

Stackable Mic Stand

MS7325

Features and Benefits

The funny thing about round base stands, compared to tripods, is that they take up less room on stage, but more room in the truck, the closet, and anywhere else you are not actually using them. Well the MS7325 solves that problem. Thanks to a carefully shaped notched base, up to five MS7325's can be stacked for storage and/or transport. The 9.85" weighted base provides excellent stability. Height adjustment from 34" to 61" suits the MS7325 to most miking applications. Compatible with all On-Stage Stands clips and boom arms.
