BB424X

YAMAHA BB SERIES BASS GUITARS While the body is inherited from Yamaha's original BB, the neck is positioned 5mm deeper into the BB body creating a more rigid design that improves sound and attack. The ceramic magnet pickups deliver powerful bass tone that is clear and distinct. The Diagonal Body Thru Stringing has strings angled 45 degrees at the saddle to reduce stress, secure tension, and provide better transmission of vibration. The 5-piece necks consist of Maple and Nato; providing durability and preventing warping. The BB1024X has a 3-piece body structure with the bridge placed on the centerpiece to translate the maximum amount of string vibration to the body. With a Maple "Spline" inserted, the vibration of a 1-piece body is achieved in a 3-piece structure.
