novation 25SL-MKII

NOVATION REMOTE SL SERIES WITH AUTOMAP

The main feature for this series is Automap Pro 3 mode – the SL detects which instruments you have in your project and logically maps the controls to its front panel. The instrument information displays on two backlit LCD screens flanking the top panel of the keyboard. A total of 64 assignable knobs, buttons, and sliders, plus 8 velocity sensitive trigger pads are also present. For integrating with DAWs the unit has built in transport controls. The keys themselves are semi-weighted with full velocity and aftertouch. Plug and play with WinXP/Mac OSX with no drivers to install. The Remote Zero SL control surface has the same capabilities as the rest of the controllers, but lacks keys.
