MARSHALL ELECTRONICS PTZ CONTROLLER

This programmable PTZ keyboard controller supports multiple protocols in each channel and easily uploads programming data via serial communication with its RS485/RS422 interface. Control up to 255 cameras with the 3-axis (variable speed/zoom) proportional joystick, numeric keypad and camera function keys, and/or computer mouse connected via USB. It has a built-in LCD with 2 lines of characters for easy operation and even supports individual user passwords. Furthermore, it allows for programmable transmission speeds for each ID. Operates with a single 9V battery.
