SONY

SONY DIGITAL SIGNAGE BUNDLES

These easy-to-use digital signage packages allow you to use effective and simple signage easily. Each bundle includes a high-performance FWD display plus a Hyper Media Player (HMP) containing user-friendly templates, management software, and the required connecting cable. Screens can have multiple zones, each containing a variety of content, such as a clock, real-time weather, traffic, or other news feed via RSS, pictures and/or video from files or streaming video content, freeform text, or bulleted lists. With the browser-based interface, signs can be updated from a wireless tablet or smartphone or from a remote location. This eco-friendly signage solution uses LED backlighting and the player uses only 3-6W of power. S-Series allows for HDS/SDI input via HDS/SDI adapter.

SPINETIX

SPINETIX HMP130/200 DIGITAL SIGNAGE MEDIA PLAYERS

A unique alternative to proprietary, PC-based solutions for digital signage. The HMP130 and HMP200 offer simple ways to schedule, update, stream and display content. Their fanless design and no moving parts make these boxes durable and their small design means they can be hidden nearly anywhere. Both players feature internal flash memory, flash drive and HDD support via USB, HDMI and VGA outs, 1/8" TRS audio out, real time event communication, horizontal and vertical display capability, animation capabilities, and support for touchscreen, keyboard, joystick, gamepad or mouse interaction. The HMP200 adds full HD 1080p video, and has 8GB of internal memory. Spinetix Fusion software is included. The Elementi-X software allows control of unlimited HMP devices, while Elementi-S can control a max of 10.

ITEM	DESCRIPTION	PRICE
HMP-130	Hyper Media Player with Fusion software, 4GB, 720p	1332.50

EALTINEX®

ATLAS SOUND POLE MOUNT 70W AMPLIFIER

SYSTEMS These innovative amplifiers are perfectly suited for projection systems. They install right onto a pole mount via a sealed hole incorporated into the chassis design. Simply install the projector mounting pole, align the amplifier's chassis socket with the 1.5" mounting tube, and clamp the unit at the desired height above the projector mount with the included pole clamp system. Other benefits include an accessory outlet with AC current sense that allows the amplifier to respond instantly from stand-by mode when the projector is powered, as well as separate audio sense turn-on. Systems have balanced Phoenix style and unbalanced RCA inputs, front panel LEDs, and recessed screwdriver adjustable tone and level controls. All models also mount in IRU configurations.

ITEM	DESCRIPTION	PRICE
