RENKUS-HEINZ CFX SERIES Ideal for portable or permanent install applications. All models (except CFX61/CFX121M) feature tripod sockets for pole-mounting and 6 UMH attachment points to fly the cabinets using eyebolts. Speakers feature unique Complex Conic horns, designed on the spherical expansion of the acoustic pressure wave. Passive models are shown below, but may be upgraded to active models with the purchase of an optional Class 'D' amp, easily installed in the field. Or upgrade with RHAON-empowered amps, PFI-200R or PFI-500R. The resulting RHAON (Renkus-Heinz Audio Operations Network) empowered versions allow you to use Cobranet-based digital audio distribution and have control over your system via free control software on any Windows-based computer, using standard ethernet hardware and cabling. (To order either version of the amp modules factory-installed, call for part number and price.) All CFX passive models are provided with both looping 4-pin Neutrik Speakon type connectors and screw-type terminal strips. Models available in black or white. Call for various mounting options.
