MACKIE

MACKIE CONTROL UNIVERSAL PRO
This expandable touch-sensitive control surface features 100mm touch-sensitive optical Penny + Giles motorized faders and V-Pot control over software, plug-in effects and virtual instruments. It has 50 dedicated push-buttons, tape-style transport controls, full meter display with track names and parameters, and quick cursor-style buttons for up, down, left, right and zoom. It uses proprietary Mackie communication protocol and onboard USB MIDI interface for direct connection to Mac or PC and up to 3 additional pieces of external MIDI gear. Software-specific Lexan overlays are included and it's expandable via an optional 8 fader extender and Mackie C4 Pro modules. The C4 allows control of up to 32 parameters simultaneously with four 55x2 character backlit LCDs for visual parameter indication and VPot encoders with integrated push-button and LED rings. Works as a standalone and in harmony with Mackie Control Universal Pro (and Extender). It includes C4 Commander Pro software for control of external MIDI-enabled hardware effects, instruments and other devices. Monitors not included.

MCU-PRO	Touch-sensitive control surface	999.99
MACKIE-EXTENDER-PRO	8-fader extension for MCU-PRO	699.99

MIXEDLOGIC

MIXED LOGIC M24 CONTROL SURFACE It features 24 motorized 100mm touch-sensitive Alps faders for controlling audio track faders, master faders, effect returns and aux inputs, group and volume levels of MIDI tracks. The LCD displays the corresponding fader's channel name, control name, fader value, and updates the corresponding channel scribble. It has 24 rotary controls for use as pan controls and can also double for other functions depending on the host software. The top row 16 rotary controls and 16 switches and LEDs are for auxiliary effect send control, dynamics/EQ control, and plug-ins. The 16 switches in the top row are used for Pre/Post select or dynamics functions and double for Window select modes, function switch modes and Aux send mutes. It also has channel select, solo, and mute switches, a dedicated EQ control section, transport and navigation controls, jog shuttle data wheel, zoom, grouping an mode controls. The M24 has 3 MIDI ins/outs and USB connectivity, and supports most major DAW application.

novation

NOVATION LAUNCHPAD CONTROLLER Jointly designed by Ableton and Novation, Launchpad places Ableton Live at your fingertips. With a multi-color 64-button grid and dedicated scene launch buttons, Launchpad is purpose-built for triggering and manipulating clips in Live and offers a totally new way of controlling Ableton's Live mixer. Launchpad's buttons can be used to sketch out beats with drum racks, and they can be assigned to other functions in Live using Ableton's "Learn" mode. It ships with a dedicated "Launchpad Edition" of Ableton Live 8, but can control almost any other music software using Novation's award-winning "Automap" control software. Connect up to 6 Launchpads at a time. It has USB connectivity and works with Windows XP, Vista and Max OSX.

ITEM	DESCRIPTION	PRICE
LAUNCHPAD	USB controller w/ "Launchpad Edition" of Ableton Live 8	149.99

NOVATION NOCTURN PLUGIN CONTROLLER This plug-in controller provides automatic, instant control of all automatable plug-ins within every major DAW/sequencer, including Pro Tools. It features 8 touch-sensitive rotary encoders, each equipped with a bright 11-LED ring, 8 user-assignable illuminated buttons and a smooth, professional 45mm crossfader. Its unique 'speed dial' touch-sensitive rotary encoder instantly takes control of whatever your mouse is focused on. It features the latest Automap Universal 2.0 software, and is USB1.1 and USB2.0 compatible.
