

C-3RVAM/3RVAM SERIES

Kramer 3RVAM series are high quality 3 RCA cable assemblies designed for video and stereo audio signals. They are perfect for connection of DVD players, VCR's, and consumer style display devices which are routinely used in professional AV systems.

- Quality Cable - Constructed using high quality 75 ohm RG-59 for the video, and two smaller coaxes for L/R audio signals.
- Precision Connection - Gold plated RCA connectors are featured for the best possible signal transmission without corrosion.
- Easy to Use - Connectors are molded and color coded yellow, red and white to match video and audio connectors found on most consumer style equipment.
- Wide selection of lengths – Available from 3 to 50 feet.
