

**ALTO PROFESSIONAL TRUESONIC SERIES PA SPEAKERS**

These lightweight speakers combine a modern Class 'D' power amplifier with super-efficient drivers to create accurate, transparent sound. All models feature lightweight polypropylene trapezoidal enclosures (suitable for either vertical or floor use), 1" tweeter, integrated 36mm pole socket, M10 fly points (10" models have 4, 12" models have 5, 15" models have 6), carrying handles, 2 parallel Speakon NL-4 connections for input and pass-through, over-excursion/thermal/driver protection, clip/limit indicator LED and offer 80°/100° horizontal and 60° vertical coverage. Wireless models have onboard Bluetooth® A2DP wireless technology, allowing you to stream audio wirelessly from any Bluetooth-compatible device and even stream your stereo signal to discrete left and right speakers. Active models include 2 mic/line combo inputs with independent volume controls, contour switch for increased EQ control, and ground lift. The TS115-VIBE provides an easy solution for playing backing tracks or intermission music, with its ability to stream MP3, WMA, or AAC music files directly from a USB flash drive or microSD card and includes ID3 tag support as well as rear panel navigation, transport, and search controls.

**EV TOUR X SERIES SPEAKER SYSTEMS**

These high-performance speakers feature EV's SMX woofers, for extraordinarily low levels of distortion without sacrificing sensitivity. The backbone grille design is aesthetic and damage-resistant, and the input panels and handle are ergonomically designed for maximum comfort. Steep slope analog crossovers with elliptical filters provide up to 36dB per octave slopes, reducing acoustic transducer interaction for better sound and higher power handling. Floor monitors feature a patent-pending SST (Signal Synchronized Transducers) design which utilizes a split baffle layout, allowing the enclosure to be more compact and yield near-perfect driver phase summation. All models feature parallel Neutrik®NL4 inputs.

**EV ZLX SERIES SPEAKERS**

Available in passive or active versions these speakers cut through the competition with the most complete and innovative package of features in their class. Features include LCD display and unique single-knob DSP control with presets, input level meters and independent amplifier control, EV-engineered components matched with a custom-built Class 'D' amp. Both passive and powered speakers are made of durable composite construction with unique hi/lo grip design for effortless pole mounting and portability and a patented split-baffle design for superior driver time alignment and enhanced sonic impact and intelligibility.

**EV ETX SERIES PORTABLE PA SPEAKERS**

These versatile speakers use advanced technology to create clear, powerful, accurate sound. 2000W (1800W for subs) Class 'D' power amps with onboard DSP are matched with low-distortion transducers and EV's patented SST waveguide (custom-designed for each model) for consistent coverage with any configuration. Two-way models offer a smooth-sounding 1.25" titanium compression driver for high frequencies and 90°x60° coverage pattern (60°x40° for ETX-35P). FIR-Drive uses Finite Impulse Response technology to optimize transducer linearity while limiter algorithms prevent signal and/or thermal overload. The onboard LCD screen provides an easy-to-read display for adjustment of DSP parameters: EQ presets, limiter status, input meters and level controls and master volume control. Subwoofer models include a preset for true cardioid performance. Other features include 13-ply birch cabinet construction, (2) XLR/TRS combo jacks and XLR link output (2 link outputs on sub models), attractive and durable EVCoat finish, 8 fly points on two-way models, and custom die-cast polemount cups, handles and hardware.

**EV ZX4 15" 2-WAY PA SPEAKER** ZX4 is designed with main mix and monitor duties in mind. It features an integrated pole mount, and for varying stage depths is capable of 45° or 55° angles via integrated retractable monitor feet. The DH3 compression driver with its pure titanium diaphragm, coupled with the Zx4's large 90° x 50° horn allows for tremendous intelligibility and pattern control. The EVS15-SF 15" LF delivers tight, low bass and 400W continuous power handling (1600W peak), sensitivity is 100dB and max SPL is 132dB.

ZX4	15" 2-way speaker, 400W, 44.5 lbs.	699.00

**EV ZX5 AND ZXA5** The Zx5 is a 15", 2-way cabinet with a lightweight, high-impact composite enclosure, featuring a 500W, forced-air cooled woofer with 3" voice coil, and a 2" neodymium compression driver. It's rated for 600W long-term power handling (2400W peak) and can produce 132dB SPL with very smooth 58Hz-15kHz frequency response. With two available coverage patterns (60°x60° or 90°x50°) and 2 adjustable monitor angles (45° or 55°). Ten built-in rigging and suspension points allow for a variety of mounting accessories. The ZXA5 active speaker effortlessly delivers a continuous 250W into the HF and 1000W into the LF for an unprecedented power-to-weight ratio, and performance that is unmatched by powered systems costing twice as much. ZX5 portable versions are available in white as well – substitute "W" for "B" in part number.

# Electro-Voice ETX Powered Loudspeakers

The new ETX Powered Loudspeaker family builds upon the industry-leading innovation and 85-year heritage of Electro-Voice audio engineering to offer the most advanced professional-grade products for an array of applications.

- State-of-the-art components deliver the legendary EV sound quality and reliability the pros trust: 1800 W (sub) & 2000 W (full-range) Class-B power amplifiers with integrated DSP produce high SPLs utilizing high-sensitivity, low-distortion transducers (including DVX & SMX series woofers and precision DH3-B HF titanium compression drivers).
- Lightweight, ergonomic, durable and compact 18-mm, 13-ply birch plywood enclosures finished with EVCoat. Eight mounting points for permanent installations (full-range models). Custom die-cast aluminum pole cups, handles and hardware.

Performance beyond the reach of the competition.

## BRAIN POWER

Intelligent technology, innovative design.

- EV's FIR-Drive utilizes the latest Finite Impulse Response (FIR) filter technology to optimize transducer linearity. Advanced limiter algorithms for independent peak and thermal transducer protection.
- Complete full-function DSP control via a single-knob interface. LCD screen for easy system set-up and monitoring: location/application EQ presets (e.g. tripod, mounted, suspended, live, music, speech), limiter status, input level controls/meters and master volume control to ensure optimal gain structure. Parametric EQ allows for more precise configuration. Subs feature a preset for true cardioid performance.
- EV-patented Signal Synchronized Transducers (SST) waveguide design provides precise and consistent coverage across all system configurations. Waveguides are custom-designed and optimized per model.
