

RADIAL WORKHORSE 5000 SERIES

The Workhorse 5000 is a module frame that incorporates full mixing capabilities to a stereo bus, monitor output and headphones. Features 8 slots that are backward compatible to previous API formats while adding greater I/O connectivity. Each slot is equipped with male and female XLR with parallel 1/4" TRS for direct to module input and output connections. An expansion bus allows multiple Workhorses to be combined for larger recording systems. The mixer can also be used as an 8-channel analog summing box for those that prefer to combine tracks in the analog domain.

Super. Natural. Sonics.

There are a lot of mic pres out there that sound supernatural, but you spend forever trying to get their ghosts out of your mix. True Systems has a better idea...

Introducing the pT2-500. Serious analog depth and warmth. Ultra-resolution musicality. 70dB of gain. EXCEPTIONAL headroom. Low noise. AMAZING sonics. IN and THRU jacks for more useful DI connection. In short, we've built a mic pre you'd design; one with super, natural sonics and incredible flexibility.

The pT2-500 is designed to work seamlessly with the API Lunchbox™ and similar systems, so it's ready to work when you are. And it's easy to spot - just reach for the strip that looks as warm and natural as it sounds.
