Performance that None will Forget Delivered by Clear-Com Intercoms

Clear-Com proves to be a tough act to follow, production after production. Expanded coverage for virtually any place requiring communications. Durable systems that can take harsh usage for decades to come. And intuitive designs that make your job so much easier. This is what you will get with Clear-Com's new RS-700 Series analog partyline belt packs and the Tempest[®] wireless intercom systems.

RS-700 Series Belt packs

RS-700 Series analog partyline belt packs have an ergonomic and durable design meant for everyday use. Their tough exteriors come with recessed tactile controls and bright LED indicators. High headroom with low-noise audio enables them to deliver the crystal-clear "Clear-Com Sound". RS-700 Series belt packs are equipped with an XLR-connector that makes them compatible with all Clear-Com partyline systems.

NEW!

Tempest

The 2.4 GHz Tempest[®]2400 and 900 MHz Tempest[®]900 wireless intercoms offer the most capabilities. They are easy to operate, quick to configure, and Wi-Fi friendly. The Tempest systems easily plug-and-play with other 2- or 4-wire intercoms to extend system access. Multiple Tempest2400 systems can be linked together and its Seamless Roaming feature allows users to continuously roam across an expanded coverage area. The Tempest900 is also designed to operate flawlessly in large, enclosed production environments with dense walls.

JK AUDIO BLUETOOTH INTERFACE DEVICES

The BluSet™ line consists of 4 intercom headset adapters that use Bluetooth technology and plug directly into most partyline beltpacks, replacing the wired headset with a Bluetooth device. A 1/8" stereo headset jack contains a microphone level output signal for recording, with the beltpack headphone signal on the left channel and the Bluetooth return signal on the right. The BlueSet™ has a mini USB power-jack and can be powered by a Li-Ion battery (10hrs of use). The Interloop™ beltpack works with industry standard 2-wire, party-line intercoms, connecting to the existing system like any other beltpack via a wireless Bluetooth connection.

QUAM VANDAL-RESISTANT COMPONENTS FOR CORRECTIONAL INSTITUTIONS

The Quam CIS Series is a vandal-resistant call-in station with an integral speaker/microphone and momentary, normally open, push-to-call button. The Quam CIS6 and CIS8 are "listen-only" stations with integral loudspeakers and 12 gauge, brushed stainless steel faceplates with tamper-resistant #6-32 "pin-in-torx" hardware. All CIS models have an 8- or 45-ohm voice coil, or a 25V multi-tap transformer. All CIS models except CIS12/25 are weather-resistant. The DTS series is a desktop intercom station with a vandal-resistant microphone and 3" loudspeaker assembly with push-to-talk (PTT) mushroom button switch. RSPI is a IRU relay-operated selection panel for 32 circuits - used between control equipment and individual simplex call-in stations and is intended to be racked in a secure location.

TELEX® Audiocom

TELEX AUDIOCOM MASTER STATIONS These master stations provide user station flexibility with intercom system phantom power in a 1RU box. Operators can utilize headset or speaker/mic operation and have full access to all intercom channels both individually and as "all-talk". Users can also utilize features like the Remote Mic Kill function to silence any open mic on the intercom channel so that extraneous noise can be eliminated. It can operate in an unbalanced mode to be completely Clear-Com® compatible. Other features include voice-activated microphone, 1 XLR3 M/F per channel for inputs, RCA speaker output jacks, incoming call indications, XLR-4M headset connector, and it accepts MCP90 series microphones on front panel mic input.

TELEX AUDIOCOM HEADSET STATIONS

These wall-mount intercom stations are designed for stationary installation in standard 2-gang electrical outlet boxes. They connect to the intercom system using commonly available 22-gauge cable. The user need only connect a headset or telephone style handset to begin communicating. Belpack stations are ideal for users who will be stationed in a general work area, but who need some mobility and wish to keep their hands free.

Most belpacks feature 4-pin XLR-M headset connector, 3-pin XLR line connector, and can be connected in a daisy chain configuration directly back to the intercom system power supply or master station using low-impedance cables.

TELEX AUDIOCOM POWER SUPPLIES The power supply, whether it be a discrete component or integrated into a master station, provides system power for down-line components such as belpacks and speaker stations. All Audiocom® power supplies can operate in unbalanced mode to be Clear-Com® compatible. The SPS2001 has all of the features of the PS2001L, but adds the power of a built-in speaker and level control for monitoring intercom lines. The SPS2001 may be used as a stand-alone power supply and monitor box, or in combination with a US2002 to create a 2-channel headset or speaker/mic Master Station (optional MCP90-3/8/12/18 panel mount microphone required).

TELEX AUDIOCOM USER STATIONS Audiocom® user stations are versatile, durable, and incredibly flexible. Using a unique modular design concept, US-2002 user stations can be configured in numerous ways to suit virtually any application. User stations can be combined with power supplies of differing types to form a host of master station configurations, or can be used without a power supply so that users can access multiple intercom channels with all of the features of a master station. Up to 4 ES-4000A expansion stations may be connected to the US-2002 (via 1/8" rear data connector) to add up to 16 channels (18 channels total). The ES-4000A typically utilizes the US-2002 microphone and speaker (or microphone headset) for communication with the added channels. The ES-4000A also has individual speaker outputs for independent monitoring of 1 or more of the 4 channels if desired. The user stations can operate in unbalanced mode to be Clear-Com® compatible.

EARTEC®

EARTEC COMSTAR FULL DUPLEX WIRELESS HEADSET SYSTEM

This system is designed specifically for teams that need to communicate while working with their hands. The self-contained headsets (no beltpacks) are not voice-activated and there is no delay when transmitting. Up to 8 users can speak simultaneously and communicate as they would on a traditional wired intercom system. Two groups of 4 users can communicate separately or all together in conference mode. It features an operating range of up to 800 yards. The system is self-tuning, without the need for a remote antenna. AC adapter, rechargeable battery (6 hour life) and AA disposable battery sled are included. It operates in the 1900MHz band which is reserved by the FCC for "PCS" voice communication only.

EARTEC SIMULTALK 24G WIRELESS FULL DUPLEX TRANSCEIVER

For hands-free, short-range communications Simultalk 24G radios are a breakthrough. They operate in the 2.4GHz "non-licensed" frequency band and can be used anywhere in the world. They're field programmable and feature dip switch selectable frequency combinations. Everyone can receive the master unit, but only 1 receiver at a time can talk with the master unit. A full line of headset options allows each user to customize the transceivers for their own unique environment. The SLT-INT interface allows the Simultalk 24G system to be connected to a wired audio system.

EARTEC SC-1000 WIRELESS TRANSCEIVER This wireless transceiver operates in "Simplex" mode. When one person in a group transmits, the message is received by everyone. An unlimited number of transceivers can operate on the same frequency, and the system can also be used as a dual channel intercom with switching. SC-1000 transceivers feature a full watt of transmit power and a range of up to one mile. They use UHF high band frequencies that can penetrate concrete or steel. Other features include 16 UHF channel combinations, 38 privacy codes to block interference, a rugged polycarbonate body, military belt clip, and rechargeable NiCad battery.
