable [Active scripting] from the [Custom Level] button.

(Macintosh)

Disable proxy server settings

- 1 From the [Safari] menu, click [Preferences].
General screen is displayed.
- 2 From the [Advanced] tab, click the [Change Settings...] button next to [Proxies].
Click [Proxies] and set up a proxy server.
- 3 Deselect the [Web Proxy] and [Automatic Proxy Configuration] boxes.
- 4 Click [Apply Now].

Enable JavaScript

- 1 Display [Security] of Safari.
- 2 Select [Enable JavaScript] under [Web content].

Access from Web Browser

Access to the TOP screen of the Web browser control using a Web browser.

- 1 Start your Web browser.
- 2 Enter the IP address set with the [LAN setup] of the unit.

(see page 59)

- 3 Enter the user name and password when the Authentication screen is displayed.

- 4 Click [OK].

After logged in, the TOP screen of the Web Browser Control is displayed.

Note

- The password used here is the same password used for command control and the PjLink security authentication.

- Default user name and password are as follows:

User name: dispuser (user rights)

dispadmin (administrator rights)

Password: @Panasonic

Change password first.

In case the warning screen is displayed when you log in with the factory default user name and password, click the [Continue] button.

- The password can be changed on the Password Setup screen after logging in (see page 88). Log in with administrator privileges to change this.
- If a wrong user name/password is entered 3 times when you log in, the field will be locked for several minutes.
- When using “Crestron Connected™” (see page 92), log in with the administrator rights.
- Under no circumstances, Panasonic Corporation or its associated companies will ask customers their password directly.

Even if you are asked directly, please do not reveal your password.

Operating with Web Browser

■ WARNING display page

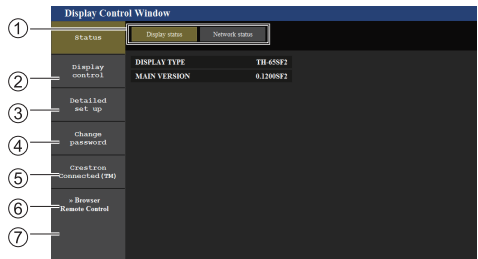

In case the following warning page is displayed when you log in with the factory default user name and password, click the [Continue] button to display the [Display Control Window] page.

Note

- It is recommended to change password on the [Change password] page.
- Depending on the browser, displayed operations may change.

■ Description of each section

- 1 Page tab

Click these to switch pages.

- 2 [Status]

Click this item, and the status of the Display is displayed.

- 3 [Display control]

Click this item to display the Display control page.

- 4 [Detailed set up]

Click this item to display the advanced settings page.

- 5 [Change password]

- 6 [Crestron Connected™]

Click this item to display the Crestron Connected™ operation page.

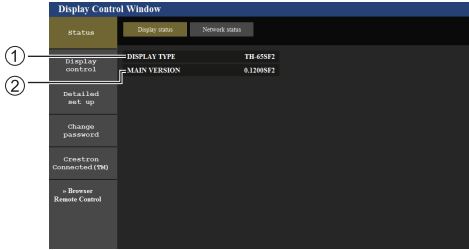

- 7 [Browser Remote Control]

Click this item to display the Browser Remote Control on the WEB browser, which is the same as the supplied remote control.

Display status page

Click [Status] → [Display status].

This page displays the Display statuses established for the items shown below.

- ① Displays the type of Display.
- ② Displays the firmware version of the Display main unit.

Network status page

Click [Status] → [Network Status].

Displays the current configuration information of the network.

- ① Displays the configuration details of wired LAN.

Basic control page

Click [Display control] → [Basic control].

- ① Power On/Off control
- ② Use these to select the input signals
- ③ AUDIO mute
- ④ Switches aspect mode

Detail control page

Click [Display control] → [Advanced control].

- ① Enter a command. Use the same command used for the serial control.
- ② Response from the unit is displayed.
- ③ Command is sent and run.

Note

- After the settings are changed, it may take a while till the display status is displayed.

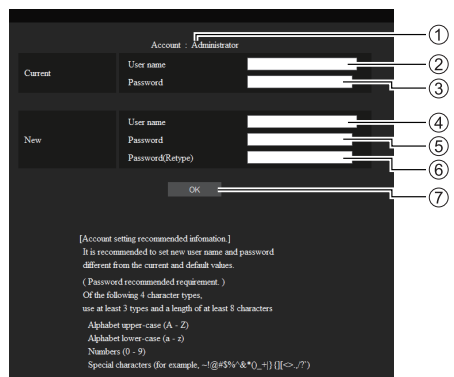

Change Use name / Password page

Click [Change password].

- ① Administrator
- ② User

Administrator mode

- ① Account
- ② Current user name input field
- ③ Current password input field
- ④ New user name input field
- ⑤ New password input field
- ⑥ New password input field (re-enter for confirmation)
- ⑦ Button for executing password change

■ User account

Account - User

New

User name

Password

Password(Retype)

OK

[Account setting recommended information.]
It is recommended to set new user name and password different from the current and default values.
(Password recommended requirement)
Of the following 4 character types,
use at least 3 types and a length of at least 8 characters
Alphabet upper-case (A - Z)
Alphabet lower-case (a - z)
Numbers (0 - 9)
Special characters (for example, ~!@#5%*&*0_+!) [!<->./? ', etc.)

- ① Account
- ② New user name input field
- ③ New password input field
- ④ New password input field (re-enter for confirmation)
- ⑤ Button for executing password change

■ Password change (user rights)

A user can change password only.

Old Password

New Password

Retype

OK

[Password setting recommended information.]
It is recommended to set a new password different from the old and default values.
(Password recommended requirement)
Of the following 4 character types,
use at least 3 types and a length of at least 8 characters
Alphabet upper-case (A - Z)
Alphabet lower-case (a - z)
Numbers (0 - 9)
Special characters (for example, ~!@#5%*&*0_+!) [!<->./? ', etc.)

- ① Current password input field
- ② New password input field
- ③ New password input field (re-enter for confirmation)
- ④ Button for executing password change

Note

- Alphanumeric characters can be used for a user name.
- Up to 16 characters can be used for a user name and a password.
- When changing the administrator account, both “Current user name” and “Current password” are required.
- See below when you log in with administrator privileges and change the account.
 - It is recommended not to use the current user name/password or default values for a new user name/password.

- See below when you log in with user privileges and change the password.
 - It is recommended not to use the current password or default value for a new password.
- The following are recommendations in complexity when changing passwords. (For both administrator privileges and user privileges)
Include at least 3 kinds of characters from the following 4, and the number of characters should be 8 or more.
 - Alphabet upper case character (A to Z)
 - Alphabet lower case character (a to z)
 - Number (0 to 9)
 - Special character
(~ ! @ # \$ % ^ & * () _ + | } { [] < > . , / ? ' , etc.)

Network config page

When connecting by logging in with administrator privileges, you can make detailed settings for network related to display.

■ LAN settings

1 Click [Detailed set up] in the menu.

2 Click [Next].

The settings window appears, showing the current settings.

- To change the LAN settings, click [Change].
- To return to the previous window, click [Back].

3 Complete the detailed settings and click [Next].

In this window, DNS server settings can be made as well as address information set on the [LAN setup] menu of the display.

After all required items have been entered, click [Next]. Then, a confirmation window appears.

Note

- When [DHCP ON] is set, if the DNS server address is acquired from the DHCP server, the acquired address is valid.

4 Click [Submit].

The settings will be registered.

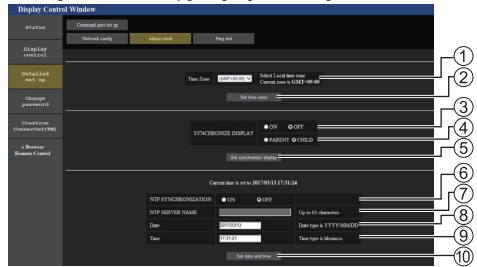

Note

- Changing the setting of LAN while connected with LAN might disconnect the connection.

Adjust clock page

Click [Detailed set up] → [Adjust clock].

- 1 Time zone selection field
(Japan: GMT + 09:00)
- 2 Time zone setting refresh button
- 3 Display synchronization selection field
- 4 Parent/Child selection field for display synchronization
- 5 Display synchronization setting refresh button
- 6 NTP synchronization selection field
- 7 NTP server input field
(When setting date and time with NTP synchronization, enter the IP address or server name. To enter the server name, setting the DNS server is required.)
- 8 Date entry field
- 9 Time entry field
- 10 NTP synchronization setting and date setting refresh button

Note

- Date and time is displayed as [- -] when they are not set.
- When [Network control] is set to [On] and it is in standby mode, date and time display will be blank and they cannot be set. [Time zone], [Synchronize display] and [NTP synchronization] cannot be set as well.
- When [SYNCHRONIZE DISPLAY] is set to [ON] / [CHILD], it is not possible to set [NTP SYNCHRONIZATION], [Date] or [Time].
- When [NTP SYNCHRONIZATION] is set to [ON], it is not possible to set [Date] or [Time].
- If the time becomes incorrect immediately after setting the correct time, contact the dealer where you bought the Display.
- [NTP synchronization] operates only in power-on state or in schedule standby state.

Ping test page

This page makes it possible to check whether the network is connected to the DNS server, etc.

Click [Detailed set up] → [Ping test].

- ① Enter the IP address of the server to be tested.
- ② Button for conducting the test

Display which appears when the connection was successful.

```
PING 192.168.0.60 (192.168.0.60): 56 data bytes
64 bytes from 192.168.0.60: seq=0 ttl=128 time=1.474 ms
64 bytes from 192.168.0.60: seq=1 ttl=128 time=1.255 ms
64 bytes from 192.168.0.60: seq=2 ttl=128 time=1.146 ms
64 bytes from 192.168.0.60: seq=3 ttl=128 time=1.052 ms

--- 192.168.0.60 ping statistics ---
4 packets transmitted, 4 packets received, 0% packet loss
round-trip min/avg/max = 1.052/1.231/1.474 ms
```

Display which appears when the connection failed.

```
PING 192.168.0.100 (192.168.0.100): 56 data bytes
--- 192.168.0.100 ping statistics ---
4 packets transmitted, 0 packets received, 100% packet loss
```

Command port set up page

Set the port number to be used with command control.

Click [Detailed set up] → [Command port set up].

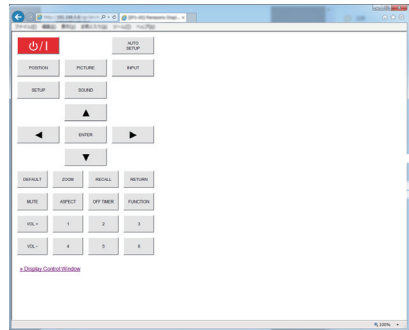

- ① Input the port number to be used with command control.
- ② Setting update button.

[Browser Remote Control]

It is possible to operate the display with the operation buttons displayed on the WEB browser.

Click [Browser Remote Control].

The [Browser Remote Control] screen is displayed.

Browser Remote Control

The Browser Remote Control can be operated in the same way as the supplied remote control.

For allocation / function of each button, see page 29.

To finish the Browser Remote Control, click

[Display Control Window] or exit the browser.

Note

- To use this function, set [Network control] to [On]. (see page 59)
- The Browser Remote Control can also be displayed by entering "http://xxx.xxx.xxx.xxx/remotel/" in the WEB browser URL entry field.
 - xxx.xxx.xxx.xxx is the IP address set for this display.
- The button long press operation is invalid.
- [Options] menu (see page 67) cannot be displayed.
- The restriction for the remote control button operation set for [Options] - [Controller user level] (see page 73) does not apply.
- Avoid operating the multiple Browser Remote Control simultaneously.
- The same operations are applicable to both administrator privileges and user privileges.
- If the Browser Remote Control screen is not displayed, consult your network administrator.
- The screen may turn white for a moment when updating the Browser Remote Control screen, but it is not a malfunction.
- While operating the Browser Remote Control, do not operate the unit by other methods such as WEB control screen, remote control and external control command.
- If the "Back" or "Forward" functions on the WEB browser is used, the screen display may be abnormal. In this case, the subsequent operations are not guaranteed. Update the WEB browser.

Using Web Browser Control

Crestron Connected™ (Crestron Connected™ operation screen)

You can monitor or control the Display using "Crestron Connected™".

If Adobe Flash Player is not installed in your computer, or if the browser does not support Flash, this page does not appear. In this case, return to the previous page by clicking [Back] in the operation page.

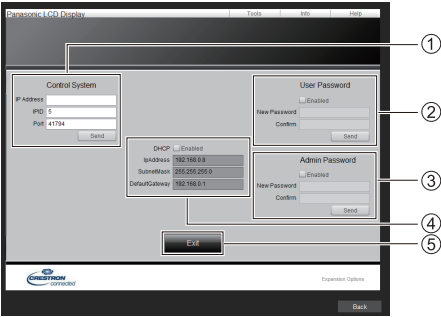

- Operation page

- ① **[Tools], [Info], [Help]**
Switches the pages for tools, information, help using the tab.
- ② **[POWER]**
Switches between on and off of the power.
- ③ **[VOL DOWN], [AV MUTE], [VOL UP]**
Sets the volume, AV mute.
When the power of the Display is turned off, these operations are not available.
- ④ **[Input Select]**
Sets the input selection.
When the power of the Display is turned off, this operation is not available.
- ⑤ **Operation buttons on the menu screen**
Operates on the menu screen.
- ⑥ **Image quality adjustments**
Operate items related to image quality.
- ⑦ **[Back]**
Returns to the previous page.

- [Tools] page

Click [Tools] on the operation page.

① **[Control System]**

Sets the information required for the communication with the controller that is connected to the Display.

② **[User Password]**

Sets the password for the user rights in the operation page of “Crestron Connected™”.

③ **[Admin Password]**

Sets the password for the administrator rights in the operation page of “Crestron Connected™”.

④ **[Network Status]**

Displays the setting of wired LAN.

- [DHCP]
- [IpAddress]
- [SubnetMask]
- [DefaultGateway]

Displays the value in the current setting.

⑤ **[Exit]**

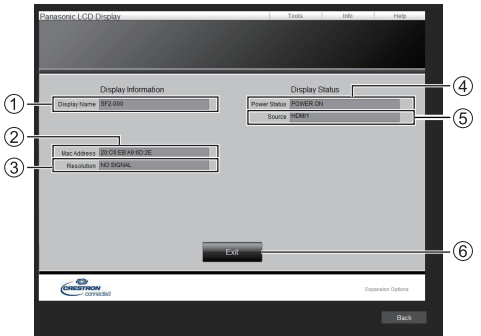

Returns to the operation page.

Note

- When you monitor or control the Display using “Crestron Connected™”, set [Crestron Connected™] to [On] in the [Network settings] menu.

- [Info] page

Click [Info] on the operation page.

① **[Display Name]**

Displays the name of the Display.

② **[Mac Address]**

Displays the MAC address.

③ **[Resolution]**

Displays the resolution of the Display.

④ **[Power Status]**

Displays the status of the power.

⑤ **[Source]**

Displays the selected video input.

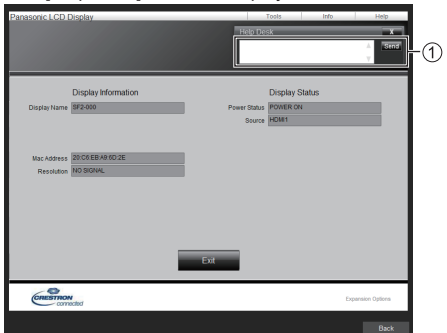

⑥ **[Exit]**

Returns to the operation page.

- [Help] page

Click [Help] on the operation page.

The [Help Desk] screen is displayed.

① **[Help Desk]**

Sends or receives messages to the administrator who uses “Crestron Connected™”.

USB media player

Function description

The USB media player displays still pictures and motion pictures saved in a USB memory by inserting the USB memory device into the display unit.

Note

- To use this function, set [USB media player] to [Enable] in [Setup] - [USB media player settings]. (see page 62)

When using the "Single Media Player", the unit prevents a black screen from appearing at the switching timing of still pictures or motion pictures. Note the following restrictions.

- (1) A black screen may appear when switching a motion picture codec.
- (2) A black screen may appear or images may be disturbed when switching to motion pictures of a different frame rate or aspect ratio.

If an angle of view for something other than for 16:9 is used, images may be disturbed near the end of playback.

Inserting a black screen (approx. 2 sec.) at the switching timing for all the motion pictures can avoid image disturbance in above (2).

([USB media player settings] (see page 62))

- Using the content list delivery function of the Multi Monitoring & Control Software (see page 85), content (still/motion pictures) played back on a USB media player and the playback list can be delivered.

(Still pictures that can be delivered are only jpg files.)

For details, refer to the manual of Multi Monitoring & Control Software.

Single Media Player

Files are played by a single unit.

Multi Media Player

Connecting more than one unit using LAN cables plays back files in the USB memory simultaneously.

One of the multiple units becomes the parent, and the others are children. The two-unit configuration example is shown below.

For LAN connection, see "Network environment (Multi Media Player only)" (see page 99).

Note

- For Multi Media Player, one USB memory device is required for one unit.
- For Multi Media Player, the parent requires both "scenario.dat" and "filelist.dat", and the child requires "filelist.dat" only.
- Describe "GroupID:G01" without changing characters other than numbers (2-digit description required). Without description, the Multi Media Player does not function.
- When motion pictures are played on the multi media player, a black screen may be displayed for a certain period of time at the switching timing of motion pictures.

Preparation

■ Supported device

- Commercially available USB memory devices are supported. (Those with security functions are not supported. Operation is not guaranteed.)
- USB memory devices other than those formatted in FAT16 or FAT32 cannot be used.
- Up to 32 GB of USB memory in size are supported.
- Only single partition configuration is supported.

■ Preparation

Prepare the following files immediately below root in USB memory for the media player.

- Play file
- Scenario (as necessary)
- File list (as necessary)

Note

- Delete files irrelevant to playback from the USB memory device.
 - Up to 999 files can be played back. If more than the maximum number of files are present, some files are not played back.
- An error is displayed by the scenario file check (see page 62).
- Up to 999 lines of Scenario files are valid.

■ Play file

The unit's Media Player supports the formats below. Save immediately below root in USB memory.

Still pictures

Extension	Format	Limitation
jpg/ jpeg/ jpe	JPEG	Number of pixels: Maximum 4 096 x 4 096 (supports baseline only) YUV format: supports YUV444, YUV442 and YUV440 Colour mode: supports RGB only
bmp	Windows Bitmap	Number of pixels: Maximum 4 096 x 4 096 (1 bit, 4 bits, 8 bits, 24 bits) Following formats are not supported: Run-length encoding, bit field, top-down, transparent data

Motion pictures

Extension	Codec	
	Video	Audio
avi	MPEG4 AVC/ H.264 MPEG-4 Visual	MPEG-1/2 Audio Layer-3 (MP3) Linear PCM

mkv	MPEG4 AVC/ H.264 MPEG-4 Visual	MPEG-1/2 Audio Layer-3 Linear PCM AAC(LC) HE-AAC(Ver.1)
asf/wmv	MPEG4 AVC/ H.264 MPEG-4 Visual VC-1 Advanced VC-1 Simple&Main	MPEG-1/2 Audio Layer-3 WMA Standard WMA9/10Pro
ts/mts	MPEG4 AVC/ H.264 MPEG-4 Visual	MPEG-1/2 Audio Layer-3 HE-AAC(Ver.1)
mp4	MPEG4 AVC/ H.264 MPEG-4 Visual	MPEG-1/2 Audio Layer-3 AAC(LC) HE-AAC(Ver.1)
3gp	MPEG4 AVC/ H.264 MPEG-4 Visual	AAC(LC) HE-AAC(Ver.1)
mov	MPEG4 AVC/ H.264 MPEG-4 Visual	MPEG-1/2 Audio Layer-3 Linear PCM AAC(LC) HE-AAC(Ver.1)
flv/f4v	MPEG4 AVC/ H.264	MPEG-1/2 Audio Layer-3 AAC(LC) Linear PCM

Limitation	
Video	
Codec	
MPEG-4 AVC/ H.264 High Profile	Resolution: Maximum 1 920 x 1 080 Frame rate: Maximum 30fps (progressive) Bit rate: Maximum 30Mbps • Level 4.2 or less • MVC (Multi-view Video Coding) unsupported
MPEG-4 Visual Simple Profile and Advanced Simple Profile	Resolution: Maximum 1 920 x 1 080 Frame rate: Maximum 30fps (progressive) Bit rate: Maximum 30Mbps • Only 1 warp-point GMC supported • Data Partitioning is not supported.
VC-1 Simple Profile and Main Profile	Resolution: Maximum 1 920 x 1 080 Frame rate: Maximum 30fps (progressive) Bit rate: Maximum 20Mbps

VC-1 Advanced Profile	Resolution: Maximum 1 920 x 1 080 Frame rate: Maximum 24fps (progressive), 30fps (interlace) Bit rate: Maximum 30Mbps • Level: L3 or less supported	
Audio		
Codec	Sampling frequency (kHz)	Bit rate (kbps)
MP3	8/10.025/12/16/	8 – 320
WMA Standard	22.05/24/32/44.1/	32 – 384
WMA 9	48	32 – 384
WMA 10 Pro		32 – 384
LPCM		64 – 1 536 Supported quantization bit: 8/16/24/32
AAC(LC)		8 – 1 440
HE-AAC (Ver.1)		8 – 256

Note

- Maximum size per one file is 2 GB.
- Some files may not be played back even if their formats are supported as described here.
- Files protected by Digital Rights Management (DRM) cannot be played back.
- Make sure that both audio codec and video codec are supported. If the audio codec of motion picture file is incompatible in format, the pictures may not be correctly displayed. In addition, files which contain only audio cannot be played back.
- Playback is not possible if the maximum bit rate specified in the codec Profile or Level is exceeded. Also, depending on the USB memory device, playback may be impossible even if the bit rate is less than the indicated maximum bit rate.
- A part of information of still pictures/motion pictures can be confirmed on the computer accessible to the target files.
- If the number of pixels of a file exceeds the screen size, the picture quality will change.
- Example of an operation

(Windows)

1. Right-click the file, and then click [Properties].
2. Click the [Details] tab.

(Macintosh)

1. Control-click the file, and then click [Get Info].
2. Click [Details].

■ Scenario

The play order and time can be specified for a play file. Save under the name (one-byte alphabetical characters) "scenario.dat" immediately below root in USB memory.

- Save files as UTF-8N format.
- 1 to 999 lines can be specified for Scenario.

■ File list

It is a list of play files.

Save under the name (one-byte alphabetical characters) "filelist.dat" immediately below root in USB memory.

- Save files as UTF-8N format.

■ Scenario- / File list-associated terms

File name

It is the name of a play file.

A file name needs to include its extension.

Example:

Introduction.jpg
Contents_Video01.wmv

- Enter the extension of a file name using one-byte alphanumeric characters.

File definition

It is a file definition that is shared among scenarios and files.

PHOTO_xxx: still image file definition

VIDEO_xxx: moving image file definition

- The "xxx" portion can be set from 001 to 999.
- Enter a file definition using one-byte alphanumeric characters.

Play time

It is the play time of a file.

Play time can be specified from 3 seconds to 24 hours. (Unit: second)

Example:

10: 10 seconds

86400: 24 hours

10.5: 10.5 seconds

It can be set down to one-tenth (1/10) of a second using a decimal point (full stop).

Play time is omissible.

For still images, a file will be played for the period of time that you selected in [USB media player settings] - [Slide show duration]. (see page 62)

For moving images: a file will be played for the duration of the play time of the file.

- Enter play time using one-byte numeric characters.
- When playing back large sized files, if you set the playing back duration short, it may not be played back properly, for example, noise appears on the screen. In that case, set the playing back duration longer (10 seconds or longer).

Group ID (for Multi Media Player)

It is an ID used for grouping on a network during Multi Media Player conditions.

GroupID:Gxx : Group xx

- The "xx" portion can be set from 01 to 10.
- Enter a group ID using one-byte alphanumeric characters.

Note

- "UTF-8N": UTF-8 encoding without BOM. Notepad for windows doesn't support this encoding.
Please use another editor supported UTF-8 encoding without BOM.

Playing back the files

■ Example of setting in each mode

Single Media Player (Type 1)

Files will be played in the order in which their names appear in USB memory.

Scenario and file list

Scenario:

Unnecessary

File list:

Unnecessary

Setting example

USB memory contents

```
├─ 000_Introduction.jpg
├─ 001_Contents_Video1.wmv
├─ 002_Contents_Video2.wmv
├─ 003_Contents_Video3.wmv
```

Play contents

For the above setting example, the following contents will be played on repeat (loop).

1. 000_Introduction.jpg (*1)
2. 001_Contents_Video1.wmv (*2)
3. 002_Contents_Video2.wmv (*2)
4. 003_Contents_Video3.wmv (*2)

*1: Played for the duration set in [Slide show duration].

*2: Played for the duration of the play time of the file.

Single Media Player (Type 2)

Files will be played in the order they were listed in a scenario.

Scenario and file list

Scenario:

Enter [File name: Play time].

File list:

Unnecessary

Setting example

USB memory contents

```
├─ scenario.dat
├─ Introduction.jpg
├─ Contents_Video1.wmv
├─ Contents_Video2.wmv
├─ Contents_Video3.wmv
```

scenario.dat (scenario)

```
Introduction.jpg:10
Contents_Video1.wmv:10
Contents_Video2.wmv:20
Contents_Video3.wmv:
```

Play contents

For the above setting example, the following contents will be played on repeat (loop).

1. Introduction.jpg (10 seconds)
2. Contents_Video1.wmv (10 seconds)
3. Contents_Video2.wmv (20 seconds)
4. Contents_Video3.wmv (Played for the duration of the play time of the file)

Single Media Player (Type 3)

Files will be played in the order they were listed in a scenario.

Scenario and file list

Scenario:

Enter [File definition: Play time].

File list:

Enter [File definition: File name].

Setting example

USB memory contents

```
├─ filelist.dat
├─ scenario.dat
├─ Introduction.jpg
├─ Contents_Video1.wmv
├─ Contents_Video2.wmv
├─ Contents_Video3.wmv
```

scenario.dat (scenario)

```

```
PHOTO_001:Introduction.jpg
VIDEO_001:Contents_Video1.wmv
VIDEO_002:Contents_Video2.wmv
VIDEO_003:Contents_Video3.wmv
```

Play contents

For the above setting example, the following contents will be played on repeat (loop).

1. Introduction.jpg (10 seconds)
2. Contents_Video1.wmv (10 seconds)
3. Contents_Video2.wmv (20 seconds)
4. Contents_Video3.wmv (Played for the duration of the play time of the file)

Multi Media Player

Files will be played in the order they were listed in the scenario for Parent.

Scenario and file list

Parent side

Scenario:

Enter [File definition: Play time].

File list - The first line:

Enter [Group ID].

File list - The second and subsequent lines:

Enter [File definition: File name].

Child side

Scenario:

Unnecessary

File list - The first line:

Enter [Group ID].

File list - The second and subsequent lines:

Enter [File definition: File name].

Setting example

Parent side

USB memory contents

```

VIDEO_001:R_Contents_Video1.wmv
VIDEO_002:R_Contents_Video2.wmv
VIDEO_003:R_Contents_Video3.wmv
```

Play contents

For the above setting example, the following contents will be played on repeat (loop).

Parent side

1. L_Introduction.jpg (10 seconds)
2. L_Contents_Video1.wmv (10 seconds)
3. L_Contents_Video2.wmv (20 seconds)
4. L_Contents_Video3.wmv (*1)

Child side

1. R_Introduction.jpg (10 seconds)
2. R_Contents_Video1.wmv (10 seconds)
3. R_Contents_Video2.wmv (20 seconds)
4. R_Contents_Video3.wmv (*1)

*1: Played for the duration of the play time of L_Contents_Video3.wmv (Parent side).

Note

- While the menu screen is not displayed, you can skip to the next playback file with ►, to the previous playback file with ◀, or play back again from the beginning of the file with ▼ (Remote control operation only).

When this operation is performed, a black screen is inserted before playback.

- If the date and time are changed by the [Date and time] (see page 57) setting, the playback of the file currently being played is stopped, and the playback will be performed again from the beginning of the file.

■ USB memory contents check

You can run a USB memory contents check in [USB media player settings] - [Scenario file check]. (see page 62)

If an error is present, the information is given with the following details.

A(B): C

D

A: Name of the file with an error

B: Row with an error

C: Error code

D: Detail of the error

Note

- Shows leading error codes.

Details of the detected errors are as follows.

Error code	Detail of the error
1.	No USB memory is inserted.
2.	scenario.dat/filelist.dat cannot be opened.
3.	There is an error in the contents of scenario.dat/filelist.dat.
4.	The play file format is not supported.
5.	No play file exists.
6.	The necessary group ID for Multi Media Player has not been specified.
7.	There are several identical file definitions.
8.	The scenario's play time is over the limit.
9.	The file definition listed in the scenario is not in the file list.
10.	The scenario contains 0 or over 1000 play files.
11.	There are 0 or over 1000 play files. (Single Media Player (Type 1) only)
12.	Only the group ID is listed on the file list. (Multi Media Player only)

- For error code 1 and 11, only the error code and the detail of the error are displayed as shown below.

1

No USB memory is inserted.

Supplementary note

The USB memory contents check does not determine whether or not a play file is playable.

If a file cannot be played while Media Player is active, an error message will be displayed.

When performing the synchronized playback on the Multi Media Player, check in the menu [USB media player settings] - [Scenario file check] that the file is playable.

Network environment (Multi Media Player only)

■ Example of setting up LAN connection and IP address / Subnet mask

As mentioned below, connect several units together with LAN cables and set up IP addresses / Subnet masks so that all the displays exist on the same network.

IP address: 192.168.10.1
Subnet mask: 255.255.255.0

IP address: 192.168.10.2
Subnet mask: 255.255.255.0

IP address: 192.168.10.3
Subnet mask: 255.255.255.0

IP address: 192.168.10.4
Subnet mask: 255.255.255.0

Note

- Set [Network control] of all displays to [On]. (see page 59)
- Depending on the network environment, synchronization may be largely lost.
- Do not connect other devices to prevent network traffic jam.
- With a router put in between the displays, you cannot set up connection. Use them within the same subnet.
- Do not use wireless LAN for connection since playback may not be performed normally.

Starting / ending Media Player

■ For Single Media Player

Start

1. Insert the USB memory device for Media Player to the USB terminal on the side of the display.

Note

- Depending on the type of a USB memory device, it may come in contact with the periphery such as a back cover, and cannot be attached. Use a commercially sold extension cable, or use a small type of a USB memory device connectable to this unit.

2. Run a USB memory contents check.
3. Change INPUT to [USB].

Ending

Change INPUT to other than [USB].

■ For Multi Media Player

Start

1. Connect several units with LAN cables.

(See "Example of setting up LAN connection and IP address / Subnet mask" in the previous section.)

2. Insert USB memory for Media Player into each Display.
3. Executes USB memory contents check on each Display.
4. Change INPUT for Child to [USB].
5. Change INPUT for Parent to [USB].

Ending

Change INPUT for Parent to other than [USB].

Resume Play function

After Media Player ends, the file to be played back next time varies depending on the setting of [USB media player settings] - [Resume play].

When set to [On]:

The file played prior to the end of Media Player starts playing from the beginning.

When set to [Off]:

Play starts from the beginning of the first file of the scenario.

Note

- The resume play function is retained until the unit is turned off or the USB memory device is taken out.

Schedule playback function using "Content Management Software"

This unit supports "Content Management Software" to create schedule data on a PC required to play back still pictures and motion pictures.

Functions that can be set with "Content Management Software" are as follows.

- Content playback (Still pictures/Motion pictures)
- Music playback
- Input switch
- Power control
- Multi display setting

Note

- To use this function, set [USB media player] and [Schedule play function] to [Enable] in [Setup] - [USB media player settings].
- About supported devices, refer to "Supported device". (see page 95)
- If both the scenario file of the "USB media player" and the schedule data of this function are present on the USB memory device, the [Schedule play function] operation takes priority.
- When using this function, insert the USB memory device in power-on state or in schedule standby state. If the USB memory device is inserted in conditions other than the said states, the schedule playback is not performed.
- Functions restricted when using the "USB media player" are also restricted when using the schedule playback function.

■ Schedule play mode

When [USB media player] is set to [On] and [Schedule play function] is set to [On], if a USB memory device containing a setting file created with "Content Management Software" is inserted, this unit enters schedule play mode, and the content is played back according to the set schedule.

If it entered schedule play mode at the time when the schedule is already specified, the unit operates as follows according to [Play mode] (see page 63).

- In [Individual play] mode

Playback starts from the beginning of the specified schedule.

- In [Synchronize play] mode

The unit remains on standby with the black screen during the current schedule time. Then synchronized playback starts at the next schedule time.

Note

- When the unit enters schedule play mode, the input is automatically switched to [USB].
- Some of the main unit's functions are disabled during schedule play mode.

- If the input is switched during schedule play mode, the schedule playback is suspended.

To resume the schedule playback

- Switching the input to [USB] will resume playback from the next schedule.
- If the power is turned off using the remote control, the power is turned on at the next power-on schedule. Then the schedule playback starts.

The schedule playback is restored by the above operations.

- When <RECALL> is pressed during schedule play mode, the [Schedule play mode] display appears.

■ Content playback

Specified content is played back at the time set for schedule.

Playback files in the following formats are supported.

Still pictures

Extension	Format	Limitation
jpg/ jpeg/ jpe	JPEG	Number of pixels: Maximum 4 096 x 4 096 (supports baseline only) YUV format: supports YUV444, YUV442 and YUV440 Colour mode: supports RGB only
bmp	Windows Bitmap	Number of pixels: Maximum 2 000 x 2 000 (1 bit, 4 bits, 8 bits, 24 bits) Following formats are not supported: Run-length encoding, bit field, top-down, transparent data

Motion pictures

Extension	Codec	
	Video	Audio
avi	MPEG4 AVC/H.264 MPEG-4 Visual	MPEG-1/2 Audio Layer-3 (MP3) Linear PCM
wmv	MPEG4 AVC/H.264 MPEG-4 Visual	MPEG-1/2 Audio Layer-3 WMA Standard WMA9/10Pro
mp4	MPEG4 AVC/H.264 MPEG-4 Visual	MPEG-1/2 Audio Layer-3 AAC(LC)
mov	MPEG4 AVC/H.264 MPEG-4 Visual	MPEG-1/2 Audio Layer-3 Linear PCM AAC(LC)

Note

- Some files may not be played back even if they are supported formats described above.
- As for restrictions for movie codecs of playback files, see "Play file" (see page 95).
- If the contents of setting files (under [PRIVATE] folder) created and delivered using "Content Management Software" are changed, operations are not guaranteed.
- During a time period for which no content is set, the screen is black with nothing displayed.

During this period, the [Schedule waiting] message is displayed on the upper right of the screen.

To hide this display on the screen, set [Options] - [Onscreen display] to [Off].

■ Music playback

Music content is played back at the time set with the schedule data.

Playback files in the following formats are supported.

Music

Extension	Codec	Format
mp3	MPEG-1/2	Sample rate:
	Audio Layer-3	Maximum 48 kHz
	AAC(LC)	Channel: Maximum 2 ch
wma	WMA	Bit rate: Maximum 320kbps

Note

- Some files may not be played back even if they are supported formats described above.
- If incompatible music content is scheduled, the music content is not played back.
- Music content can be played back only with the USB input.
- Video content and music content cannot be played back simultaneously. If 2 pieces of content are set for playback at the same time, video content takes priority.
- If video content starts to be played back while music content is being played, the playback of the music content stops.
- When playing back music content after playback of video content has finished, the playback starts from the beginning of the music content.
- Music content cannot be played back in synchronization with other displays.
- Several minutes of preparation time are added in switching music content.

■ Input switch

The input is switched to [HDMI1] at the time set with the schedule data. When the set time has passed, the [USB] input is restored.

Note

- The input is switched only to [HDMI1].
- The input is switched even if no signal is present at the input switch destination.
- When the input is switched, the input display does not appear.

■ Power control

The power is turned on/off at the time set with the schedule data.

Note

- If the power is turned off during schedule play mode, the unit enters the schedule standby mode.
- The standby electricity will be more than normal during the schedule standby mode.
- Some of the main unit functions in schedule play mode remain invalid during the schedule standby mode.
- The power-on schedule operates one minute before the specified schedule time.
- If the unit enters the schedule standby mode after one minute before the power-on schedule, the power is not turned on at the specified time by the schedule playback function.
- The power-on operation by [Schedule play function] does not work in standby states other than the schedule standby mode.

■ Multi display setting

Sets the following for playback content.

- Plays in the single playback mode.
- Plays in the synchronized playback mode.
- Changes [Multi display settings] of the main unit.

In [Individual play] mode

Content is played only on one display.

In [Synchronize play] mode

Content is played on multiple displays in synchronization.

To play back in the synchronized playback mode, set the following for correct operation.

- Set [USB media player] to [Enable].
- Set [Schedule play function] to [Enable].
- Set [Synchronize display] to [On].
- For [Parent or child setting], set one display with reference time to [Parent] and other displays to [Child].

Note

- The operations of the single playback mode and the synchronized playback mode are different from those of Single Media Player and Multi Media Player of the existing USB media player.
- For playback in the synchronized playback mode, approx. 5 seconds of preparation time are added in switching content.
- To perform the synchronized playback with multiple displays, set the [Synchronize display] function to [On], and set the same time for all the displays for playback.
- If the time is not synchronized correctly with [Synchronize display] set to [On], the unit may not operate properly. Confirm the operation conditions of [Synchronize display]. (see page 58)
- If [Multi display settings] is specified in the schedule data of “Content Management Software”, the setting is switched to the specified multi screen. [Multi display settings] cannot be changed during the specified schedule playback. When the specified schedule has finished, [Multi display settings] is restored to the state before setting.

■ Disabled functions

The following main unit's functions are set to [Disable (Off)] during schedule play mode.

- [Set up timer]
- [Screensaver]
- “Power management” function
- [No signal power off]
- [HDMI-CEC settings]
- [No activity power off]
- [Image settings] (Reading user image is disabled.)
- [Input search]
- [Initial input]
- [Input lock]
- [Failover/Failback]

Note

- Disabled functions are greyed out on the on-screen menu. Also, serial commands are in [ER401] state (Including the inquiry command).
- During schedule play mode, disabled functions are set to [Disable (Off)], and those operations are forcibly stopped.
- If schedule play mode has finished by removing the USB memory, etc., the disabled functions are restored to the original setting values.

■ Resume play

Sets the operation when the schedule playback is restored again after schedule play mode is stopped once.

When set to [On]:

The previous content before schedule play mode is stopped is played back from the beginning.

When set to [Off]:

The playlist scheduled to be played back at the current time is played back from the beginning.

Note

- When playback is scheduled in the synchronized playback mode, the playback is performed according to the set time in both [On] and [Off] cases.

Memory viewer

The "Memory viewer" selects still pictures and motion pictures stored in a USB memory device, and show them on the display.

Preparation

■ The files you can display with the "Memory viewer"

The following files are supported.

Still pictures

Extension	Format	Limitation
jpg/ jpeg/ jpe	JPEG	Number of pixels: Minimum 32 x 32, Maximum 4 096 x 4 096 (supports baseline only) YUV format: supports YUV444, YUV442 and YUV440 Colour mode: supports RGB only
bmp	Windows Bitmap	Number of pixels: Minimum 32 x 32, Maximum 4 096 x 4 096 (1 bit, 4 bits, 8 bits, 24 bits) Following formats are not supported: Run-length encoding, bit field, top-down, transparent data If the number of pixels exceeds 1 920 x 1 080, a long time may be required to display content.

Motion pictures

Extension	Codec	
	Video	Audio
avi	MPEG4 AVC/ H.264 MPEG-4 Visual	MPEG-1/2 Audio Layer-3 (MP3) Linear PCM
mkv	MPEG4 AVC/ H.264 MPEG-4 Visual	MPEG-1/2 Audio Layer-3 Linear PCM AAC(LC) HE-AAC(Ver.1)
asf/wmv	MPEG4 AVC/ H.264 MPEG-4 Visual VC-1 Advanced VC-1 Simple&Main	MPEG-1/2 Audio Layer-3 WMA Standard WMA9/10Pro
ts/m2ts	MPEG4 AVC/ H.264 MPEG-4 Visual	MPEG-1/2 Audio Layer-3 HE-AAC(Ver.1)

mp4	MPEG4 AVC/ H.264	MPEG-1/2 Audio Layer-3 AAC(LC)
	MPEG-4 Visual	HE-AAC(Ver.1)
3gp	MPEG4 AVC/ H.264	AAC(LC) HE-AAC(Ver.1)
	MPEG-4 Visual	
mov	MPEG4 AVC/ H.264	MPEG-1/2 Audio Layer-3 Linear PCM
	MPEG-4 Visual	AAC(LC) HE-AAC(Ver.1)
flv/f4v	MPEG4 AVC/ H.264	MPEG-1/2 Audio Layer-3 AAC(LC)
		Linear PCM

Limitation

Video

Codec

MPEG-4 AVC/ H.264 High Profile	Resolution: Maximum 1 920 x 1 080 Frame rate: Maximum 30fps (progressive) Bit rate: Maximum 30Mbps • Level 4.2 or less • MVC (Multi-view Video Coding) unsupported
---	--

MPEG-4 Visual Simple Profile and Advanced Simple Profile	Resolution: Maximum 1 920 x 1 080 Frame rate: Maximum 30fps (progressive) Bit rate: Maximum 30Mbps • Only 1 warp-point GMC supported • Data Partitioning is not supported.
--	---

VC-1 Simple Profile and Main Profile	Resolution: Maximum 1 920 x 1 080 Frame rate: Maximum 30fps (progressive) Bit rate: Maximum 20Mbps
---	--

VC-1 Advanced Profile	Resolution: Maximum 1 920 x 1 080 Frame rate: Maximum 24fps (progressive), 30fps (interlace) Bit rate: Maximum 30Mbps • Level: L3 or less supported
-----------------------------	--

Audio

Codec	Sampling frequency (kHz)	Bit rate (kbps)
MP3	8/10.025/12/16/	8 – 320
WMA Standard	22.05/24/32/44.1/	32 – 384
WMA 9	48	32 – 384
WMA 10 Pro		32 – 384
LPCM		64 – 1 536 Supported quantization bit: 8/16/24/32
AAC(LC)		8 – 1 440
HE-AAC (Ver.1)		8 – 256

Music

Extension		Codec
mp3	MPEG-1/2	Sample rate:
	Audio Layer-3	Maximum 48 kHz
	AAC(LC)	Channel:
	HE-AAC (Ver.1)	Maximum 2 ch
wma	WMA	Bit rate:
		Maximum 320kbps

Note

- Some information for still image/movie files can be viewed with a computer where relevant files are accessible.
- About supported devices, refer to “Supported device”. (see page 95)
- Some files may not be played back even if they are supported formats described above.
- If the number of pixels of a file exceeds the screen size, the picture quality will change.

Operation example

-For Windows computer

1. Right-click a file, and click [Properties].
2. Click the [Details] tab.

-For Mac

1. Click a file while holding down the “Control” key, and click [Get Info].
 2. Click [More Info].
- The maximum size of file is 2 GB.
 - The maximum number of file/folder is up to 2000.
If the number exceeds, 2000 files/folders are displayed.
 - You cannot play the files which are protected by Digital Rights Management (DRM).
 - If files or folders include characters other than one-byte alphanumeric characters, they may not be displayed correctly, or the playback may not be done properly.
It is recommended to use only one-byte alphanumeric characters for files and folders.
 - Thumbnails of files may not be correctly displayed even if they are playable.
 - If the file name including the file path (folder information) and extension has 248 one-byte alphanumeric characters or more, the thumbnail is not displayed. (see page 106)
 - When playing back in series several kinds of content with different aspect ratios, the image may be distorted momentarily when switching content.
It is recommended to unify the aspect ratio for consecutive playback.

■ Inserting the USB memory

Insert the USB memory to the USB terminal on the side of the display.

■ Removing the USB memory

Make sure that the monitor of the USB memory is not flashing, and then remove.

Note

- When inserting the USB memory, confirm the direction of the plug not to damage the terminal.
- Please note following points when removing the USB memory.
 - The indicator of the inserted USB memory will be blinking while the display is reading out the data. Do not remove the USB memory while it is blinking.
 - When using a USB memory without indicator, you cannot recognize when the display is reading out the data. Please remove it from the display after closing “Memory viewer” or turning off the display.
 - Do not insert and remove the USB memory frequently. Remove the USB memory at least 5 seconds after insertion. And insert at least 5 seconds after removal. The display needs some time to detect insertion or removal of the USB memory.

Note

- During accessing to the USB memory, do not turn off the power or remove the USB memory because the data in the USB memory might get damaged. During accessing, the USB memory is blinking.
- The USB memory allows you to insert or remove regardless of the power status of the display.

Displaying the “Memory viewer” screen

Press <INPUT> to switch the input to [MEMORY VIEWER].

Assigning input switch functions to the numeric buttons (<1> to <6>) can switch to [MEMORY VIEWER] with a single touch of a button. (see page 63)

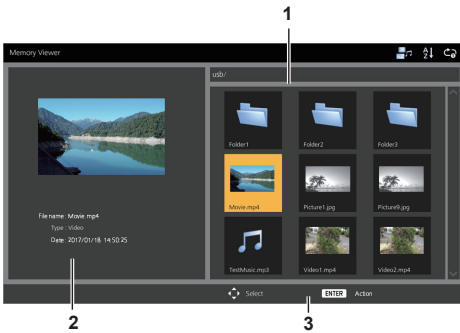

The thumbnails or the file list is displayed.

You can switch the display between the thumbnail view and file list view by setting [Setup] - [Memory viewer settings]. (see page 63)

Note

- Use the remote control to operate “Memory viewer”.

Thumbnail view

1. Thumbnails

Displays folders, pictures, videos and music files in the folder.

The following icons will be displayed.

In the thumbnail view, if images for thumbnails can be displayed, icons are replaced with automatically created thumbnail images.

Note

- If the image includes EXIF information, orientations of the thumbnail image and the playback image may differ.

Moves to the upper level when selected.

Moves to the lower level when selected.

Picture file.

Video file.

Music file.

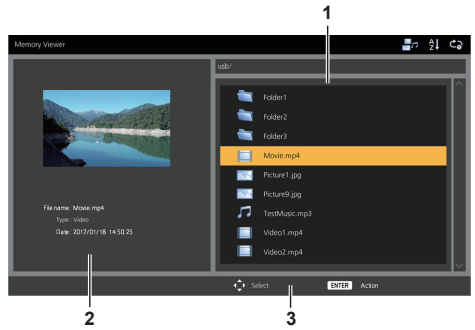

The file has a supported extension but cannot be played.

2. Information of the selected file.

3. Remote control operation guide

File list view

1. File list

Displays folders, pictures, videos and music files in the folder.

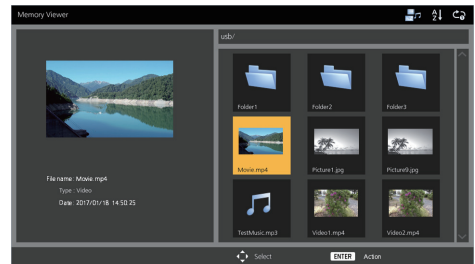

2. Displays information of the selected file.

3. Remote control operation guide

Exiting “Memory viewer”

Exit “Memory viewer” before removing the USB memory.

Playing the pictures

Select a file in the same manner in the file list view.

1 Thumbnails / File list

Press ▲▼◀▶ to select the desired file.

2 Press <ENTER>.

The picture will be displayed on the full screen.

1. Remote control operation guide

Press the remote control buttons to perform the following operations.

◀ : Skip to the previous file.

▶ : Skip to the next file.

▲ : Rotate the picture clockwise (90°).

▼ : Rotate the picture counterclockwise (90°).

<ENTER> : Pause / Restart playing.

<RETURN> : Return to the list view.

<1> : Not used

<2> : Display / Hide the detail of the content that is being played back.

<3> : Not used

<4> : Not used

<5> : Display / Hide the remote control operation guide.

<6> : Not used

Pressing <ENTER> during play stops the play temporarily. Press it again to restart the play.

Pressing ◀ during play starts the play from the previous picture and pressing ▶ from the next picture.

It is possible to set play interval in [Setup] - [Memory viewer settings]. (see page 63)

3 Press <RETURN>.

Returns to the thumbnail view or file list view.

Playing the video / music

Select the desired file in the same manner as "Playing the pictures". (see page 106)

1 Thumbnails / File list

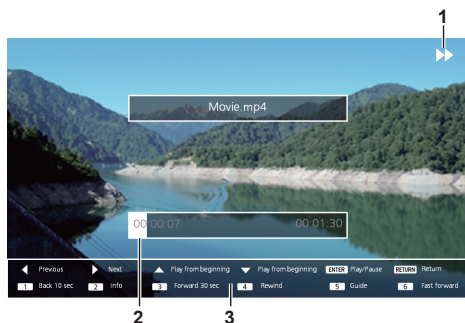

Press ▲▼◀▶ to select the desired file.

2 Press <ENTER>.

The video will be displayed on the full screen.

Note

- The music icon is displayed on the screen for music playback.

1. Fast forward / Rewind / Pause indication

2. Time bar

3. Remote control operation guide

Press the remote control buttons to perform the following operations.

Pressing <4> during play will rewind and <6> will fast forward the video. The speed changes in 2 steps each time you press the button, and returns to the normal play.

◀ : Skip to the previous file.

▶ : Skip to the next file.

▲ : Play from the beginning. (Plays the current file from the beginning.)

▼ : Play from the beginning. (Plays the current file from the beginning.)

<ENTER> : Pause / Restart playing.

<RETURN> : Return to the list view.

<1> : Skip 10 seconds backward.

<2> : Display / Hide the detail of the content that is being played back.

<3> : Skip 30 seconds forward.

<4> : Rewind.

<5> : Display / Hide the remote control operation guide.

<6> : Fast forward.

3 Press <RETURN>.

Returns to the thumbnail view or file list view.

■ Disabled functions

While using the "Memory viewer", the following main unit's functions are disabled.

- [Read user image] in [Image settings]
- Multi display
- [Digital zoom]
- [No signal power off]
- [Position]
- [Function button settings] function for the numeric buttons (<1> to <6>)

(Disabled while content is being played)

Note

- To prevent image retention on the liquid crystal panel, using the screensaver function is recommended. (see page 50)

About HDMI-CEC function

The HDMI-CEC function enables the remote control of this unit alone to operate the basics of HDMI-CEC compatible devices by the interlocking control between this unit and such devices. Also, this function enables the remote control (or main unit's buttons) of a HDMI-CEC compatible device alone to turn on/off this unit and switch input.

Connection

Connect the HDMI-CEC compatible device to HDMI 1 or HDMI 2 terminal.

① HDMI cable (commercially available)

② DVD Recorder / DVD Player, Blu-ray Recorder / Blu-ray Player

Setting

- ① Make the setting on the connected device (HDMI-CEC compatible device) so this function can operate.
- ② Set [HDMI-CEC settings] - [HDMI-CEC control] to [Enable]. (see page 53)
- ③ Turn on all the devices, and turn this unit off and on. Then check if images can be seen correctly with HDMI1 or HDMI2 input.

Interlocking devices

Performs the following interlocking operations by setting each item of [Link function] for [HDMI-CEC settings].

■ [Display → Device] interlocking

- Turning this unit off turns off all the connected HDMI-CEC compatible devices.
- Turning this unit on turns on the HDMI-CEC compatible device connected to [HDMI1] or [HDMI2] when the input is [HDMI1] or [HDMI2].
- Switching the input of this unit to HDMI1 or HDMI2 turns on the connected HDMI-CEC compatible device.

Note

- When multiple devices are connected with the [HDMI1] or [HDMI2] input and this unit is turned on with the [Power on / off] setting, the device that was viewed or listened last is turned on.
- When this unit is turned on with the [Power on / off] setting and the device that was viewed or listened last with the [HDMI1] or [HDMI2] input is not connected, a device displayed for [HDMI1] or [HDMI2] of [HDMI-CEC settings] is turned on.

■ [Device → Display] interlocking

When set to [Power on] or [Power on / off]:

- Turning on the HDMI-CEC compatible device turns this unit on, and switches the input to HDMI1 or HDMI2 to which the device is connected.
- Starting to play back on the HDMI-CEC compatible device turns this unit on, and switches the input to HDMI1 or HDMI2 to which the device is connected.
- Starting to play back on the HDMI-CEC compatible device switches the input of this unit to HDMI1 or HDMI2 to which the device is connected.

When set to [Power on / off]:

- Turning off the HDMI-CEC compatible device of input (HDMI1/HDMI2) with which you are currently viewing or listening turns off this unit.

Note

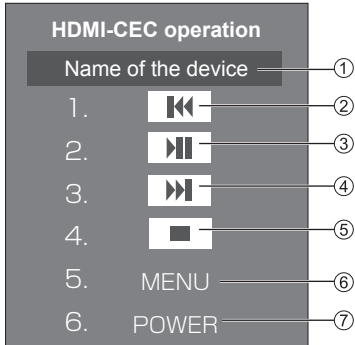

- The device interlocking function, which turns off this unit, realizes the interlocking operations by monitoring signal statuses of devices.
Depending on the setting, the device continues to output signals even in the power-off state. In this case, the interlocking function does not operate. In this case, refer to the manuals of the devices.
- Input will not be switched when [Options] - [Input lock] is set.
- Depending on the display status or video equipment status, such as during start-up, the interlocking operation may not be performed.

Operating a device (using the remote control of this unit)

Display the operation screen in [Setup] - [HDMI-CEC settings] - [HDMI-CEC operation].

Operating a device is possible from [5.MENU] using the remote control of this unit.

Operation screen

- ① Displays the name of the device to operate.
- ② Plays from the position where programs or scenes are skipped backward by the number of pressed times.
- ③ Play/Pause (Toggle operation)
- ④ Plays from the position where programs or scenes are skipped forward by the number of pressed times.
- ⑤ Stop
- ⑥ Displays the setting menu of the device.
- ⑦ Controls the power of the device.

Note

- It is possible to operate HDMI-CEC compatible device with the numeric buttons <1> to <6>.

■ Menu operation of HDMI-CEC compatible devices

When the setting menu of the HDMI-CEC compatible device is displayed, it is possible to operate the menu with the remote control of this unit (<ENTER>, ▼▲◀▶, <RETURN>).

Note

- It is not possible to operate the menu of the HDMI-CEC compatible device in the following condition.
 - When the menu ([Setup] / [Picture] / [Sound] / [Position]) or submenu of this unit is displayed

Data Cloning

Menu settings and adjusted values of a single display can be copied to multiple displays via LAN or using a USB memory.

■ Data that can be copied

Settings and set values of [Picture], [Sound], [Setup], [Position] and [Options] menus

User image registered in [Setup] - [Image settings]

- The following data cannot be copied. Setting is required for each display.

[Date and time]

Setting for [Network settings] - [LAN setup]

[Synchronize display setting]

[Time zone]

[NTP synchronization]

NTP server name

DNS server

Display ID in [Display ID]

■ Supported device

- Commercially available USB memory devices are supported. (Those with security functions are not supported.)
- USB memory devices other than those formatted in FAT16 or FAT32 cannot be used.
- Up to 32 GB of USB memory in size are supported.
- Only single partition configuration is supported.

Note

- If the sizes of the displays are different, the cloning function does not operate. Use the common sized displays.
- Set the input to something other than [USB] or [MEMORY VIEWER], and perform the data cloning.
- [USB data cloning] menu can also be displayed using the main unit buttons.

Operate in the same way as described in "Options Adjustments" - "Unit" (see page 67).

- The remote control is necessary to operate [LAN data cloning].

Copying data to other display via LAN

- 1 Display [Setup] menu pressing <SETUP>.
- 2 Select [OSD language] with ▲▼ and press <ENTER> for over 3 seconds.

The following display appears.

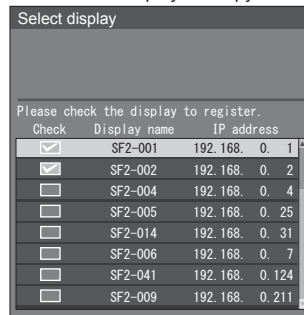

- 3 Select [LAN data cloning] with ▲▼ and press <ENTER>.
- 4 Select [Select display] with ▲▼ and press <ENTER>.

Displays on the same subnet are listed.

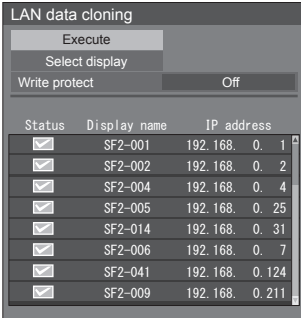

- 5 Select the display to copy the data to with ▲▼ and press <VOL +>.

Select all the displays to copy the data to.

- 6 Press <ENTER>.

7 Select [Execute] with ▲▼ and press <ENTER>.

Note

- Data cannot be copied to the display for which [Write protect] is set to [On]. Set this to [On] to prevent [LAN data cloning] from being performed mistakenly when data copy is not necessary.
- Once [LAN data cloning] is performed, [Write protect] is set to [On].

8 A confirmation window appears.

Select [Execute] with ◀▶ and press <ENTER>.

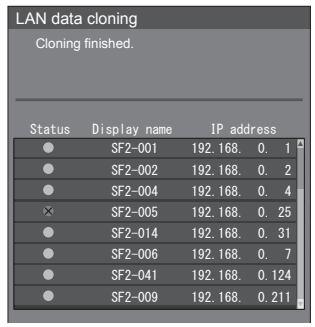

Data copy to the display starts.

9 The exit screen appears.

The green mark on the list shows the data has been copied successfully. The red mark shows failure. If the red mark appears, check the LAN cable connection or power status of the display of the copy destination.

If the data copy has finished, the message appears on the display of the copy destination.

10 Switch the <Main Power On / Off button> (○ / |) on the display of the copy destination to (○) to turn the power OFF.

The copied content is applied to the display.

- If the <Main Power On / Off button> is locked, please disconnect the AC cord plug from the wall outlet.

Note

- If the data is copied with [POWER button lock] set to [On], this function operates after turning the power off, and the <Power button (Unit)> cannot be used to turn the power on. In this case, remove the power plug, wait sufficient time, and then connect the power plug again to turn the power on.
- [POWER button lock] function is only for TH-65SF2U, TH-55SF2U, TH-49SF2U and TH-43SF2U.

Copying the display data to the USB memory

- 1 Insert the USB memory device to the USB terminal at the side of the display.

Note

- Depending on the type of a USB memory device, it may come in contact with the periphery such as a back cover, and cannot be attached. Use a commercially sold extension cable, or use a small type of a USB memory device connectable to this unit.
- Failure to save in or read from the USB memory displays an error message.

- 2 After the [Select copy type] screen is displayed, go to the step 6.

When the [Select copy type] screen is not displayed, follow the steps 3 to 5 to display.

- 3 Display [Setup] menu pressing <SETUP>.
- 4 Select [OSD language] with ▲ ▼ and press <ENTER> for over 3 seconds.

The following display appears.

- 5 Select [USB data cloning] with ▲ ▼ and press <ENTER>.
- 6 Select [Display → USB Memory] with ▲ ▼ and press <ENTER>.

- 7 Select [YES] with ◀ ▶ and press <ENTER>.

Data copy to the USB memory starts.

The following message is displayed after data copy has finished.

- 8 After data copy has finished, remove the USB memory device from the USB terminal.

Copying the USB memory data to the display

- 1 **Insert the USB memory device, which the data has been copied, to the USB terminal of the display for data copy (same as the step 1 on page 112).**
- 2 **After the [Select copy type] screen is displayed, go to the step 6.**

When the [Select copy type] screen is not displayed, follow the steps 3 to 5 to display.

Note

- If the USB memory containing the data for cloning is connected in power-on state, the [Select copy type] message is displayed.

- 3 **Display [Setup] menu pressing <SETUP>.**
- 4 **Select [OSD language] with ▲ ▼ and press <ENTER> for over 3 seconds.**

The following display appears.

- 5 **Select [USB data cloning] with ▲ ▼ and press <ENTER>.**
- 6 **Select [USB Memory → Display] with ▲ ▼ and press <ENTER>.**

- 7 **Select [YES] with ◀ ▶ and press <ENTER>.**

Data copy to the display starts.

The following message is displayed after data copy has finished.

- 8 **After data copy has finished, remove the USB memory device from the USB terminal.**

- 9 **Turn the power off by switching the <Main Power On / Off button> (○ / |) OFF (○).**

The copied content is applied to the display.

- If the <Main Power On / Off button> is locked, please disconnect the AC cord plug from the wall outlet.
- When USB memory is not removed in the step 8, the message [Select copy type] is displayed when the display is turned on again.

Note

- If the data is copied with [POWER button lock] set to [On], this function operates after turning the power off, and the <Power button (Unit)> cannot be used to turn the power on. In this case, remove the power plug, wait sufficient time, and then connect the power plug again to turn the power on.
- [POWER button lock] function is only for TH-65SF2U, TH-55SF2U, TH-49SF2U and TH-43SF2U.

USB memory network settings

Using a USB memory device, the network setting can be made for multiple displays.

About the setting

The following items in [Network settings] - [LAN setup] can be set.

[IP address], [Subnet mask], [Gateway], [Port]

Note

- [Network settings] - [LAN setup] - [DHCP] is set to [Off].
- [Network settings] - [Network control] is set to [On].
- Make sure that [Network settings] - [USB memory network settings] is set to [Permit].
If it is set to [Prohibit], network setting cannot be made with this function. (see page 62)
- Once the network setting is done with USB memory device, [Network settings] - [USB memory network settings] is set to [Prohibit].

Supported device

- Commercially available USB memory devices are supported. (Those with security functions are not supported. Operation is not guaranteed.)
- USB memory devices other than those formatted in FAT16 or FAT32 cannot be used.
- Up to 32 GB of USB memory in size are supported.
- Only single partition configuration is supported.
- Use a writable USB memory device.

Saving the LAN setting file to the USB memory device

Create the following files, and save them to the USB memory device.

File name: `th-65sf2_network.sh`

Setting Example

```
TH-65SF2_LAN_SETTINGS
A:192.168.0.18
S:255.255.255.0
G:192.168.0.1
P:1024
I:ON
```

TH-65SF2_LAN_SETTINGS:

Fixed characters represent the model name. Be sure to input as follows.

TH-(inch size)(Model name)_LAN_SETTINGS

A: Specifies the IP address.

S: Specifies the subnet mask

G: Specifies the gateway address

P: Specifies the port number

I: Setting this to [ON] can set individual IP addresses for each main unit.

One IP address is assigned to each main unit in the range that can be specified as an IP address.

Note

- Deleting the rows S, G, P and I will not overwrite the deleted setting items. The original setting contents are retained.
- Be sure to fill in the rows of the fixed character and IP address.
- If the network setting fails with this function, an error message is displayed.
If fails, the network setting is not changed.
Be sure to confirm the file description, and insert the USB memory device again.
- This function operates only when a file with the above file name exists in the USB memory device.
- Use one-byte alphanumeric characters to describe file contents.

Copying the USB memory data to the display

- 1 Insert the USB memory device to the USB terminal at the bottom of the display.

- 2 The [LAN setup] screen is displayed after data copy has finished.
- 3 Remove the USB memory device from the USB terminal.

ID Remote Control Function

You can set the remote control ID when you want to use this remote control on one of several different displays. In that case, you need to set the remote control's ID number to match the Display's ID number you have set in [Options]-[Display ID] following the steps below.

Note

- To operate this function, please purchase ID remote controller sold separately.
Object model: N2QAYA000093

Setting the remote control's ID number

1 Set [Controller ID function] to [On].

(see page 74)

- While displaying [Options] menu, you can operate even if the ID does not match.

2 Set the remote control's <ID MODE> switch to <ON>.

3 Pointing the remote control at the Display you want to control, press <ID SET>.

ID set	
Display ID	0
Controller ID	?

4 Press one of <0> – <9>.

Sets the tens digit.

5 Press one of <0> – <9>.

Sets the units digit.

- The steps from 3 to 5 need to be done within 5 seconds.
- Adjustable ID number range is 0 – 100.

Example:

- To set the ID to "1": After step 3, press <0> and then <1>.
- To set the ID to "12": After step 3, press <1> and then <2>.
- To set the ID to "100": After step 3, press <1> <0> <0>.

Cancelling the setting of remote control's ID number (ID "0")

You can operate even if the ID does not match the ID set in [Options]-[Display ID].

Press <ID SET> for more then 3 seconds.

This has the same effect as pressing <ID SET> <0> <0>.

Note

- The ID remote control cannot be used when [Options]-[Display ID] is set to anything other than "0", and the remote control ID is not the same as the [Options]-[Display ID] number. (see page 74)

Entering characters

Some settings require to enter characters.

To enter text, select characters in the on-screen keyboard.

Example: Entering profile names ([Memory save])

The default profile name is [MEMORY1], here, we are changing it to [MY PICTURE] as an example.

1 Select [All delete] with ▲ ▼ ◀ ▶, and press <ENTER>.

MEMORY1

All text is deleted.

To delete individual characters, select [Delete].

2 Select [a / A / @] with ▲ ▼ ◀ ▶, and press <ENTER>.

Switches the keyboard to the upper case alphabet.

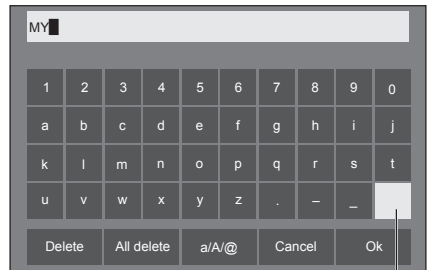

Each time <ENTER> is pressed, the keyboard is switched in the order of lower case, upper case and symbols.

3 Select [M] with ▲ ▼ ◀ ▶, and press <ENTER>.

M

Repeat this process to enter the next character.

4 Select Space key with ▲ ▼ ◀ ▶, and press <ENTER>.

Space key

As shown in step 3, select the characters to enter [PICTURE].

5 When you finished entering the profile name, select [OK] with ▲ ▼ ◀ ▶ and press <ENTER>.

- To cancel saving the profile, select [Cancel].

Preset Signals

This unit can display the video signals shown in the table below.

Corresponding signal	Resolution (Dot)	Scanning frequency		Dot clock frequency (MHz)	Format*3
		Horizontal (kHz)	Vertical (Hz)		
NTSC/NTSC4.43/ PAL-M/PAL60	720 x 480i	15.73	59.94	—	V
PAL/PAL-N/SECAM	720 x 576i	15.63	50.00	—	V
480/60i	720 x 480	15.73	59.94	13.50	R/Y

1600 x 900/60	1 600 x 900	60.00	60.00	108.00	D/H/DL
1600 x 900/60	1 600 x 900	55.99	59.95	118.25	D/H/DL
1600 x 900/60	1 600 x 900	55.92	60.00	119.00	D/H/DL
1680 x 1050/60	1 680 x 1 050	65.29	59.95	146.25	R/Y/D/H/DL
1600 x 1200/60	1 600 x 1 200*4	75.00	60.00	162.00	R/Y/D/H/DL
1920 x 1080/60	1 920 x 1 080*5	66.59	59.93	138.50	R/Y/D/H/DL
1920 x 1080/60	1 920 x 1 080	67.50	60.00	148.50	R/Y/D/H/DL
1920 x 1200/60	1 920 x 1 200*4*6	74.04	59.95	154.00	R/Y/D/H/DL

*1: When 1035/60i signal is input, it is displayed as 1080/60i signal.

*2: Pixel-Repetition signal (dot clock frequency 27.0 MHz) only

*3: Signals to represent formats are as follows.

V : Composite Video (AV IN)

R : D-sub RGB (PC IN)

Y : YCbCr/YpPr (PC IN)

D : DVI-D (DVI-D IN)

H : HDMI (HDMI 1, HDMI 2)

DL : DIGITAL LINK (DIGITAL LINK)

The analogue input supports onG and onY.

*4: Displayed with image elements thinned out in the image processing circuit.

*5: Based on VESA CVT-RB (Reduced Blanking) standard

*6: Not supported when [DIGITAL LINK mode] is set to [Long reach].

Note

- An auto detected signal format may be differently displayed from the actual input signal.
- [i] shown after the number of dots of resolution means the interlace signal.
- When 1080/30PsF signal and 1080/25PsF signal are input, they are processed as 1080/60i signal and 1080/50i signal, and then displayed.

Shipping condition

It is possible to reset the following data to the factory settings.

Settings and set values of [Picture], [Sound], [Setup], [Position] and [Options] menus

User image registered in [Setup] - [Image settings]

■ Remote control

- 1 Press <SETUP> to display the [Setup] menu.
- 2 Select [OSD language] with ▲ ▼ and press <ENTER> for more than 3 seconds.

The following screen will be displayed.

- 3 Select [Shipping] with ▲ ▼ and press <ENTER>.

- 4 Select [YES] with ◀▶ and press <ENTER>.

The message [Shipping (Wait a moment)] will be displayed.

- 5 After the message [Please turn off the power] is displayed, turn the power off pressing <Main Power On / Off button>.

- If the <Main Power On / Off button> is locked, please disconnect the AC cord plug from the wall outlet.

■ Unit

- 1 Press <MENU (Unit)> for several times and display the [Setup] menu.
- 2 Select [Menu display duration] with ▲ ▼, and then press and hold <ENTER (Unit)> for more than 5 seconds.
- 3 Select [YES] with <- (Unit)> and press <ENTER (Unit)>.
The message [Shipping (Wait a moment)] will be displayed.
- 4 After the message [Please turn off the power] is displayed, turn the power off pressing <Main Power On / Off button>.

- If the <Main Power On / Off button> is locked, please disconnect the AC cord plug from the wall outlet.

Troubleshooting

Before you call for service, determine the symptoms and make a few simple checks as shown below.

Symptoms		Check
Picture	Sound	
 Interference	 Noisy Sound	Electrical Appliances Cars / Motorcycles Fluorescent light
 Normal Picture	 No Sound	Volume (Check whether the mute function has been activated on the remote control.)
 No Picture	 No Sound	Not plugged into AC outlet Not switched on Picture and Brightness/Volume setting (Check by pressing the <Main Power On / Off button> or the <Standby (ON/OFF) button>.)
 No Picture	 Normal Sound	If a signal with a non-applicable colour system format, or frequency is input, only the input terminal indication is displayed.
 No Colour	 Normal Sound	Colour controls set at minimum level (see page 41, 43)
A display error such as “no picture” occurs, or remote control operation is suddenly disabled.		This unit incorporates highly-advanced software. If you notice an abnormal operation such as “Remote control cannot be operated” or “Display is disturbed”, remove the power plug from the socket outlet, and inset it again after 5 seconds or more to turn the power on. (see page 30)
Power automatically turns off unexpectedly.		Check the settings of [No signal power off], [HDMI1 power management], [HDMI2 power management], [DIGITAL LINK power management], [DVI-D power management], [PC power management] and [No activity power off]. Any of them may be set to [On (Enable)]. (see page 51)
Power indicator is blinking in red.		There is possibility of malfunction. Please contact an Authorized Service Centre.
No remote control operations can be performed.		Check whether the batteries have discharged completely and, if they have not, whether they were inserted properly. Check whether the remote control sensor is exposed to an outdoor light or a strong fluorescent light. Check whether any obstacle is present between the remote control sensor and the remote control. If the installation condition is normal, pull out the remote control sensor from the edge side of the main unit when using. Check whether the remote control designed specifically for use with the unit is being used. (The unit cannot be operated by any other remote control.) Check whether the option other than [Off] is selected in [Controller user level] in the [Options] menu. (see page 73) Check whether [Controller ID function] in [Options] menu is set to [On]. (see page 74) Check whether <ID MODE> switch is set to <ON>. (When using ID remote controller) (see page 115)

Symptoms	Check
[Controller ID function] function cannot be used. (When using ID remote controller)	Check whether [Controller ID function] is set to [On], or <ID MODE> switch is set to <ON>. (see page 74) (When [Controller ID function] is set to [On], you need to set <ID MODE> switch to <ON> and set the ID number.)
The top or bottom of the picture on the screen is cut off.	The image position has been adjusted in the [Position] menu. Adjust the position of the picture on the screen. (see page 38, 39)
There are areas at the top and bottom of the screen where picture is not displayed.	When using a video software program (such as a cinema size program) with a screen wider than one in the 16:9 mode, blank areas separate from the images are formed at the top and bottom of the screen.
Parts of the unit become hot.	Even when the temperature of parts of the front, top and rear panels has risen, these temperature rises will not pose any problems in terms of performance or quality.
There is no picture displayed or sound output sometimes.	When HDMI or DVI signals are input to the Display using a selector or distributor, sound or images may not be output in the normal fashion depending on the selector or distributor used. The symptoms may be improved by turning the power off and on again, or by replacing the selector or distributor.
The RS-232C is uncontrollable. (TH-65SF2U, TH-55SF2U, TH-49SF2U, TH-43SF2U, TH-55SF2E, TH-49SF2E, TH-43SF2E)	Check whether the connection has been made properly. (see page 23)
The RS-232C is uncontrollable. (TH-65SF2E)	Check whether the connection has been made properly. (see page 23) To control RS-232C with the Display's SERIAL IN terminal: Check that [Network settings] - [Serial control] is set to [SERIAL IN]. To control RS-232C with the twisted pair cable transmitter: Check that [Network settings] - [Serial control] is set to [DIGITAL LINK], [Network settings] - [Network control] is set to [On] and [DIGITAL LINK mode] is set to [Auto], [DIGITAL LINK] or [Long reach]. (see page 59, 60)
The LAN is uncontrollable. (TH-65SF2U, TH-55SF2U, TH-49SF2U, TH-43SF2U, TH-55SF2E, TH-49SF2E, TH-43SF2E)	Check that the connection has been made properly. (see page 78) To control with WEB browser control or command control, check that [Network settings] - [Network control] is set to [On]. (see page 59) Check that [LAN setup] is set properly. (see page 59) When connecting to a device of AMX, Extron or Crestron Electronics, Inc., set [AMX D. D.], [Extron XTP] or [Crestron Connected™] according to the device to use. (see page 61)

Symptoms	Check
The LAN is uncontrollable. (TH-65SF2E)	<p>Check that the connection has been made properly. (see page 78)</p> <p>To control with WEB browser control or command control, check that [Network settings] - [Network control] is set to [On]. (see page 59)</p> <p>Check that [LAN setup] is set properly. (see page 59)</p> <p>When connecting to a device of AMX, Extron or Crestron Electronics, Inc., set [AMX D. D.], [Extron XTP] or [Crestron Connected™] according to the device to use. (see page 61)</p> <p>See the [DIGITAL LINK status] - [Signal quality] information to check the LAN cable status such as whether the LAN cable is disconnected or the cable is not shielded. (see page 61)</p>
There is no picture displayed or sound output from the [DIGITAL LINK] terminal.	<p>Check whether the connection has been made properly between the video (output) equipment and twisted pair cable transmitter and between the twisted pair cable transmitter and this product. (see page 79)</p> <p>Check that [Network settings] - [DIGITAL LINK mode] is not set to [Ethernet]. (see page 60)</p>
The file can be played back with "USB media player", but not with "Memory viewer"	Check the playback file specifications of "USB media player" (see page 95) and "Memory viewer" (see page 104).

LCD Display panel

Symptoms	Check
The screen darkens slightly when bright pictures with minimal movements are shown.	The screen will darken slightly when photos, still images of a computer or other pictures with minimal movements are shown for an extended period. This is done to reduce image retention on the screen and the shortening of the screen's service life: It is normal and not indicative of malfunctioning.
It takes a while for the picture to appear.	The unit digitally processes the various signals in order to reproduce esthetically pleasing images. As such, it sometimes takes a few moments for the picture to appear when the power has been turned on, when the input has been switched.
The edges of the images flicker.	Due to the characteristics of the system used to drive the liquid crystal panel, the edges may appear to flicker in the fast-moving parts of the images: This is normal and not indicative of malfunctioning.
There may be red spots, blue spots, green spots and black spots on the screen.	This is a characteristic of liquid crystal panels and is not a problem. The liquid crystal panel is built with very high precision technology giving you fine picture details. Occasionally, a few non-active pixels may appear on the screen as fixed points of red, blue, green, or black. Please note this does not affect the performance of your LCD.
 <p>Image retention appears</p>	Image retention may occur. If you display a still picture for an extended period, the image might remain on the screen. However, it will disappear when a general moving picture is displayed for a while. This is not considered as malfunction.

This LCD Display uses special image processing. Hence a slight time lag may occur between image and audio, depending on the type of input signal. However, this is not a malfunction.

Specifications

Model No.

65-inch model	: TH-65SF2U
55-inch model	: TH-55SF2U
49-inch model	: TH-49SF2U
43-inch model	: TH-43SF2U
65-inch model	: TH-65SF2E
55-inch model	: TH-55SF2E
49-inch model	: TH-49SF2E
43-inch model	: TH-43SF2E

Power Consumption

65-inch model	155 W
55-inch model	115 W
49-inch model	110 W
43-inch model	95 W

Power off condition

0.3 W

Stand-by condition

0.5 W

LCD Display panel

65-inch model	65-inch IPS panel (Edge LED backlight), 16:9 aspect ratio
55-inch model	55-inch IPS panel (Edge LED backlight), 16:9 aspect ratio
49-inch model	49-inch IPS panel (Edge LED backlight), 16:9 aspect ratio
43-inch model	43-inch IPS panel (Edge LED backlight), 16:9 aspect ratio

Screen size

65-inch model	1 428 mm (W) × 803 mm (H) × 1 639 mm (diagonal) / 56.2" (W) × 31.6" (H) × 64.5" (diagonal)
55-inch model	1 209 mm (W) × 680 mm (H) × 1 387 mm (diagonal) / 47.6" (W) × 26.7" (H) × 54.6" (diagonal)
49-inch model	1 073 mm (W) × 604 mm (H) × 1 232 mm (diagonal) / 42.2" (W) × 23.7" (H) × 48.5" (diagonal)
43-inch model	941 mm (W) × 529 mm (H) × 1 079 mm (diagonal) / 37.0" (W) × 20.8" (H) × 42.5" (diagonal)

No. of pixels

Disposal of Old Equipment and Batteries

Only for European Union and countries with recycling systems

These symbols on the products, packaging, and/or accompanying documents mean that used electrical and electronic products and batteries must not be mixed with general household waste. For proper treatment, recovery and recycling of old products and used batteries, please take them to applicable collection points in accordance with your national legislation.

By disposing of them correctly, you will help to save valuable resources and prevent any potential negative effects on human health and the environment.

For more information about collection and recycling, please contact your local municipality. Penalties may be applicable for incorrect disposal of this waste, in accordance with national legislation.

EU

Note for the battery symbol (bottom symbol)

This symbol might be used in combination with a chemical symbol. In this case it complies with the requirement set by the Directive for the chemical involved.

Information on Disposal in other Countries outside the European Union

These symbols are only valid in the European Union.

If you wish to discard these items, please contact your local authorities or dealer and ask for the correct method of disposal.

Notice (U.S.A. only)

Disposal may be regulated in your community due to environmental considerations. For disposal or recycling information, please visit Panasonic website:

<http://www.panasonic.com/environmental>

or call 1-888-769-0149.

Customer's Record

The model number and serial number of this product may be found on its rear panel. You should note this serial number in the space provided below and retain this book, plus your purchase receipt, as a permanent record of your purchase to aid in identification in the event of theft or loss, and for Warranty Service purposes.
