Ultra Portable Multimedia Projector

PLC-XW57

The Flexible Presentation Solution

3LCD

▶ Light Weight and Compactness

The compact and lightweight body (330.0 (W) x 80.0 (H) x 237.0 (D) mm and 2.9 kg) offers great portability. (not including protruding parts)

▶ Bright Images Even In a Well-Lit Room

The PLC-XW57 use a 200-watt UHP lamp for outstanding brightness and well-balanced color reproduction. The PLC-XW57 series provide 2,000 lumens brightness.

▶ High-Quality UXGA/WXGA Compressed Projection with DRIT

Digital Realized Interpolation Technology (DRIT) for supporting input signals with resolutions from UXGA to VGA by compressing/decompressing signals.

▶ Two D-sub Terminals

The PLC-XW57 has two D-Sub terminals for computer input, one of which may be changed to a monitor output terminal.

▶ Power-Off and Go

No need to wait for the projector to cool down. You can disconnect the power cord right after your presentation.

▶ Wide-Range 1.2x Zoom Lens

This zoom lens lets you project a 100" image (measured diagonally) from as close as 3.5 meters from the screen, to as far away as 4.2 meters. That makes it a lot easier to find suitable places to set the projector up.

▶ Digital Keystone Correction

To compensate for keystone (trapezoidal) picture distortion, the PLC-XW57 provide vertical keystone correction with a correction range up to ±20 degrees.

Note: On screen image size after correction is smaller than that of original. Correction range varies depending on operation settings such as lens shift ratio, lens zoom magnification and so on.

▶ Digital Zooms Make Setting Up More Flexible

The PLC-XW57 feature a 1/2x to 16x digital zoom that lets you easily enlarge or reduce the screen display size as desired.

▶ Fan Control System Reduces Unwanted Noise

The intelligent Fan Operation Linear Control System reduces cooling fan noise according to changes in temperature.

▶ 3D AUCC for High-Resolution Images

The 3D Automatic Uniformity Correction Control (AUCC) circuit ensures a uniform projected image, balancing uneven color and brightness gradations for more natural image displays.

▶ Security Functions

The PIN code lock function prevents others from operating the projector without inputting the correct PIN code. The key lock function, which is set from the operation menu, locks the operation of the top control and remote control buttons.

▶ Blackboard (Green color) Mode

This mode lets you use a blackboard as a projection screen*. It adjusts the colors to make images look similar to those projection to an ordinary white screen.

* For blackboard of green color only.

▶ Countdown/Immediate Projection Selectable

You can select either mode at start-up. Countdown mode ensures that the lamp has reached sufficient brightness before projecting the image. Immediate mode lets you project the image as soon as the power is turned on, even if the optimum level of brightness has not been reached.

▶ Other Features

• Freeze function • Customizable start-up logo • User logo function • No show function • Presentation timer • Multilanguage menu display (16 languages)
