

**ATLAS SOUND POLE MOUNT 70W AMPLIFIER SYSTEMS** These innovative amplifiers are perfectly suited for projection systems. They install right onto a pole mount via a sealed hole incorporated into the chassis design. Simply install the projector mounting pole, align the amplifier's chassis socket with the 1.5" mounting tube, and clamp the unit at the desired height above the projector mount with the included pole clamp system. Other benefits include an accessory outlet with AC current sense that allows the amplifier to respond instantly from stand-by mode when the projector is powered, as well as separate audio sense turn-on. Systems have balanced Phoenix style and unbalanced RCA inputs, front panel LEDs, and recessed screwdriver adjustable tone and level controls. All models also mount in IRU configurations.

ITEM	DESCRIPTION	PRICE
PA702	2-channel 70W pole mount amplifier system, black	267.50
PA702-W	As above but white	267.50
PA10016	1-channel 100W pole mount amplifier system, black	293.50

**NIGEL B. DESIGN MINI-AMPS** These 4.3" wide energy efficient stereo audio amps can be mounted vertically or horizontally in tight places, making them ideal for use with ceiling-mounted projectors & video displays. The amps turn on automatically within 0.2 seconds of sensing audio input, eliminating clipped audio. The 5000 series is designed for 2-, 4- or 8ohm loads and can be bridged for mono. The 6000 series features a built-in IP gateway controller, USB & contact closure modes, voice lift amplification, and more. The 7000 series are for 70/25V applications. The PLUS series models feature 2-way RS232 as well as Ethernet ports that support most serial control devices (AMX, Crestron, Aurora Multimedia, & others). The 8000 series are based on the 5000s and include remote control wall plates. All accept balanced & unbalanced inputs to the Phoenix connector and require 24VDC external power supplies. Use NB-PSU for 50W models and NB-PS-170 for the 90W amps.
