BEYERDYNAMIC CLASSIS BOUNDARY INSTALLATION MICROPHONES

These condenser boundary microphones are designed for flush mounting into tabletops or ceilings, and applications such as teleconferencing, videoconferencing, recording or amplification of round table discussions - wherever the microphone needs to be as unobtrusive as possible. The high sensitivity guarantees a constant output level even from long distance sources. Elastic bearing rings achieve mechanical isolation and offer effective sound isolation. All have a 3-pin XLR connector. The Classis BM 32 and 34 have a half-cardioid polar pattern, which increases the gain-before-feedback and decreases the amount of diffuse ambience. The BM 34 adds a bass roll-off filter. The Classis BM 33 has a half-spherical polar pattern making it ideal for large rooms.
