The Sony® HDR-XR100 Handycam® camcorder records stunning, 1920 x 1080 high definition video and crystal clear still photos to a built-in 80GB¹ hard disk drive. Building on the convenience of Face Detection technology, the HDR-XR100 features Smile Shutter™ technology, which can automatically detect smiles and shoot still images, even while recording video.

- 1920 x 1080 high definition video recording:
1920 x 1080 high definition resolution lets you record your memories in exceptional Sony® Full High Definition quality².
- 4 megapixel still image capture:
4 megapixel still image capture lets you take high resolution digital photos.
- 80GB hard disk drive:
A built-in 80GB¹ hard disk drive can record and store up to almost 32 hours of high definition video footage (HD LP mode), or up to almost 56 hours of standard definition footage (SD LP mode). In addition, "HDD Smart Protection" gives you peace of mind by helping to prevent any recorded video and images from being lost if the camcorder is accidentally dropped.
- Face Detection technology for Video Footage and Digital Still Photos:
Made possible by the BIONZ™ image processing engine, Face Detection technology recognizes up to 8 faces anywhere in the frame and by selecting the most prominent, automatically controls focus, exposure, and color to help capture smiling faces brightly and clearly. Face Detection technology also helps make skin tones look natural without affecting other colors in the image. On AVCHD models, the camcorder allocates encoding bits on detected face areas prior to encoding other parts of the picture, making them sharper and clearer. In still picture mode, Face Detection technology sets the flash level to optimize picture clarity.
- Smile Shutter™ technology for still and dual capture:
Smile Shutter™ technology lets the camcorder automatically take still photos when your subject smiles, even while shooting high definition video. You can also set the sensitivity and choose child, adult, or auto priority.
- SteadyShot™ image stabilization:
SteadyShot™ image stabilization reduces blur caused by camera shake and vibration, so your images stay crisp and clear.
- 2.7" wide touch panel³ Clear Photo LCD Plus™ display:
2.7" wide (16:9)³ touch panel Clear Photo LCD Plus™ display provides excellent viewing clarity with improved resolution (211K pixels). The display rotates up to 270 degrees for multiple viewing angles, as well as provides sharp, detailed images for monitoring or playback. The convenient touch panel allows easy access to menus and additional functionality such as spot focus and spot metering.
- Power On by opening LCD display:
Power on your camcorder by simply opening the LCD display.
- Professional-quality Carl Zeiss® Vario-Tessar® Lens
Carl Zeiss® Vario-Tessar® lenses use highly advanced optics to deliver vivid image brilliance, true-to-life color saturation, and perfect renditions of subtle tones.
- 10X Optical / 120X Digital Zoom:
10X optical zoom helps to bring the action close up from far away. In addition, Digital Zoom Interpolation means that digital zooming (up to 120X) is clearer, with less distortion than previous types of digital zoom.
