

VoiceTone Harmony-G: Vocal Harmony & Effects for Guitarists

Are you looking to turn heads at every gig and rehearsal with your singing? You will with VoiceTone Harmony-G, the smartest vocal harmony and effects device you're likely to plug your guitar and mic into. Harmony-G simultaneously gives you two backup harmony singers and realistic vocal doubling with effortless control. Not only that, but Harmony-G also includes adaptive live engineer effects that can automatically optimize your vocals, guitar sound and effects for you. While you focus on your music, Harmony-G backs you up with fully produced vocal sound.

making sure they stand up to the rough treatment they're going to get onstage or kicking around a rehearsal room floor.

Live Engineer Effects

The Tone switch on Harmony-G applies adaptive EQ, compression and de-essing algorithms that dynamically polish your vocal tone. The Auto-Mix function on the guitar input intelligently creates a mix of vocal, effects, and guitar that's fully produced at the stereo outputs.

Take Control of Your Sound

Feel like you're wrestling with others over your sound? From the moment you plug your mic into VoiceTone Harmony-G, you're in control of the tone and effects on your voice. Adaptive mixing and harmony arrangement algorithms follow your playing and singing. Straightforward controls allow you to step through presets and A/B settings.
