

**NEW!**

**GLYPH FORTE RAID EXTERNAL RAID ARRAY**

Features eSATA, FireWire 800/400, USB 2.0 connectivity, hardware RAID 0, 1, 3, 5, 10, and Spanning modes. These RAID modes provide speed, fault-tolerance, or a combination of both. If a drive fails when running in one of the fault-tolerant drive modes (RAID 1, 3, 5, 10), you can remove and replace it with a spare drive without losing any data. ForteRAID also allows for a "hot-spare" (an online spare drive present in the chassis, allowing for immediate rebuild without user intervention). With up to 12TB capacity, it supports NLE applications such as Avid Xpress and Adobe Premiere. It has also been tested with Final Cut Pro.

ITEM	DESCRIPTION	PRICE
<b>FTRD-2000</b>	2TB External RAID, FW800/400/USB2.0/eSATA	549.00

**GLYPH GT KEY 800 REMOVABLE HOT-SWAP DRIVE CARTRIDGE**

A unique hot-swappable drive with a high-performance Seagate SATA disk inside. Interchangeable among the GT 051, GT 103, GT 205, and GT 308 FireWire enclosures. It uses 7,200RPM (2TB model@5,900RPM) Seagate drives with Oxford's 924 chip, and performs at bus speeds roughly double that of FireWire 400. It ships in a hard-shell protective carrying case, includes a 3 Year Full Warranty, 2 Years of Free Level I Data Recovery, and 1 Year of Free Overnight Advance Replacement.

**GLYPH GT050Q QUAD INTERFACE**

**HARD DRIVES** Designed for high-speed access to audio and video content, while offering the following interfaces - 2 FW800, 1 FW400, 1 USB2.0 and 1 eSATA. The GT050Q features eSATA external interface technology, supporting speeds up to 1.5GB/sec (150 MB/sec). It's constructed with durable stainless steel and uses trilaminate sound-damping metal, which absorbs drive vibration before it can get to the chassis. Available with up to a 2TB Seagate 7,200RPM drive. Has a 3-year warranty that includes overnight advance replacement service the first year.

**LACIE 12BIG RACK FIBRE**

With 12 enterprise class disks and a 60TB expansion capacity, the LaCie 12big Rack Fibre offers the most storage, highest speeds and utmost reliability. It's the ideal solution for film professionals working with HD, as well as IT managers looking for a sophisticated, rock-solid storage solution. Supporting six RAID modes, it allows users to create up to 96 SAS or 60 SATA disk arrays. It features up to (4) 4Gb/s fibre channel connections, and when combined with active/active dual RAID controllers, it can support six simultaneous 4:2:2 uncompressed video streams in RAID 5. In addition to the 12 hot-swappable disks and individually tested enclosures, the LaCie 12big Rack Fibre's dual RAID controller option, two power supplies and redundant cooling units are hot-swappable, providing the ultimate in redundancy and security. Please call for more info.

**LACIE D2 BLU-RAY DRIVE**

Engineered for professional video authoring houses, this 12x Blu-ray drive records, rewrites, and plays back HD video. Store up to 4hrs of HD video on a 50GB disc (dual layer) —about 10x more than a DVD. Shoot HD videos from your camcorder, author the videos, and burn them without any quality loss using multiple video codecs (MPEG2, AVC, VC-1). Store large amounts of valuable administrative documents, audio asset libraries, raw video shoots and multiple image files on a single disc for complete peace of mind. The drive's writing process ensures record authenticity and longevity on sturdy write-once discs with an enhanced scratch-resistant hard coating surface. It also offers a packet writing option.

**OWC MERCURY RACK PRO MULTI-INTERFACE WITH HARDWARE RAID**

Specifically designed to meet the performance demands of video and audio production, it comes pre-configured as a hardware controlled RAID 5 "stripe with parity" array to provide both speed and data protection. Now you can experience data transfer rates of over 300 Megabytes per second with Plug & Play simplicity and data reliability. Rear panel selectable Hardware RAID settings including SPAN, 0, 1, 3, 5, 10 and Independent Mode - Each drive appears as independent volume. Mix and match drives of any size and brand and hot swap the drives just like in a four bay drive dock (Independent mode). Features tray-less drive bays for easy drive management, and a "Quad Interface" FireWire 800 & 400, USB 3.0 and eSATA for flexible connectivity. Includes all connecting cables needed for the device. Mac and PC compatible (IRU) rack mount or desk/table RAID solution.
