QUAM VANDAL-RESISTANT COMPONENTS FOR CORRECTIONAL INSTITUTIONS

The Quam CIS Series is a vandal-resistant, call-in station with integral speaker/microphone and momentary, normally open, push-to-call button. The Quam CIS6 and CIS8 are vandal-resistant, "listen-only" station with integral loudspeakers. The faceplates are 12 gauge, brushed, stainless steel with tamper-resistant, #6-32 "pin-in-torx" hardware. All CIS models have an impedance of 8 or 45 ohm voice coil, or a 25V multi-tap transformer. All CIS models except the CIS12/25 are weather-resistant. The DTS Series is a desktop intercom station with a vandal-resistant microphone and 3" loudspeaker assembly with push-to-talk (PTT) mushroom button switch. The RSP1 is a IRU relay operated selection panel for 32-circuits - used between control equipment and individual simplex call-in stations and is intended to be racked in a secure location.

TELEX AUDIOCOM MASTER STATIONS These master stations provide user station flexibility with intercom system phantom power in a IRU box. Operators can utilize headset or speaker/mic operation & have full access to all intercom channels both individually & as "all-talk". Users can also utilize features like the Remote Mic Kill function to silence any open mic on the intercom channel so that extraneous noise can be eliminated. It can operate in an unbalanced mode to be completely Clear-Com® compatible. Other features include voice-activated microphone, 1 XLR3 M/F per channel for inputs, RCA speaker output jacks, incoming call indications, XLR-4M headset connector, & it accepts MCP90 series microphones on front panel mic input.

AUDIO

TELEX Audiocom

TELEX AUDIOCOM USER STATIONS Audiocom® user stations are versatile, durable and incredibly flexible. Using a unique modular design concept, US-2002 user stations can be configured in numerous ways to suit virtually any application. User stations can be combined with power supplies of differing types to form a host of master station configurations, or can be used without a power supply so that users can access multiple intercom channels with all of the features of a master station. Up to 4 ES-4000A expansion stations may be connected to the US-2002 (via 1/8" rear data connector) to add up to 16 channels (18 channels total). The ES-4000A typically utilizes the US-2002 microphone & speaker (or microphone headset) for communication with the added channels. The ES-4000A also has individual speaker outputs for independent monitoring of 1 or more of the 4 channels if desired. The user stations can operate in unbalanced mode to be Clear-Com® compatible.

TELEX AUDIOCOM HEADSET STATIONS

The wallmount intercom stations are designed for stationary, wallmount installation in standard 2-gang electrical outlet boxes. They connect to the intercom system using commonly available 22-gauge cable. The user need only connect a headset or telephone style handset to begin communicating. Beltpack stations are ideal for users who will be stationed in a general work area, but who need some mobility and wish to keep their hands free. Most beltpacks feature 4-pin XLR-M headset connector, 3-pin XLR line connector, & can be connected in a daisy chain configuration directly back to the intercom system power supply or master station using low-impedance cables.
