RS-600 Series Beltpacks

Lightweight, ergonomic and rugged. Featuring built-in limiters for mic and headset, electret mic compatible, visual and audio call signals, auxiliary mini headset jack, 4 set modes storage, audio shaping and noise-gate. RS232 computer set-up is also supported. The 2-channel models have program input and level control. All models have TW/RTS compatibility. Clear-Com standard party-line is on the RS601/602/622 models. All models have male and female line connectors for loop-through. RS601/603/623 models have 3-pin XLR line connection, which uses standard microphone cable. The RS602/622 have a 6-pin XLR for 2-channel party-line interconnect. RS601/602/603 have the standard 4-pin male XLR headset connector. The RS622/623 have a 6-pin male XLR split-feed headset connector. The RS603R has a 4-pin female headset connector for RTS headset compatibility. The RS623R has a 5-pin female split feed XLR connector for RTS headset compatibility. All TW/RTS models interface directly with RTS equipment but need either a TWC10A or TWC104 for 2 channel operation with Clear-Com party-line systems.

RadioCom™ BTR300 VHF Wireless Intercom System

The BTR-300 VHF wireless intercom system is the first wireless intercom to be designed specifically with DTV band allocations in mind. Improved front end filtering allows the BTR-300 to be used in RF environments where other wireless intercoms simply can't function. The BTR-300 is compatible with wired AudioCom and ClearCom systems. Additional filtering capabilities and unique channel assignments allow up to four base stations and 16 individual belt-packs to be used simultaneously. Break the chains of wired communications without breaking the budget. Get the reliable, affordable RadioCom BTR-300.
