JVC

JVC BROADCAST LCD MONITORS

Full 1080p image displays that offer a wide color range and wider viewing angle. Includes digital closed captioning, superior scaling, de-interlacing and 10-bit 4:4:4 1080p processing. Models also have 12-channel audio level meter with peak hold. Inputs include DVI-D, component and composite video as well as RCA audio-in. DT-E models feature a TN Panel with LED backlighting that provides improved contrast and black level, as well as 20-30% less power consumption. DT-V models have a superior IPS display, built-in waveform/vector-scope and a 3G/dual-link HD-SDI input that enables monitoring of 1080/60p signals. The DT-3D24GIU uses passive 3D technology to display flicker-free images and is compatible with side-by-side and line-by-line 3D formats.

V-R231-IMD-HDS/SDI

V-R653-IMD-TE

MARSHALL ELECTRONICS IN-MONITOR DISPLAY-CAPABLE LCD MONITORS

Allows UMD (Under-Monitor Display) information and tallies to be displayed directly within the monitor. Available features include on-screen video time code, 3-color "Soft" Tallies, audio presence indicator and easy menu navigation. Integrates easily with existing Tally systems and controllers, while supporting Image Video, NVISION, TSL, and MEI protocols. All except the Quad Viewer monitors include HDS/SDI/SDI inputs and can be used as standalone displays with HDS/SDI loop-through. Quad Viewer models offer full-screen mode for video and DVI and quad-split mode (via built-in HD quad splitter) which is scaled to fit onscreen in the highest resolution. The Quad Viewer models have (4) independent HDS/SDI inputs, (1) DVI input, field-upgradeable firmware, and an RS422/485 port with pass-through. Dual Link/Waveform models feature 10-bit video path with 3G capable monitors and can display live video, audio bars, waveform and vectorscope in quad-view mode. They also have (2) 3G/HD/SDI inputs, Dual Link, a DVI input, RS485 firmware updating, and closed captioning (CEA-608-B, CEA-708-B). The NCB-1005 allows connected IMD monitors to be controlled by PC via Ethernet.

SONY

SONY 4K ULTRA HIGH DEFINITION (UHD) MONITORS

These UHD monitors offer sharper images in stunning detail with four times the clarity of HD. Existing HD content will look better when upscaled via the 4K X-Reality™ PRO picture engine, and Sony's exclusive TRILUMINOS display technology produces the truest, most natural colors yet. Optimized to support current and even future UHD codecs from various providers. The "One-Flick" remote control allows easy navigation of your favorite content—TV, networked photos, online videos, etc.—from an instantly-available shortcut menu. Other features include Wi-Fi support, Social viewing capability for simultaneous TV/tweet/Skype™ viewing, and much more.

SONY PVM SERIES OLED PROFESSIONAL VIDEO MONITOR

The PVM series uses an OLED (Organic Light Emitting Diode) panel, which creates true blacks and higher contrast than LCDs. Picture quality is excellent both indoors and outdoors, plus the new panels allow for off-axis viewing without color shift. Supports broadcast standards SMPTE-C, EBU and ITU-R BT.709, with resolutions from NTSC/PAL to 1080p60. The PVM Series monitors come standard with two 3G/HD/SD-SDI inputs, an HDMI input, composite input, internal waveform monitor and AC power adapter. The PVM-741 includes 1/4" and 3/8" holes for camera mounting.

ITEM	DESCRIPTION	PRICE
PVM741/A	7.4" 960x540 OLED professional field monitor	2058.00
