

Modular Device Stand – MDS-100 & MDS-X Expander

The MDS-100 modular desktop stand from Ultimate Support has been designed to support the wide variety of hardware based performance and recording configurations musicians all over the world are creating. Whether you are using desktop synthesizers, adapting effects pedals to your hardware synths or looking for a way to elevate your control surfaces, the MDS-100 is the customizable solution you've been looking for. The adjustable clamping walls and divider allow you to firmly place more than one device on the surface- and you can expand to a two tier configuration using two MDS-100 units and our MDS-X expander. Forget about overpriced, proprietary solutions that limit your choices, and take control of your setup with the MDS series Modular Device Stands.

Center Dividing Wall

For additional flexibility the MDS-100 has a dividing wall, allowing devices to be placed side by side. Helping customize your studio setup.

Adjustable Walls

Adjustable side walls can retract and expand to fit a number of devices and lock them in place. These devices include tabletop synthesizers, drum machines, effects pedals, and more.

Expand to Two Tiers

Stack two MDS-100 units using the MDS-X Expander kit. This simple accessory securely attaches two units together, and helps minimize the footprint of your favorite hardware.

MDS-100 Specs
