## Panasonic

### PANASONIC AG-HPX500 2/3" SHOULDER-MOUNT P2 HD CAMCORDER

This P2 HD camcorder teams the full production-quality of 2/3" 3-CCDs, DVCPRO HD, 4:2:2 sampling & independent frame encoding with the versatility of interchangeable lenses and the creativity of variable frame rates. The AG-HPX500 records in 32 high-definition & standard-definition formats, including 1080i and 720p in production proven, 100 Mbps DVCPRO HD. It records on removable P2 solid-state memory cards in 1080/60i, 50i, 30p, 25p and 24p; in 720/60p, 50p, 30p, 25p, and 24p; and in DVCPRO50, DVCPRO and DV. The camcorder features a high performance digital signal processor (DSP) with 14bit A/D conversion and 19-bit inner processing that handles HD/SD format conversion simultaneously. It has 4 P2 card slots and when all the slots are used, can record up to 64min in DVCPRO HD, 128min in DVCPRO 50 and 256min in DVCPRO. It also features an SD memory card slot for saving or loading scene files and user settings. The AG-HPX500 features variable frame rates for under-cranking and over-cranking to create fast- or slow-motion effects. In 720p, users can set frame rates in 24p, 30p or 25p in any of 11 steps between 12fps and 60fps (or 50p). In addition, with the camera's advanced 1080/480 24pA mode, users have the option of using 2.3:3:2 pull down, which allows most nonlinear editing systems to extract 24 frames on ingest. Key interfaces include IEEE1394, USB2.0, HDS/SDI/SDI, analog component & 4 audio XLR inputs.

### PANASONIC AG-AF100 LARGE 4/3" SENSOR AVCCAM MEMORY CARD CAMCORDER

The first 4/3" large image camcorder optimized for hi-def video, the AGAF100 features a micro 4/3" mount for changing lenses, as well as a smaller, handheld-style form factor. This camcorder offers users a wider field of view and a shallow depth of field similar to those found in a 35mm movie camera. The micro 4/3" mount allows you to use a variety of still camera lenses as well as zoom lenses, prime lenses, and film camera lenses with fixed focal lengths. Records up to 1080/60i and 720/60p. Also features uncompressed 4:2:2 8-bit HD-SDI and HDMI output. 2 card slots offer relay recording onto SDHC cards. SDXC card compatible.

### PANASONIC P2 SOLID STATE MEMORY CARDS

These P2 cards are a PCMCIA compatible plug-in card based on ultra-reliable, solid-state memory, integrating 4 high-performance SD cards like those now used in digital still cameras. The cards can store all P2 frame rates and formats, including HD, SD, DVCPRO HD/50/25 and AVC-Intra 100/50. They are packaged in a rugged die-cast frame that weighs only 45 grams. The P2 card is reusable and connects instantly with laptops and major non-linear editing systems to eliminate the time-consuming task of digitizing. It is resistant to impact, vibration, shock, dust & environmental extremes including temperature changes.

## SONY

### SONY HVR-HD1000U HDV SHOULDER-MOUNT CAMCORDER

Features high-definition HDV 1080i recording, and a built-in down-converter for creating DV material (via iLink output). It has a 1/2.9" Clear Vide CMOS image sensor™, optical 10x zoom Carl Zeiss Vario-Sonnar T lens, 2.7" widescreen LCD panel (211k pixels), ergonomic handle with record button and zoom control for low position shooting, & a Super Nightshot™ function that allows shooting in zero lux situations, or for use as a nighttime monitoring device. Although it doesn't contain all the features of higher end camcorders such as DVCAM recording/playback, or XLR audio connections it does have a wide range of photo-creation functions such as a photo mode for taking 6.1-Megapixel, 2848x2136 quality 4:3 images, dual record function for shooting HDV video & 4.6-Megapixel (16:9) photos at the same time, and the ability to save a still frame of video during playback (1.2-Megapixel still image). Video is recorded on Digital Master™ pro tape, or consumer MiniDV tape. I/O includes component out (3x RCA), composite out (1x RCA), S-video out, HDMI out, IEEE1394 4-pin I/O, audio output (2x RCA), LANC, USB type B terminal, and audio input on 3.5mm jack. An ECM-PS1 external shotgun mic is supplied.

**SONY PMW-500 XDCAM HD422 CAMCORDER**

Sony's first XDCAM HD422 with solid-state recording. It supports full-HD 422 50-Mbps MXF record and playback using MPEG-2 Long GOP compression. It can also be switched to record in HD 420 35-Mbps. Its 2/3"-type 3Power HAD FX CCD sensors deliver the same picture quality and low-light performance as the PDW-700, however it records onto Solid State SxS media rather than optical Professional Disc. Up to 120 minutes of HD 422 50-Mbps video can be stored on a single 64Gb SxS card. High level of mobility (main body weighs under 8lbs) and low power consumption. Other features include 24-bit 4-channel audio recording, selectable recording modes and video formats, focus magnification, auto focus assist, automatic lens aberration compensation, slow and quick motion functions, interval and frame recording, gain control, proxy data recording, up/down and cross-conversion capability, 8 assignable switches and a 3.5" color LCD monitor. Body only, lenses sold separately.

**SONY**  
make.believe

Screen images simulated.

## Because image is everything.

Sony gives you the stunning design, innovative features, industry-leading technology and high-quality video imagery your productions demand.

### Shoot It – Sony® Handycam® Camcorders

Capture the world the way no other camcorders can: the way you see it – with brilliant HD quality, fast response and advanced features.

- Face Detection Smile Shutter™ technology – shooting smiling faces is a cinch
- Intelligent Auto mode – automatically analyzes your shot and selects the appropriate mode settings, for excellent images every time
- New back-illuminated "Exmor™ R" CMOS sensor – stunning low-light sensitivity with improved image clarity and drastically reduced grain
- Quick Auto Focus – don't miss the moment

### Show It – Sony BRAVIA® HDTVs

Immerse yourself in the ultimate Full HD TV experience. Innovative LCD TV technology delivers unparalleled picture performance.

- Perimeter-placed Edge LED backlighting yields incredibly vibrant colors, deep blacks, bright whites and amazing contrast
- BRAVIA Engine™ 3 – Sony's most advanced digital image processor delivers increased depth, clarity and contrast
- Motionflow™ technology keeps even fast-action movement sharp and blur-free
- New 3D Full HD models now available

**SONY****SONY DIGITAL HD VIDEO CAMERA**

**RECORDER** The HXR-NX5U is the first product in Sony's NXCAM generation. It uses AVCHD format and allows long duration recording with 2 memory slots which record on Sony memory sticks or SDHC cards. It also records in both HD and SD formats. The camera has a focal length of  $f = 4.1$  to 82.0mm (equivalent to  $f = 29.5$  to 590 mm at 16:9 mode) and a 20x optical zoom. It has a built-in 3.2", 16:9 XtraFine LCD monitor and a 0.45", 16:9 viewfinder. Features HDSi and HDMI outputs, 3-pin XLR audio input, and RCA type audio output. Ships with AC adapter/charger, NP-F770 rechargeable battery, AV and USB cables, and microphone.

**SONY PMW-EX1R AND PMW-EX3 XDCAM-EX™ HD**

**SOLID STATE CAMCORDERS** Compact camcorders with SxS Pro™ flash memory card and enables non-linear capabilities such as instant random access and file-based operation. There are 2 SxS memory card slots, and the camcorders easily record up to 100min of HD footage at 35Mbps, or 140min at 25Mbps using 2 16GB SxS cards. Three 1/2" Exmor™ CMOS sensors each have a pixel count of 1920x1080 for full HD resolution. Switch between 1080i & 720p with multiple frame recording such as 50i, 59.94i, 50p, 59.94p, and native 25p, 29.97p and 23.98p. Slow & Quick Motion function allows variable frame rate recording. The MPEG-2 long GOP CODEC achieves a balance of quality and the required bit rate. Other features for both cameras include 14x Fujinon zoom lens with auto focus & image stabilization, AF & MF assist functions, built-in stereo mic, 3.5" LCD panel with horizontal resolution of more than 700 TV lines, depth of field display on LCD, SDI output, IEEE1394 out, mini-USB 2.0 type B terminal, component out, and 2 audio XLR inputs with 48V phantom power. The PMW-EX1R also features DVCAM recording and HDMI output. The PMW-EX3 is a semi-shoulder-mounted camera that adds an interchangeable lens system with timecode input/output and genlock for multi-camera operation. It also has 8-pin remote access for studio operation. Both camcorders ship with a lens hood, IR remote controller, USB cable, shoulder strap, clip browsing software, BPU30 battery and BCU1 charger. The PMW-EX3 also comes with a LO-3830 1/2" lens adapter.

**SONY PMW-350 & PMW-320 XDCAM-EX™ HD**

**SOLID STATE CAMCORDERS** Shoulder-mount camcorders with SxS Pro™ flash memory card recording capabilities. The PMW-350 offers three 2/3" Exmor™ CMOS sensors, while the PMW-320 has three 1/2" sensors. Both have 1920x1080 HD resolution in a 71b package (body only). Using 2 SxS memory card slots, you can record up to 200min of HD footage at 35Mbps on 32GB cards (280min for PMW-320). The MPEG-2 long GOP CODEC achieves a balance of quality and the required bit rate. Switch between 1080i & 720p with multiple frame recording such as 50i, 59.94i, 50p, 59.94p, and native 25p, 29.97p and 23.98p. Slow & Quick Motion function allows variable frame rate recording. Audio can be recorded to 4 channels at 48kHz. Camcorders are studio-configurable, with timecode in/out, genlock in, HD/SD SDI and HDMI out.

**SONY PDW-500 SERIES XDCAM CAMCORDERS**

These professional XDCAM disc-recording camcorders are designed for the rigors of broadcast ENG/EFP shooting while providing a powerful set of features to fully utilize the capabilities of the XDCAM non-linear disc medium. The cameras use the same 16:9/4:3 switchable Power HAD EX CCD blocks used in the MSW-900 IMX camcorder, so image quality is superb. The PDW530 features MPEG IMX/DVCAM switchable recording and 2 built-in optical filter wheels (ND and CC). XDCAM optical disc recording time runs 85 min per disc using DVCAM 25Mbps, 68 min at MPEG 30 Mbps, 55 min at MPEG 40 Mbps, and 45 min recording at MPEG 50 Mbps rate. The PDW510 model differs only in that it records in DVCAM compression only, and has a single filter wheel. Both models create and record real-time proxy video & audio as well as various type of metadata, which can be streamed to laptop PCs for logging or NLE work using i-LINK and an optional CBK-NC01 Ethernet card. The optional CBK-FC01, 24P shooting card provides "film-like" look capture capability with 24-frame capture in CCD.

ITEM	DESCRIPTION	PRICE
PDW510	DVCAM compression only XDCAM camcorder w/ single filter wheel, no lens	CALL
PDW530	DVCAM & MPEG IMX compression XDCAM camcorder w/dual filter wheels, no lens	CALL

PFD23	Rewritable optical disc, 23GB, XDCAM format	21.79

**SONY MEAD-MS01 MEMORY STICK ADAPTER**

This enables the use of consumer Memory Stick media for XDCAM EX products. It has the same shape as SxS memory cards, and it will accept 1 high speed Memory Stick which simply slots inside the adapter, and fits within the SxS media slots. Using 8/16/32-GB media, you can get approximately 35, 70, or 140 minutes of recording (in SP mode). It is not recommended to use the Slow Motion recording function on the camera with this due to speed limitations.

ITEM	DESCRIPTION	PRICE
MEADMS01	Memory stick adapter for XDCAM EX	113.80

**SONY PFD23 - XDCAM PROFESSIONAL DISC MEDIA**

- 23.3GB Storage capacity
- 72Mb/s Data transfer (writing) rate

ITEM	DESCRIPTION	PRICE
PFD23	Rewritable optical disc, 23GB, XDCAM format	21.79

**SONY PDW-F335L AND PDW-F355L XDCAM HD OPTICAL DISC CAMCORDERS**

These XDCAM HD camcorders offer a flexible choice of video frame rates, interlace or progressive modes, either 35 Mbps, 25 Mbps and 18 Mbps recording data rates, and both 1080 HD and SD formats. Both models have a 3.5" widescreen color LCD monitor and 2" wide-screen B/W viewfinder and accept Sony WRR855B or WRR861B slot-mounted wireless receivers. They feature MPEG HD and DVCAM switchable recording with three 1/2-inch HD CCDs, and 4 channels of high-quality uncompressed audio. Down-conversion output of SD is a standard feature in these cameras. Instant random access, replay of clips, 10sec picture cache, interval recording, IT network capability and the proxy data advantage provide for an exceptional workflow. They also feature Slow Shutter, Clear Scan, Interval Recording, Auto Focus Function (with compatible lenses) and iLINK interface for file access mode and DV stream output (including down-conversion from HD material). Both single-layer disc (PFD-23A) and dual-layer disc (PFD-50DLA) recording is supported. The PDW-F355 model adds the capability to do overcranking and undercranking, and provides SDI/HD SDI outputs instead of analog HD/SD outputs. Call for information on lenses and other accessories.
