

Gentner

Assistive Listening Systems

GENTNER ASSISTIVE LISTENING SYSTEMS

Operating in the 72-76MHz FM band, Gentner Assistive Listening Systems tune to all 37 ALS channels and work indoors as well as outdoors with "no line-of-sight" requirements. These systems connect easily to existing public address systems. The TX-37A can transmit over 300ft. Its universal input accepts mic level, line levels, and speaker level signals. Features include adjustable signal strength, built-in test tone for tuning, and remote mount antenna with 50' of cable. The Digital-1 is designed to be field-preset to a single ALS channel for very easy operation. The user just turns it on and adjusts the volume. Digital tuning eliminates any problems that can occur from frequency drift or changes in the environment. The Digital-6 Plus is a 6-preset version of the Digital-1, used primarily for multi-language or multi-room applications. The RX-1A is a low-cost ALS receiver that uses manual tuning. Gentner's FM design and high level of sensitivity allows flexibility not found in infrared (IR) systems. Accessories include a variety of headphones and earpieces, as well as battery chargers and more.

VENTURE-BASE

GENTNER VENTURE TOUR GUIDE/LANGUAGE INTERPRETATION SYSTEM

The Venture products are perfect for both tour group and language translation applications. The Venture-Base transmitter broadcasts on its own auditory assistance band, so it won't interfere with other FM devices. It features field-selectable channels (19 in the 216MHz frequency band) with digital selection, adjustable RF level to allow control of RF coverage and Aphex® processing for increased intelligibility. It transmits to an area of more than 700,000 square feet and multiple receivers can be used in one location. You can also connect any existing audio system via a tape or mixer auxiliary output. The universal input stage accepts audio from a mic, line, or speaker, producing exceptional audio quality at all levels. The Venture-Express is a portable transmitter version that is ideal for applications where one person needs to transmit audio to multiple participants. Both receiver options operate on two AA cells, and are digitally tuned to lock onto the desired frequency.

TELEX®

TELEX SOUNDMATE™ SM2 SYSTEM

This Soundmate personal listening system helps overcome background noise and poor acoustics that hamper listening for the hearing impaired. This system consists of (1) ST300 transmitter, (4) SR50 single-channel receivers, and (4) SEB1 single earbuds. The ST300 transmitter features 17-user selectable frequencies (72.1-76MHz) controlled by front-mounted buttons, headphone jack, and level control. On the back of the unit is balanced XLR-F jack with selectable mic/line, and 70V input options as well as an unbalanced 1/4" input. Other optional receivers exist as well. The SR400 is a digital 17-channel portable receiver that features an enhanced dynamics range (EDR) that provides clearer, more dynamic audio. Carrying case for system is optional.

WILLIAMS SOUND PLA-215 ROOM LOOP AMPLIFIER

Ideal for use at home or in small conference rooms up to 540 square ft. System includes 120ft. of induction loop wire - simply fed from the amplifier and back to it again, forming a loop. In addition to settings for basic volume and tone, the digitally controlled induction loop amplifier uses automatic gain control to stabilize the volume for fluctuating input levels. The device can accommodate the connection of two audio sources; choose your source with the quick touch of a button (mic or line in). I/O consists of (2) 1/8" mic inputs, 2 RCA left/right line inputs, push grip connectors for loop cable/pad out and an 1/8" headphone out. Includes PLA-215 with power cord, 1 mic with 14 ft. (4 m) of cable, 122 ft. (37 m) of 18ga standard wire (0.75 mm²) and cable clips, and audio input cables.

ITEM	DESCRIPTION	PRICE
PLA-215	Room loop amplifier	199.00

WILLIAMS SOUND PLA-90 PORTABLE INDUCTION LOOP SYSTEM

Compact and easy to install, this portable induction loop system readily accommodates individuals with hearing difficulties at a bank teller window, information desk, store counter or anywhere customers/visitors need to hear what is being said. Hearing HotSpot picks up external voices with an integrated mic or with an optional external mic. The system transmits spoken word clearly and directly to a listener's hearing aid equipped with a T-coil. Designed to meet ADA accessibility requirements. Operation range is approx. 3-4ft. I/O consists of 1/8" mono jack in for external mic and 1/8" stereo headphone out. Built in 12VDC rechargeable battery will last approx. 6 hours. Includes (1) Hearing HotSpot™ counter loop, (1) rechargeable 10x AA NiMH battery pack, and (1) TFP 046 International Power Supply.

ITEM	DESCRIPTION	PRICE
PLA-90	Portable induction loop system	249.00

PPA-R37	Single-channel receiver w/belt clip, batteries & EAR-013 earphone	103.00
CHG3512-PRO	12-unit charger for PPA-R37 receivers	522.23

WILLIAMS SOUND DIGI-WAVE DSS WIRELESS LISTENING SYSTEM

A 2-way digital listening system in the 2.4GHz band. With the push of a button, users can access 2-way communication for easy audience/group member participation. Capable of transmitting and receiving up to 100' outdoors and up to 200' indoors. Operating on the 2.4GHz band with patented frequency-hopping software, it has a high resistance to RF interference. Operates on 4 channels simultaneously in 2-way mode and up to 15 channels simultaneously in 1-way mode. All controls are located on the front panel. The DLR-50 receiver display shows channel of operation, volume setting, and low battery status. The DLT-100 transceiver display shows current set-up, battery life, time, and RF strength. It also features a built-in microphone and speaker, and includes a charger with 14 hours of use per charge.

ITEM	DESCRIPTION	PRICE
DLR-50	Wireless digital receiver	178.00
DLT-100	Wireless digital transceiver	446.00
CCS-044	Silicone skin/wrist strap for the DLT-100	11.56
RCS-008	Wrist strap for the DLR-50	3.75
CHG-102	2-bay charger (for DLT-100)	57.68
