Since Sound-Craft Systems introduced the first portable sound lectern in 1957, The Lecternette was a staple for presenters worldwide, with thousands still in use today. Designed for easy transport and set-up, The Lecternette was equally at home indoors or out. We excited to introduce the new generation of portable sound lecterns....The Announcer R750.

The new R750 Announcer adds several new features to an already great product. With the addition of the B0051 sound system, the R750 is the ultimate portable lectern. A heavy-duty plywood cabinet clad in industrial grade carpet is built for commercial usage, making it ideal for industrial, institutional, and rental applications. It's still the most portable and durable product on the market. The R750 is available in the standard table top version or can be paired with the optional RS7 folding floor stand.
