

ORANGE ROCKER 15

FROM BEDROOM TO HEADROOM | TWIN CHANNEL | ICONIC TERROR STYLING

Capable of 0.5, 1, 7 or 15 Watts of output the Rocker 15 Terror is the head only version of the enormously popular Rocker 15 Combo that moves seamlessly from the home, to the studio, to the stage. Finally, a small, two channel, bedroom-friendly all-valve amp that you can legitimately gig! Thanks to the same beefy transformers as the combo version, the Rocker 15 has a remarkably potent delivery which takes full advantage of its EL84 output section. Even when scaling back the power, the amp's tone stays fat and full, oozing warm valve compression and saturation without disturbing the neighbours.

The 'Natural' channel has one control knob for volume, giving you absolute transparency; single coils ring out with true clarity and humbuckers sing with woody overtones.

The 'Headroom/Bedroom' attenuator switch makes the Rocker 15, an amp for the bedroom through to the stage and everywhere in-between.

The Rocker 15 Terror uses the same proprietary transformers found in all our iconic Terror Series. As with all Orange amps, the Terror is built to last.

FEATURES:

CONTROLS (RIGHT TO LEFT):
