GS76 Game Show

OWNERS MANUAL

Thank you for your purchase of the GS76 Game Show. This device determines which "contestant" has identified a proper response first.

INSPECTION

1. Unpack and Inspect the GS76 package

Your GS76 was carefully packed at the factory in a protective carton. Nonetheless, be sure to examine the unit and the carton for any signs of damage that may have occurred during shipping. If obvious physical damage is noticed, contact the carrier immediately to make a damage claim. We suggest saving the shipping carton and packing materials for safely transporting the unit in the future.

2. Please complete the Warranty Registration Card and return it to the factory.

DESCRIPTION

The GS76 Controller (shown above) has eight modular telephone jack inputs on the back, eight green "ring-in" LEDs and a red "Status" LED on the top, and a "Join" modular telephone jack and a DC Input Jack on the front of the unit.

Each GS76 Remote consists of a "Ring-in" switch, a green "Ring-in" LED, and a modular telephone jack input. Each Remote comes with a 15 foot length of telephone cord.

OPERATION

Upon power-up, the GS76 controller beeps and the eight indicator LEDs light up. After approximately three seconds, the indicator LEDs go out and the Ready LED lights.

During operation, when a remote button is pressed, all other remotes are locked out, and the corresponding indicator LED on the controller will light. Approximately three seconds after a contestant has rung-in, the indicator LED will go out, and the Ready LED will light again indicating the system is ready for another use.

Note: Before beginning contests, press the "Ring-In" switch on each Remote several times to ensure proper operation.
