CANON XA10 PROFESSIONAL CAMCORDER

This compact camcorder records Full HD 1080p via AVCHD, features a Canon 10x video lens, a 3.5" touch panel LCD screen, and a detachable handle with an external mic holder and XLR inputs. Additional features include a native 1920x1080 CMOS image sensor, Canon's DIGIC DV III image sensor, a 35mm equivalent zoom range (30.4-304mm), an 8-blade iris, manual control, frame modes, and infrared mode. Video can be recorded to a 64GB internal flash drive or to (2) SDXC cards. Includes HDMI, component, and composite outputs, (2) XLR audio ins, (1) 1/8" mic in, a 1/8" headphone jack, a LANC-compatible remote control terminal, and a USB 2.0 terminal. Comes with battery, power adapter, wireless controller, lens hood, stylus pen, and USB, stereo video & component cables.

ITEM	DESCRIPTION	PRICE
XA10	Compact HD camcorder w/detachable handle	1999.99

CANON XF100 & XF105 PROFESSIONAL CAMCORDERS

Both cameras employ an MPEG-2, 4:2:2 50Mbps XF codec and 1/3" CMOS sensor for capturing video onto dual compact flash cards (up to 64GB each). The 4:2:2 color sampling offers twice the color resolution of HDV and other 4:2:0 formats. Uniting video, audio and metadata into a single file, they use an MXF (Material eXchange Format) File Wrapper, a widely supported open source format, to maximize compatibility. The 10x HD L-series lens features a SuperRange Optical Image Stabilizer (OIS) system. The lens also offers a 35mm equivalent zoom range of 30.4-304mm, and a customizable manual control ring which can be used for focus, zoom or iris. The DIGIC DV III Image Processor ensures natural, lifelike colors and captures tonal gradations and shadow detail with accuracy. The processor also features Face Detection Technology, allowing the operator to track one subject in a crowd. Both camcorders have 3D assist features such as OIS Lens Shift, and a focal length guide. Their compact size provides an alternative to large 3D rigs allowing crews to work more quickly and efficiently. Each model features a 3.5", 920,000 pixel LCD monitor as well as a 0.24" 260,000 pixel color electronic viewfinder. Both feature a built-in stereo microphone as well as dual XLR inputs for external audio sources, as well as 16-bit PCM audio at 48kHz with auto & manual audio level adjustment. Both models have Mini-B USB 2.0, component out, composite: AV 3.5mm mini-jack & BNC out, HDMI, remote control, & 1/8" TRS headphone jack. The XF105 adds industry-standard HD-SDI output, genlock, and SMPTE time code (in/out) terminals for multi-camera or 3D productions. Each includes lens cap, lens hood, eyecup, battery pack, power adapter, DC cable, wireless controller, shoulder strap, component cable, & XF utilities disc.

CANON VIXIA HF G10

The HF G10 records up to 12 hours of full HD 1920x1080 video to a 32GB internal flash drive or to (2) SDXC-compatible memory card slots. With Relay Recording, the camcorder automatically switches recording from the internal drive to SD memory cards when the memory is full. The camcorder also features a HD CMOS Pro Image Sensor, SuperRange Optical Image Stabilization, instant AF, and Canon Face Detection. Control and view video with the 3.5" Touch Panel LCD screen. The lens has 10x optical and 200x digital zoom. Records 2 or 5.1 channel audio (5.1 requires optional SM-V1 surround mic). Includes USB 2.0, HDMI out, stereo mini-jack mic input, and component and composite out. Includes lens hood, battery, power adapter, and cables.

ITEM	DESCRIPTION	PRICE
HFG10	Flash Memory Camcorder	1499.99

CANON XF300 & XF305 PROFESSIONAL CAMCORDERS

Both employ an MPEG-2, 4:2:2 50Mbps XF codec for capturing 1920x1080 (three 1/3" CMOS sensors) video onto dual UDMA CF cards. The 4:2:2 color sampling offers twice the color resolution of HDV and other 4:2:0 formats. Uniting video, audio and metadata into a single file, they use an MXF (Material eXchange Format) File Wrapper, a widely supported open source format, to maximize compatibility. The 18x HD L-series lens features a SuperRange Optical Image Stabilizer (OIS) system. The lens also offers a 35mm equivalent zoom range of 29.3-527.4mm, and a Full Manual Focus mode. The DIGIC DV III Image Processor ensures natural, lifelike colors and captures tonal gradations and shadow detail with accuracy. It also uses Face Detection Technology for one autofocus option. Each model features a freely rotating 4", 1.23-megapixel LCD monitor. Both feature a built-in stereo microphone as well as dual XLR inputs for external audio sources, as well as 16-bit PCM audio at 48kHz with auto & manual audio level adjustment. The XF300 has Mini-B USB 2.0, component out, composite: AV 3.5mm mini-jack & BNC out, HDMI, remote control, & headphone input. The XF305 adds industry-standard HD-SDI output, genlock, and SMPTE time code (in/out) terminals for multi-camera or 3-D productions. Each includes lens cap, lens hood, eyecup, battery pack, power adapter, DC cable, wireless controller, shoulder strap, component cable, & XF utilities disc.

Your production just got more productive.

Introducing the **Canon XF305 and XF300**, with a codec that gives you the image quality and streamlined workflow to meet a broad range of production needs. The XF series also employs non-proprietary dual CF card recording, and for efficient file management, the MXF File Wrapper facilitates metadata handling throughout the workflow. And then there's the 18x HD L-Series lens (35mm equivalent of 29.3–527.4mm) and three native 1920x1080 Canon CMOS Image Sensors. Which combined, offer a versatile zoom range and unsurpassed image quality. Finally, a feature-laden hand-held that's ready for any assignment.

JVC GYHM750U COMPACT SHOULDER SOLID STATE CAMCORDER

Designed for demanding ENG/EFP applications, it has a 3rd generation digital processing engine that improves picture quality and records in either HD or SD directly to SDHC media. Data rates up to 35Mbps allow 720x480i SD and full HD 1920x1080i 50/60

recording. Dual, hotswappable recording on SDHC cards provides simultaneous recording for instant backup and sequential recording for long recording times. A 20 second retro cache prevents "missed shots". Native recording files include Final Cut Pro-ready .mov, Iso Base XDCAM EX.MP4 and AVI. The optional KA-MR100G docking recorder allows recording on SxS memory cards. Connect the optional KA-A5790 model via the 69-pin chassis connector to provide MPEG2 signal for microwave or long distance cable runs. Includes a HDSDI output, Downconverted SD (DV via IEEE-1394), and (2) XLR audio inputs w/phantom power. Includes a Canon 14:1 HD 4.4mm wide-angle lens, and features a 4.3" flip-out LCD monitor, and uncompressed LPCM 2-channel audio recording.

PANASONIC AG-HPX170 3-CCD ULTRA MOBILE P2 HD CAMCORDER

The lightest member of the P2 Series with a host of enhancements including a 28mm Leica Dicomar™ zoom lens, HD-SDI interface and metadata input/management. It records in HD and SD formats - 1080i, 1080p, 720p, 480i. Its newly enhanced 1/3" progressive 16:9 3-CCD imager delivers an excellent signal-to-noise ratio, lower noise/smear, and exceptional low-light performance (min 3lux). High-end features like Dynamic Range Stretch (DRS) allows for better control over highlights and shadows. The digital signal processor with 14-bit A/D conversion and 19-bit processing assures high-quality recording which is necessary for top-level production and broadcast. Using 32GB P2 cards in the 2 card slots, you can record up to 160min in full frame DVCPRO HD formats, 128min in DVCPRO50, 256min in DVCPRO. Main connectors include HD/SD-SDI out, analog component out, analog composite out, XLR in, line out, IEEE 1394 and USB 2.0. Comes with one 16GB P2 card, CGAD54 5400mA battery (140min), AGB25 AC adapter/battery charger and more.

PANASONIC AG-HPX500 2/3" SHOULDER-MOUNT P2 HD CAMCORDER

This P2 HD camcorder teams the full production-quality of 2/3" 3-CCDs, DVCPRO HD, 4:2:2 sampling & independent frame encoding with the versatility of interchangeable lenses and the creativity of variable frame rates. The AG-HPX500 records in HD & SD formats, including 1080i and 720p in 100 Mbps DVCPRO HD. It features a digital signal processor (DSP) with 14bit A/D conversion and 19-bit inner. It has four P2 card slots and one SD memory card slot. The AG-HPX500 features variable frame rates for under-cranking and over-cranking to create fast- or slow-motion effects. In 720p, users can set frame rates in 24p, 30p or 25p in any of 11 steps between 12fps and 60fps (or 50p). In addition, with the camera's advanced 1080/480 24pA mode, users have the option of using 2:3:3:2 pull down, which allows most non-linear editing systems to extract 24 frames. Key interfaces include IEEE1394, USB2.0, HDSDI/SDI, analog component & 4 audio XLR inputs.

PANASONIC AG-AF100 LARGE 4/3" SENSOR AVCCAM MEMORY CARD CAMCORDER

The first 4/3" large image camcorder optimized for hi-def video, the AGAF100 features a micro 4/3" mount for changing lenses, as well as a smaller, hand-held-style form factor. This camcorder offers users a wider field of view and a shallow depth of field similar to those found in a 35mm movie camera. The micro 4/3" mount allows you to use a variety of still camera lenses as well as zoom lenses, prime lenses, and film camera lenses with fixed focal lengths. Records up to 1080/60i and 720/60p. Also features uncompressed 4:2:2 8-bit HD-SDI and HDMI output. 2 card slots offer relay recording onto SDHC cards. SDXC card compatible.

PANASONIC P2 SOLID STATE MEMORY CARDS

These P2 cards are a PCMCIA compatible plug-in card based on ultra-reliable, solid-state memory, integrating 4 high-performance SD cards like those now used in digital still cameras. The cards can store all P2 frame rates and formats, including HD, SD, DVCPRO HD/50/25 and AVC-Intra 100/50. They are packaged in a rugged die-cast frame that weighs only 45 grams. The P2 card is reusable and connects instantly with laptops and major non-linear editing systems to eliminate the time-consuming task of digitizing. It is resistant to impact, vibration, shock, dust & environmental extremes including temperature changes.

ITEM	DESCRIPTION	PRICE

SONY®

SONY HVR-HD1000U HDV SHOULDER-MOUNT CAMCORDER

Features high-definition HDV 1080i recording, and a built-in down-converter for creating DV material (via iLink output). It has a 1/2.9" Clear Vide CMOS image sensor™, optical 10x zoom Carl Zeiss Vario-Sonnar T lens, 2.7" widescreen LCD panel (211k pixels), ergonomic handle with record button and zoom control for low position shooting, & a Super Nightshot™ function that allows shooting in zero lux situations, or for use as a nighttime monitoring device. Although it doesn't contain all the features of higher end camcorders such as DVCAM recording/playback, or XLR audio connections it does have a wide range of photo-creation functions such as a photo mode for taking 6.1-Megapixel, 2848x2136 quality 4:3 images, dual record function for shooting HDV video & 4.6-Megapixel (16:9) photos at the same time, and the ability to save a still frame of video during playback (1.2-Megapixel still image). Video is recorded on Digital Master™ pro tape, or consumer MiniDV tape. I/O includes component out (3x RCA), composite out (1x RCA), S-video out, HDMI out, IEEE1394 4-pin I/O, audio output (2x RCA), LANC, USB type B terminal, and audio input on 3.5mm jack. An ECM-PS1 external shotgun mic is supplied.

Follow us!

Commercial Lease-To-Own financing for businesses available! Contact your Sales Pro for details.

The NXCAM® family is expanding, and so are their capabilities.

Sony's new professional camcorders raise the bar for performance standards.

Two additions to the NXCAM family of professional video products deliver unprecedented capabilities. These new camcorders join Sony's existing NXCAM model HXR-NX5U to deliver an impressive range of options, creativity, and flexibility for production professionals. Each is high in performance covering a range of applications, including commercial video and music video, and affordable production.

The NEX-FS100U Super 35mm camcorder is equipped with an Exmor™ Super 35 CMOS sensor. This large-format sensor's high sensitivity enables it to produce footage with shallow depth of field, similar to that of a film camera. The sensor is the same as the one used on our PMW-F3 camera. Combined with the Sony E-mount interchangeable lens system, this camcorder allows various Sony A-mount lenses to be used via an optional mount adaptor (LA-EA1).

Two models available:

- NEX-FS100U, without lens, \$5,850 (suggested list price)
- NEX-FS100UK, with lens, \$6,550 (suggested list price)

The HXR-NX70U Compact Professional AVCHD™ Camcorder is a tough little workhorse. Its main unit has been proven to reach dust-proof and rain-proof requirements specified by IEC60529 IP54. So sudden rain or dust on outdoor shoots won't affect the camcorder's operation, allowing it to perform in even the most challenging shooting environments. This ultra-compact HD camcorder also incorporates an Exmor R CMOS sensor for superior quality, low-light footage and enhanced manual controls, for the precision that pro shooters depend on when capturing high-quality HD content. The NXCAM HXR-NX70U is a versatile, all-weather camera that captures the action any time, under any conditions. Available for \$3,200 (suggested list price).

The entire NXCAM family is available now, so there's a solution for everyone. For more information on these new members of the NXCAM family, please contact your Full Compass Sales Pro.

SONY®

SONY PMW-EX1R & PMW-EX3 XDCAM-EX™ HD SOLID STATE CAMCORDERS

Compact camcorders with non-linear capabilities such as instant random access and file-based operation. The camcorders record up to 100min of HD footage at 35Mbps, or 140min at 25Mbps using 2 16GB SxS cards. Three 1/2" Exmor™ CMOS sensors with a pixel count of 1920x1080 each. Switch between 1080i & 720p with selectable frame rates. Slow & Quick Motion function allows variable frame rate recording. The MPEG-2 CODEC achieves a balance of quality and the required bit rate. Other features for both cameras include 14x Fujinon zoom lens with auto focus & image stabilization, AF & MF assist functions, built-in stereo mic, 3.5" LCD panel, SDI output, IEEE1394 out, mini-USB 2.0 terminal, component out, and 2 audio XLR inputs with 48V phantom power. The PMW-EX1R also features DVCAM recording and HDMI output. The PMW-EX3 is a semi-shoulder mounted camera that adds an interchangeable lens system with timecode input/output and genlock for multi-camera operation. It also has 8-pin remote access for studio operation. Both include a lens hood, IR remote controller, USB cable, shoulder strap, BPU30 battery and BCU1 charger. The PMW-EX3 also comes with a LO-3830 1/2" lens adapter.

XDCAM-EX

SONY PMW-350 & PMW-320 XDCAM-EX™ HD SOLID STATE CAMCORDERS

Shoulder-mount camcorders with SxS Pro™ flash memory card recording capabilities. The PMW-350 offers three 2/3" Exmor™ CMOS sensors, while the PMW-320 has three 1/2" sensors. Both have 1920x1080 HD resolution in a 7lb package (body only). Using 2 SxS memory card slots, record up to 200min of

HD footage at 35Mbps on 32GB cards (280min for PMW-320). The MPEG-2 CODEC gives a balance of quality and the required bit rate. Switch between 1080i & 720p with multiple frame recording options. Slow & Quick Motion function allows variable frame rate recording. Audio can be recorded to 4 channels at 48kHz. Camcorders are studio-configurable, with timecode in/out, genlock in, HD/SD SDI and HDMI out.

SONY PDW-500 SERIES XDCAM CAMCORDERS

These professional XDCAM disc-recording camcorders are designed for the rigors of broadcast ENG/EFP shooting while providing a powerful set of features to fully utilize the capabilities of the XDCAM non-linear disc medium. The cameras use the same 16:9/4:3 switchable Power HAD EX CCD blocks used in the MSW-900 IMX camcorder, so image quality is superb. The PDW530 features MPEG IMX/DVCAM switchable recording and 2 built-in optical filter wheels (ND and CC). XDCAM optical disc recording time runs 85 min per disc using DVCAM 25Mbps, 68 min at MPEG 30 Mbps, 55 min at MPEG 40 Mbps, and 45 min recording at MPEG 50 Mbps rate. The PDW510 model differs only in that it records in DVCAM compression only, and has a single filter wheel. Both models create and record real-time proxy video & audio as well as various type of metadata, which can be streamed to laptop PCs for logging or NLE work using i-LINK and an optional CBK-NC01 Ethernet card. The optional CBK-FC01, 24P shooting card provides "film-like" look capture capability with 24-frame capture in CCD.

SONY SXS MEDIA

SxS memory cards for Sony XDCAM EX camcorders. The standard SxS cards feature a transfer

rate of up to 800 Mbps. The SxS-1 cards have a speed of 1.2 Gbps. No card reader is needed for the WI-SE cards, as the user can offload data directly with the USB 2.0 port. Hoodman kits include an SDHC card and an SxS memory adapter.
