PANASONIC SUPER NARROW BEZEL LED DISPLAY

This LfV series display allows for creation of indoor video wall sizes to match location. The ultra-narrow bezel creates a joint that's only 0.14" wide for clearer imaging. The IPS panel's wide viewing angle ensures visual clarity from numerous viewpoints. Calibration functions, optional installation frame mount, and built-in cooling fan provide easy video wall configuration and maintenance. DIGITAL LINK output combines video, audio, and control signals that can be transmitted by single cable for daisy chain applications. It's built for 24-hour operation, portrait installation, and equipped with Failover and Failback functions for use in mission critical rooms and surveillance centers.

SONY

SONY DIGITAL SIGNAGE BUNDLES

These easy-to-use digital signage packages allow you to use effective and simple signage easily. Each bundle includes a high-performance FWD display plus a Hyper Media Player (HMP) containing user-friendly templates, management software, and the required connecting cable. Screens can have multiple zones, each containing a variety of content, such as a clock, real-time weather, traffic, or other news feed via RSS, pictures and/or video from files or streaming video content, freeform text, or bulleted lists. With the browser-based interface, signs can be updated from a wireless tablet or smartphone or from a remote location. This eco-friendly signage solution uses LED backlighting and the player uses only 3-6Wof power. S-Series allows for HDS/SDI input via HDS/SDI adapter.

SPINETIX

SPINETIX HMP130/200 DIGITAL SIGNAGE MEDIA PLAYERS

A unique alternative to proprietary, PC-based solutions for digital signage. The HMP130 and HMP200 offer simple ways to schedule, update, stream and display content. Their fanless design and no moving parts make these boxes durable and their small design means they can be hidden nearly anywhere. Both players feature internal flash memory, flash drive and HDD support via USB, HDMI and VGA outs, 1/8" TRS audio out, real time event communication, horizontal and vertical display capability, animation capabilities, and support for touchscreen, keyboard, joystick, gamepad or mouse interaction. The HMP200 adds full HD 1080p video, and has 8GB of internal memory. SpinetiX Fusion software is included. The Elementi-X software allows control of unlimited HMP devices, while Elementi-S can control a max of 10.

ITEM	DESCRIPTION	PRICE
HMP-130	Hyper Media Player with Fusion software, 4GB, 720p	1332.50
HMP-200	Hyper Media Player with Fusion software, 8GB, 1080p	1883.70
ELEMENTI-S	Standard Digital Signage Software, Windows 7	418.60
ELEMENTI-X	Expert Digital Signage Software, Windows 7	1688.70

TECH GLOBAL

TECH GLOBAL MULTI-TOUCH CIT-IR TOUCH SCREENS

These NEC Multi-Touch LED Touch Screens use Cell Imaging Technology Infrared (CIT-IR) in an under-bezel touch integration system. Ultra-smooth glass produces input flexibility for a finger, gloved hand or 6mm stylus via 2 touch points. Touch operation is unaffected by surface contaminants, options for additional touch points are available. Has wireless display and wireless touch capability along with an OPS expansion slot. Useful for interactive digital signage, education, board rooms, interactive white boards, hospitality and kiosk information systems.

BrightSign®

NEW!

BRIGHTSIGN XD SERIES DIGITAL SIGNAGE MEDIA PLAYERS

The advanced video engine in these solid-state digital signage players offers superior scaling technology delivering 1080p/60fps video, 3D content support, and even 1080p-to-4K upscaling. They can decode (2) 1080p/60fps videos or several lower-resolution videos simultaneously, and support HTML5 so content creators can use familiar tools like touch-screen and swipe capabilities that bring familiar, intuitive interactivity to your digital signage for engaging content, plus UDP control for mobile interaction with signage. The XD230 is an affordable solid-state digital signage player with PC-class performance. The XD1030 offers all the capabilities of the XD230 and adds pure digital S/PDIF audio, while GPIO, serial and USB ports let you build displays with virtually any type of interactivity you can think of. Multiple video inputs to play live HDTV alongside your messaging headlines the XD1230. The ATSC/Clear QAM tuner lets you play cable TV or closed-circuit broadcasts, and the HDMI input plays any broadcast content—even protected HDCP content. Bundles are also available teaming each player unit with a Full HD commercial grade display (42" or 47") that can be mounted in landscape or portrait mode.

BS147-1030	47" Display Bundle with attached XD1030 player	1998.75

BRIGHTSIGN HD SERIES DIGITAL SIGNAGE MEDIA PLAYERS

NEW!

These HD units have a powerful media handling platform, smaller form factor and lower cost to operate, making them ideal for your digital signage install. Ease of use and integration allow for simple plug and play content or robust interactive capabilities. BrightAuthor software is included for easy creation of signage and kiosk presentations. The HD120 is a basic model for simple looping video playback or basic interactive presentations with full HD and solid-state reliability. The HD220 offers networked looping, allowing content updates and live data feeds along with video playback. The top-of-the-line HD1020 is a networked interactive version that engages your audience with a host of options, making it useful for stand-alone looping displays, interactive kiosks, synchronized video walls and networked content delivery, plus its networking capability lets you easily keep content fresh and relevant without ever leaving the office. Bundles are available teaming each player unit with a Full HD commercial grade display (42" or 47") that can be mounted in landscape or portrait mode.
